The Federal Investigation Agency (Urdu: وفاقی تحقیقاتی ادارہ; reporting name: FIA) is a border control, counter-intelligence and security agency under the control of the Interior Secretary of Pakistan, tasked with investigative jurisdiction on undertaking operations against terrorism, espionage, federal crimes, fascism, smuggling as well as infringement and other specific crimes. Codified under the Constitution of Pakistan in 1974, the institution functions under the Ministry of Interior (MoI). The FIA also undertakes international operations with the close cooperation and coordination of Interpol. Headquartered in Islamabad, the agency has various branch and field offices located in all major cities throughout Pakistan.

More than 39 international offices, designated as "Immigration Wing", exist in Pakistan embassies and consulates-general worldwide. Its executive figure is appointed by the Prime Minister of Pakistan. The current Director-General (DG FIA) is Bashir Memon, a grade 22 PSP officer, appointed in August 2017.

The National Intelligence Directorate (NID) was formed in 2014 to pool intelligence gathered by over 30 of Pakistan's intelligence agencies.

Mission Statement

To achieve excellence in FIA by promoting culture of merit, providing continuous professional training, ensuring effective internal accountability, encouraging use of technology and having a meaningful feedback mechanism.

Vision of FIA

A law enforcement agency which not only enjoys the respect of the society, for its integrity, professional competence, and impartiality but also serves as a role model for provincial police forces.

History of the FIA

A Federally controlled police establishment first came into existence in 1942 during the Second World War to take up investigation of corruption, rampant in Supplies and Procurement Department of the government of India. It was named as Special Police Establishment. After the independence of 1947, it was named as Pakistan Special Police Establishment (PSPE). The said Establishment was given schedule of offences with the ordinance of VIII of 1948. With the passage of time, the PSPE depart from investigation the offences of bribery and corruption against central government employees, was given powers to investigate cases relating to the offences under the following laws:-

- Official Secret Act, 1923
- Foreign Exchange Regulation Act, 1947
- Passport (Offences), 1952.
- Customs Act, 1959.

Creation

After the 1971 war with India, police reforms were carried out by Prime Minister Zulfikar Ali Bhutto after adopting recommendations from the report submitted by bureaucrat G. Ahmad in Prime Minister Secretariat, on 7 March 1972. The Federal Investigation Agency (FIA) was created on 13 January 1975, after being codified in the Constitution with the passing of the FIA Act, 1974, by the State parliament. Initially, its first roles were to build efforts against organised crimes, smuggling, human trafficking, immigration offences, and passport scandals.

When the FIA was created, it took cases ON corruption at every level of the government. Although ostensibly a crime-investigation service, the FIA also did investigations of accused political opponents and critics of financial impropriety, from tax evasions to taking bribery while in office.

National security and efforts against terrorism

Initially, its role was to conduct investigations on public corruption but the scope of the FIA's investigation was increased to take actions against communist terrorism in the 1980s. In 1981, the FIA agents successfully investigated and interrogated the culprits behind the hijacking of a Pakistan International Airlines Boeing 720 CR, immediately holding Murtaza Bhutto for its responsibility. The FIA keenly tracked the whereabouts of Murtaza Bhutto in Syria, and successfully limited the influence of his al-Zulfikar group. In 1985, the FIA's undercover operation busted the drug trade with the illicit trade leaders and their culprits apprehended by the FIA. Known as the "Pakistan League Affair", the FIA effectively put an end to the illicit drug trade with the arrest of the gang's key drug lord.

From 1982 to 1988, the FIA launched a series of investigations and probes against Pakistan Communist Party leader Jam Saqi and aided the court proceedings relating to its findings. In 1986, the FIA successfully infiltrated the terrorist group responsible for hijacking Pan Am Flight 73, and quickly detained the Libyan commercial pilot suspected of having a role in the hijack.

After securing voting plurality in 1993 Pakistani general elections, Prime Minister Benazir Bhutto further widened the scope of FIA, making FIA akin to Inter-Services Intelligence (ISI) in the intelligence community. After approving the appointment of senior FIA agent Rehman Malik, the FIA's intelligence and investigations were now conducted at the international level, with close co-ordination with the American FBI. The FIA notably worked together with the FBI to conduct investigations of the 1993 bombing at the World Trade Center in New York, United States. The FIA and FBI tracked down the mastermind of that bombing, Ramzi Yousef, in Pakistan. In 1995, the successful investigation led to the extradition of Yousef to the United States.

In the 1990s, the FIA directed by Malik, was involved in leading investigations and actions against al-Qaeda operatives, Khalid Sheikh Mohammed and Ramzi Yousef, and assisted the FBI to apprehend Yousef in 1995, and Mohammed in 2002. The FIA pushed its efforts against terrorism and tracked crime syndicated organisations affiliated with the terrorist organisations. The FIA was said to be launching secret intelligence operations against the terrorist organisations, which mounted a secret competition with the ISI. In leading its intelligence operations, the FIA was in direct contact with Israeli Mossad to assist the FIA in gaining intelligence and further interrogating the extremist elements. According to the military authors, such reports equally dismayed the Pakistani military which was already upset with FIA's intelligence operations interfering with the ISI's intelligence operations. Despite difficulties, the FIA had gained world prominence after reportedly leading successful operations against terrorism in 1996.

In 2001, the FIA successfully investigated the case against Sultan Mahmood for his alleged part in nuclear terrorism, though the FIA cleared Mahmood of his charges in 2002. In 2003, the role of counter-terrorism was assigned to the FIA, which led to an establishment of the Counter-Terrorism Wing (CTW). The CTW agents were provided extensive training and equipment handling by the FBI under the Anti Terrorism Assistance Program (ATTP).

The FIA began investigating Khalid Sheikh Mohammed and his movement around the world was monitored by the FIA. The FIA agents kept the investigations with FBI agents over the case of Mohammed. Eventually FIA's successful investigations led to Mohammed's capture in Rawalpindi, Punjab, in a paramilitary operation conducted jointly by the CIA and the ISI in 2003. In 2002, the FIA continued its investigation and had strict surveillance of the movements of Afia Siddiqui in Karachi. In 2003, the FIA had been investigating the investigation on Siddiqui's movements and activities, subsequently sharing with the United States.

Anti-infringement efforts

Efforts on probes against copyright violation was increased after a petition was filed by the FBI which disputed Pakistan's commitment to rooting out infringement within its national borders in 2001.

In 2002, the FIA launched several probes against copyright infringement and Pakistan was en route to having its US duty-free GSP agreements being taken away from it in 2005. To avert any further negative fallout, sections of the Copyright Ordinance 1962 were included in the FIA's schedule of offences. This legislation paved the way in 2005, under the direction of the federal interior ministry, to raid the country's largest video wholesale centre: The Rainbow Centre.

Raiding the factories of the dealers that operated within the centre proved to be a highly successful enterprise, resulting in a reduction of 60% of sales of bootlegged video material. A spokesman from the International Federation of the Phonographic Industry (IFPI), later confirmed, that many of the outlets had stopped selling unlicensed video goods and were now selling mobile phones, highlighting that the FIA's raids and the resultant legal action were a success.

Intelligence Operations

In 1972-73, Prime Minister Zulfikar Ali Bhutto adopted many recommendations of

the Hamoodur Rahman Commission's papers after seeing the intelligence failure in East Pakistan. This led the reformation of the FIA as Prime Minister Bhutto visioned the FIA as equivalent to American FBI which not only protects the country from internal crises but also from foreign suspected threats therefore he established the FIA on the same pattern. In 1970s, Prime Minister Bhutto had the Pakistan intelligence to actively run military intelligence programs in various countries to procure scientific expertise and technical papers in line of *Alsos Mission* of Manhattan Project.

Both FIA and IB were empowered during the government and the scope of their operation was expanded during 1970s. Though ISI did lost its importance in 1970s, the ISI valued its importance in 1980s after successfully running the military intelligence program against the Soviet Union. Sensing the nature of competition, President Zia-ul-Haq consolidated the intelligence services after the ISI getting training from the CIA in 1980s, and subsequently improved its methods of intelligence.

In 1990s, the ISI and FIA, in many ways, were at war in the poverty-stricken landscape of Pakistan politics. The ISI used its Islamic guerrillas as deniable foot soldiers to strike at FIA credibility, and according to published accounts, the FIA turned to Israeli Mossad and Israeli Intelligence Community through Pervez Musharraf to helped down the terrorist networks in the country. Throughout the 1990s, the intelligence community remained under fire and competition in each services for credibility.

After the September 11, 2001, the attacks in the United States history, the FBI launched the largest investigation in its history and soon determined that the hijackers were linked to al-Qaeda, led by Saudi exiled Osama bin Laden. Same as just after 9/11 attacks in the United States, the FIA gained credibility over the ISI in the United States. The FIA and ISI were also mentioned in *The Path to 9/11* television series.

Special FIA teams

On 9 June 1975, the FIA formed the Immigration Wing (IW) to help NARA agents and officials to conduct probes against illegal immigration to Pakistan. In 1979, the Anti-Human Smuggling Wing was formed to take evasive actions against the human smugglers and trafficking. In 1975, another special team, the Technical Wing, was formed to tackle financial crimes.

In 2003, the FIA formed an elite counter-terrorism unit to help deal with exterminating terrorism in the country. Named Counter-Terrorism Wing (CTW), it acts as an Elite team in related procedures and all counter-terrorism cases. Also the same year, the FIA formed the *Cyber Investigation Unit* (CIU) and the *Computer Analysis and Forensic Laboratory*.

Since then, the FIA has assigned its agents, and officials have received physical training and electronic equipment from the United States. In 2011, the CTW was further expanded and FIA established another *Terrorist Financing Investigation Unit* (TFIU) to conduct and lead operations against terrorism financing. The CTW operatives have also assisted other intelligence agencies to conduct joint investigations against the terror groups. To date CTW has always been an integral part of high-profile terrorist cases. It has also managed the most wanted list of individuals involved indirectly or directly in taking part in terrorism. In 2008, the FIA successfully led and concluded the joint investigations on the Marriott Hotel bombing in Islamabad. The FIA shared most of its findings gathered through interrogation of the arrested suspects to help hunt down the top members of al-Qaeda, with the FBI.

Other FIA special teams included the Anti-Corruption Wing (ACW) which was established in 2004 to lead probes against corrupt officials and other white collar criminals. In 2004, the Economic Crime Wing (ECW) was also established in 2004 but transferred to the NAB; though it was restored to the FIA in 2008. In 2014, the FIA formed an elite response team with the National Counter

Terrorism Authority (NACTA) agency to take decisive and through counter-terrorism actions, based on gained internal intelligence, against the terror groups.

Criticisms and controversies

Covert operations on political groups

The FIA has used covert operations against domestic political groups since its inception; the FIA launched covert operations against the right-wing activists of the PNA. In 1990s, the FIA was involved in running active intelligence operation against the Bonded Labour Liberation Front (BLLF) on behalf of the government. Critics of FIA have called the agency "secret police". In the 1980s, the FIA also targeted Pakistani leftist groups and was instrumental in conducting inquiries (Jam Saqi case) in preparation against the Communist Party of Pakistan.

2005 FIA scandal

In 2005, Pakistani Ministry of Justice agents successfully infiltrated the immigration wing of the FIA, leading the FIA to launch an investigation against its own department. The special agents of the FIA arrested five of FIA's immigration agents for their alleged role in human trafficking, and most of them were dismissed from the service.

2008 Lahore bombings

On 11 March 2008, the Pakistani Taliban (TTP) coordinated the twin suicide bombings to target the counter-terrorist unit of FIA based in Lahore. The building was severely damaged during the suicidal attack. The Geo News later reported that "the building also housed the offices of a special US-trained units of FBI created to counter terrorism" suggesting a motive.

International access

Cooperation with foreign counterparts

In 2006, the FIA resumed operational links with its Indian counterpart, the Central Bureau of Investigation, after a gap of 17 years.

The FIA participates in the PISCES project which was initiated by the US Department of State, Terrorist Interdiction Program (TIP) in 1997, as a system to improve their watch-listing capabilities by providing a mainframe computer system to facilitate immigration processing. The PISCES system has been installed at seven major airports of the country i.e. Islamabad, Karachi, Lahore, Peshawar, Quetta, Multan and Faisalabad airports. The system has provision to accommodate information on suspects from all law enforcement agencies like Immigration, Police, Narcotics Control, Anti-smuggling, and Intelligence Services.

FIA's Professional Mandate

- Investigation into specialized and organized crime
- Immigration and Anti-Smuggling
- Personal Identification Secure Comparison and Evaluation System (PISCES) Computerized Control and Exit
- Anti Human Smuggling and Trafficking
- Counter Terrorism(Special Investigation Group)
- Money Laundering(Excluding narcotics and anti corruption proceed)

Services

Technical Branch

The technical branch is providing scientific assistance to various units of the F.I.A.NAB, Islamabad, AJK Police and Railway Police, Federal Government Departments, Banks and Financial Institutions and (on special request) Provincial Police Departments. Three sections of the Branch are Questioned Documents section, Fingerprint section and Chemical Analysis section.

Questioned Documents:

- Determination of genuineness / authorship of signatures and writings
- Determination of the presence of erasures, alterations, additions, substitutions in writings and figures whether handwritten, typed or printed.
- Determination of original figures and writings whether handwritten, printed or typed.
- Determination of false additions, replacements, removals in the leaves of books, registers, files etc.
- Determination of artificial ageing of documents.
- Determination of removal, replacement, affixation etc of revenue stamps on various types of

documents.

- Determination of counterfeit documents / currency notes / prize bonds / financial instruments etc.
- Determination of alterations in passports / visas etc.
- Determination of the type and quality of ink and comparison by two or more specimens to find out if they are of common origin or otherwise.

Fingerprint

- Examination of fingerprints on documents.
- Development of latent fingerprints and their identification.
- Examination of crime scene for development and lifting of fingerprints.
- Examination of foot and palm prints.
- Collection and maintenance of classified fingerprint record of convicts.
- Training of proficient.
- Maintaining hard copy data-base of 10-print & palm print cards.

Chemical Testing

- Examination of Engine / Chassis numbers of suspected vehicles and weapons.
- Determination of cut and welding of metallic sheets / plates.

Computer Forensics

In today's ever changing criminal world, the use of computers for fraud and the pursuit of other crimes has increased to dramatic proportions. NRJC-FIA is a specialized department to deal with the computer crime. Computer crime is not only about fraud - online or otherwise - it also encompasses areas such as pornography, child sex abuse and the sale of black market goods online. The wide range of data content present in hard drives is potential evidence if seized from a crime scene. The process of forensic acquisition, analysis and reporting of computer storage devices is Computer Forensics. NRJC has state of the art computer forensic facility, and possess leading forensic experts to deal with all computer related crimes.

Mobile Forensics

The increased utility of mobile devices such as smart phones has leveraged the criminals to communicate and use digital application, resultantly storing tremendous amount of data on the device. Criminals use smart phones for a number of activities such as committing fraud over e-mail, harassment through text messages, trafficking of child pornography, communications related to narcotics, etc. The data stored on smart phones is extremely useful to forensic analysts through the course of an investigation. The forensic acquisition, analysis and presentation of data content stored on mobile devices is known as Mobile Forensics. NRJC since inception has dealt with numerous mobile forensic cases, and also facilitates other government installations on such technical assistance.

Video Forensics

Video recordings can provide a real time, eyewitness account of a crime so investigators can watch or hear what transpired. For instance, a surveillance video captures a bank robbery in progress, or a hidden camera records. For most crimes, however, high quality video recordings are often not available. This is where forensic video expertise can help. Forensic experts have many techniques to enhance recordings that can bring out details and provide a clearer picture of what occurred. NRJC experts have engaged in numerous video forensic investigations and have successfully identified criminals and terrorist through this forensic method.

Network Forensics

Network forensics is the capture, storage, and analysis of network events. Regardless of the name, the idea is the same: record every packet of network traffic (all emails, all database queries, all Web browsing—absolutely all traffic of all kinds traversing an organization's network) to a single searchable repository so the traffic can be examined in detail. It also includes the forensic examination of network devices such as router, VOIP gateways, IDS/IDP etc. The network device configuration and related data present in these devices is important in cyber crime cases. NR3C has a specialized team to investigate and process network forensic cases. They have successfully analyzed numerous network forensic investigations in past.

Technical Training

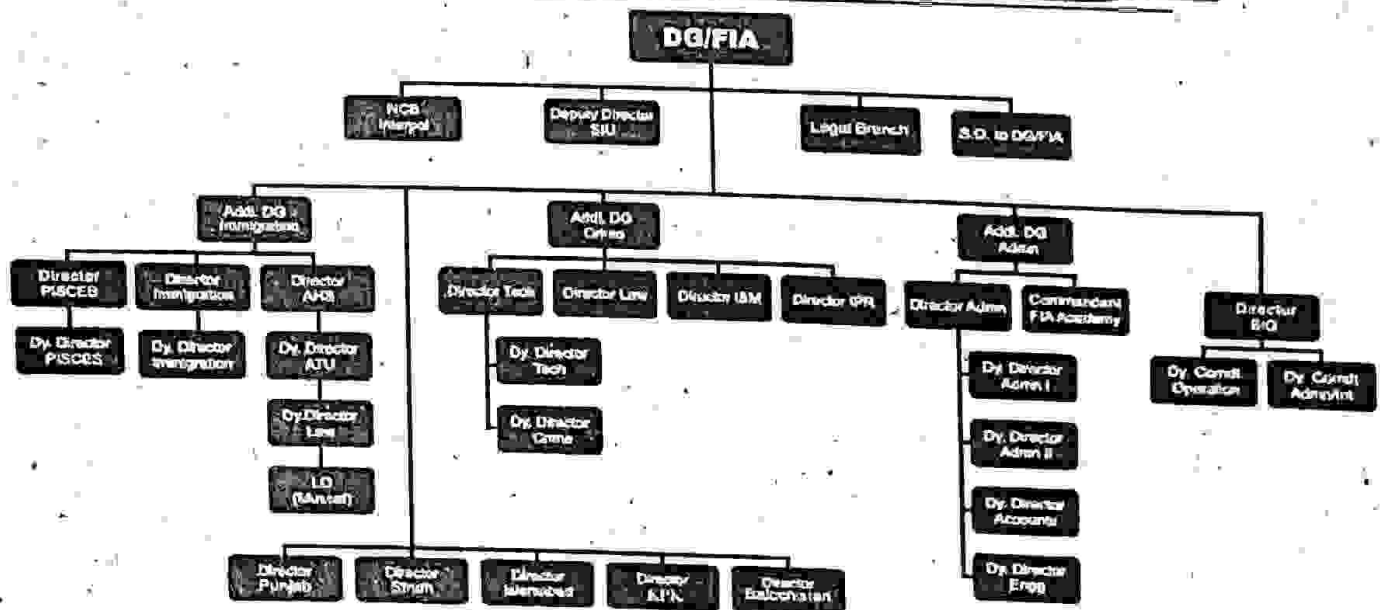

Development of human resource leverages the organizations to perform efficiently. Trainings, seminars and workshops are instant source of information that gives an edge to professionals to understand and excel in their respective fields. NR3C over years has trained around thousands of individuals of academia, law enforcement agencies, judiciary, police academy, intelligence agencies etc. Trainings disseminated in relation to digital forensic comprehension of interpreting forensic reports, evidence extraction methods, laws application to judicial community. 12,458 individuals from all walks of life ranging from a 6 grade kid to a decorated officers have been trained by NR3C to serve the purpose cyber crime mitigation

Organizational Structure

The Director-General, generally a very senior Police Officer of BPS 21/22, with his Headquarters based at Islamabad, acts as head of the Department. In his work, he is assisted by three Additional Director-Generals and ten Directors for effective monitoring and smooth functioning of the operations spread all over the country.

Six Directors assist the Director-General at Headquarters in controlling the Functional Wings of Administration, Crime, Immigration and Anti-Human Smuggling, PISCES, SIG and Technical Assistance. Five Directors supervise the zones of Lahore, Karachi, Peshawar, Quetta and Islamabad

FEDERAL INVESTIGATION AGENCY

ACT, 1974 (VIII OF 1975)

An Act to provide for the constitution of a
FEDERAL INVESTIGATION AGENCY

(Gazette of Pakistan, Extraordinary, Part-I, 17th January, 1975)

Whereas it is expedient to provide for the constitution of a Federal Investigation Agency for the investigation of certain offences committed in connection with matters concerning the Federal Government, and for matters connected therewith;

It is hereby enacted as follows: -

1. Short title, extent and commencement:

1. This Act may be called the Federal Investigation Agency Act, 1974.
2. It extends to the whole of Pakistan and also applied to all citizens of Pakistan and Public Servants, wherever they may be.
3. It shall come to force at once.

2. Definitions: In this Act, unless there is anything repugnant in the subject or context: -

- o "AGENCY" means the Federal Investigation Agency constituted under section 3;
- o "CODE" means the Code of Criminal Procedure, 1898 (Act V of 1898);
- o "DIRECTOR GENERAL" means the Director General of Agency;
- o "PROVINCIAL POLICE" means the Police constituted by Provincial Government under the Police Act, 1861 (V of 1861);
- o "PUBLIC SERVANT" means a public servant as defined in Section 21 of the Pakistan Penal Code (Act XL V of 1860), and includes an employee of any corporation or other body or organization set up controlled or administered by or under the authority of the Federal Government;
- o "SPECIAL POLICE" means the Pakistan Special Police Establishment constitution under the Pakistan Special Police Establishment Ordinance 1948, (VII of 1948);
- o "SPECIFIED PERSONS" mean the persons who were appointed to posts in or under a Provincial Police in pursuance of Article 3 of the Special Police and Provincial Police (Amalgamation) Order, 1962 (P.O. No. 1 of 1962); and
- o "RULES" means rules made under this Act.

3. Constitution of the Agency:

0. Notwithstanding any thing contained in any other law of the time being in force, the Federal Government may constitute an Agency to be called the Federal Investigation Agency for inquiry into, and investigation of the offences specified in the Schedule, including an attempt or conspiracy to commit, and abetment of, any such offence.
1. The Agency shall consist of a Director General to be appointed by the Federal Government and such number of other officers as the Federal Government may, from time to time, appoint to be members of the Agency.

4. Superintendence and administration of the Agency:

0. The Superintendence of the Agency shall vest in the Federal Government.
1. The administration of the Agency shall vest in the Director General who shall exercise in respect of the Agency such of the powers of an Inspector General of Police under the Police

Act, 1861 (V of 1861), as may be prescribed by rules.

5 Powers of the members of the Agency:

0. Subject to any order which the Federal Government may make in this behalf, the members of the Agency shall, for the purpose of an inquiry or investigation under this Act, have throughout Pakistan such powers, including powers relating to search, arrest of persons and seizure of property, and such duties, privileges and liabilities as the officers of a Provincial Police have in relation to the investigation of offences under the Code or any other law for the time being in force.
1. Subject to rules, if any, a member of the Agency not below the rank of a Sub-Inspector may, for the purposes of any inquiry or investigation under this Act, exercise any of the powers of an officer-in-charge of a Police Station in any area in which he is for the time being and, when so exercising such powers, shall be deemed to be an officer-in-charge of a Police Station discharging his functions as such within the limits of his station.
2. Without prejudice to the generality of the provisions of the sub-section (1) and sub-section (2), any member of the Agency not below the rank of Sub-Inspector authorized by the Director General in this behalf may arrest without warrant any person who has committed, or against whom a reasonable suspicion exists that he has committed, any of the offences referred to sub-section (1) of Section 3.
3. For the purpose of the exercise by the members of the Agency of the powers of an officer-in-charge of a Police Station, "Police Station" includes any place declared, generally or specially, by the Federal Government to be a Police Station within the meaning of the Code.
4. If, in the opinion of a member of the Agency conducting an investigation, any property which is the subject-matter of the investigation is likely to be removed, transferred or otherwise disposed of before an order of the appropriate authority for its seizure is obtained, such member may, by order in writing, direct the owner or any person who is, for the time being, possession thereof not to remove, transfer or otherwise dispose of such property in any manner except with the previous permission of that member and such order shall be subject to any order made by the Court having jurisdiction in the matter.
5. Any contravention of an order made under sub-section (5) shall be punishable with rigorous imprisonment for a term which may be extend to one year, or with fine, or with both.
- 5-A. **Certain Officers of the Agency deemed to be public Prosecutors:** Notwithstanding anything contained in any order law for the time being in force the Assistant Directors (Legal) and the Deputy Directors (Law) of the Agency shall be deemed to be Public Prosecutors and shall be competent to institute and conduct any proceedings in cases sent up for trial by the Agency in the Special Courts constituted under any law and the courts subordinate to the High Court. (Added through FIA (Amendment) Ordinance 2002)

6 Power to amend the Schedule:

The Federal Government may, by notification in the official Gazette, amend the Schedule so as to add any entry thereto or modify or omit any entry therein.

7 Delegation of Powers :

The Director-General may by order in writing, direct that all or any of his powers under this Act or the rules shall, subject to such conditions, if any, as may be specified in the order, be exercisable also by any member of the Agency so specified.

8 Indemnity:

No suit, prosecution or other legal proceeding shall lie against the Federal Government, any member of the Agency or any other person exercising any power or performing any function under this Act or the rules for any thing which is in good faith done or intended to be done under this Act or the rules.

4) **Power to make rules:**

0. The Federal Government may, by notification in the official Gazette, make rules for carrying out the purposes of this Act.

1. In particular and without prejudice to the generality of the fore-going power, such rules may provide for all or any of the following matters, namely:-

- The terms and conditions of service of the Director General and other members of the Agency and the qualifications for recruitment to various posts.
- The powers and functions of the members of the Agency in relation to the conduct of inquiries and investigations;
- The nature and extent of the assistance with the Agency may provide to Provincial investigating agencies;
- The powers of the Inspector General of Police under the Police Act, 1861 (V of 1861), which shall be exercisable by the Director General and The manner in which rewards may be given to the members of the Agency or of the public for rendering commendable services.

[O] Repeal:

0. The Pakistan Special Police Establishment, 1948 (VII of 1948), and the Special Police and Provincial Police (Amalgamation) Order, 1962 (P.O. No.1 of 1962), hereinafter referred to respectively as the said Ordinance and the said Order, are hereby repealed.

1. Upon the repeal of the said Ordinance: -

1. All persons who were members of the Special Police immediately before such repeal, including the specified persons shall stand transferred to the Agency and shall, subject to sub-section (5), be entitled to the same terms and conditions to which they were entitled immediately before such repeal; and

2. Any inquiry or investigation pending with the Special Police immediately before such repeal shall continue to be conducted by the Agency.

2. Notwithstanding the repeal of the said order, but subject to sub-section (4), every specified person shall continue to be appointed in or under the Provincial Police in or under which he was holding a post immediately before the commencement of this Act.

3. On the recommendation of the Director General and with the concurrence of the Provincial Government concerned, the Federal Government, may direct that such of the specified persons referred to sub-section (3) as may, within thirty days of the commencement of this Act, express their willingness to serve in or under the Agency shall be appointed to posts in or under the Agency.

4. PART-I: ENGLISH

What is Vocabulary?

Vocabulary refers to the words we must understand to communicate effectively. It refers to a set of words that one knows in any language. It usually grows and evolves with age, and serves as a useful and fundamental tool for communication and acquiring knowledge. It is one of the most important components of language development. Vocabulary, like grammar and pronunciation, is the key to our understanding what we hear and read; and to communicating successfully with other people. For this reason it is very important for us to quickly build up a large store of words. Research studies have shown the strong links between having an extensive vocabulary and achieving academic success.

Vocabulary plays a vital role in the reading process and contributes greatly to a reader's comprehension. A reader cannot understand a text without knowing what most of the words mean. Students learn the meanings of most words indirectly, through everyday experiences with oral and written language. Other words are learned through carefully designed instruction. In this guide, every possible measure has been taken to guide students on vocabulary enhancement in the easiest manner.

Learning Vocabulary at its Easiest:

There are many points on which linguists agree from top to bottom. Such agreements become a kind of 'rule' in a particular discipline. In language, it is an admitted fact that there exists a relationship among words. Words are either similar or opposite in meaning. If a word is similar in meaning to another word, it is called **Synonym**; it is said to be **Antonym** if opposite.

A **synonym** is a word or phrase that means exactly or nearly the same as another word or phrase in the same language. Words that are synonyms are said to be **synonymous**, and the state of being a synonym is called **synonymy**. While, A word or phrase opposite in meaning to another word is regarded as **antonym**.

Examples - (ANTONYM)

- Achieve - Fail
- Idle - Active
- Afraid - Confident
- Ancient - Modern
- Arrive - Depart
- Arrogant - Humble

Examples - (SYNONYM)

- Annihilation, destruction, carnage, extinction
- Benefit, profit, revenue, yield
- Cunning, keen, sharp, slick
- Destitute, poor, bankrupt, impoverished
- Deterioration, pollution, defilement, adulteration

In this respect, there is another interesting relationship among words which is known as **Homonym**. Homonyms are words that sound alike but have different meanings. They are source of entertainment, confusion, and inspiration. Homonyms are often the cause of a spelling or word usage error for they often cause confusion. In various competitive examinations, students are required to distinguish the meanings between two such given words. **Accept** and **Except** can be its most suitable example. They usually come in as "pair of words" or "words often confused". In this book, we have tried our utmost to present you a handy stock of such words which have been frequently posed by the examiner in the competitive examination. Some more examples are:

- Aid — Aide
- Affect — Effect
- Aisle — I'll — Isle
- Aloud — Allowed
- Altar — Alter
- Ark — Arc
- Ball — Bawl
- Base — Bass
- Beech — Beach
- Birth — Berth
- Bore — Boar
- Byte — Bite

Words Formation:

Word formation processes are basically how new words are created and become part of the language. There are quite a few of them, and we will now make the most important ones simple and clear. Knowing this can actually help you better understand the English language, not to mention the fact that knowing a word's origin is a great way to reinforce your understanding of it. In these processes, many factors are involved. However, the most relevant—with respect to our competitive examinations—are **coinage**, **backformation** and **borrowing**. The examiner might put the candidates' knowledge to test. He might check the immensity of their vocabulary and their command over their knowledge.

Synonyms

It may be possible to choose the correct answer by rejecting those words that simply cannot be the proper choice. This is done by a process of reasoning and elimination. However, you are advised to use this process only when you are not certain of answer. Remember that this process is very time-consuming.

Solved Example:

Directions: In the following question, choose the word which is most nearly the same in meaning to the bold word and mark it in the Answer Sheet.

Example: High:

- (a) Tall (b) Short
(c) Fat (d) Thin

Explanation: Here the word 'tall' is the nearest in meaning to the word 'high'. So, 'A' is the correct answer.

How to Attempt Synonyms:

1. Whenever possible, the question-word & answer-word must be the same part of speech. For example, if the question-word is in the past tense, the answer should also be in the past tense, and so on.
 2. A favourite trick of the examiner is to include antonym in answer choices for a synonym question. Be careful about what is asked before answering a question.
 3. Don't fumble if you don't get the dictionary meaning. You are only expected to choose the word, which has most nearly the same meaning.
 4. Don't ponder over a question for too long. It is better to answer first those questions you know. Then come back to those that you don't know.
 5. It may be possible to choose the correct answer by rejecting those words that simply cannot be the proper choice. This is done by a process of reasoning and elimination. However, you are advised to use this process only when you are not certain of the answer. Remember that this process is very time-consuming.
- But the point is that there are nothing like exact synonyms, but there are words which are similar in meaning. So, choosing the right word is a test of your overall knowledge of English rather than vocabulary.

How to Attempt Antonyms:

1. Whenever possible, the question-word and answer-word must be the same part of speech. For example, if the question-word is in the passive, the answer should be in the passive. Similarly, if the question-word is in the past tense, the answer should be in the past tense, and so on.
2. A favourite trick of the examiner is to include antonym in answer choices for an antonym. Be careful about what is asked before answering a question.
3. Don't fumble if you don't get the dictionary meaning. You are only expected to choose the word, which has most nearly the same meaning.
4. Don't ponder over a question for too long. It is better to answer first those questions you know. Then come back to those that you don't.
5. It may be possible to choose the correct answer by rejecting those words that simply cannot be the proper choice. This is done by a process of reasoning and elimination. However, you are advised to use this process only when you are not certain of the answer. Remember that this process is very time-consuming.

115. (A): *Hard* means firm. Its antonym is 'soft'.
116. (C): *Bold* means daring. Its antonym is 'meek'.
117. (B): *Individually* means relating to a single person. Its antonym is 'collectively'.
118. (C): *Spend* means disburse. Its antonym is 'save'.
119. (C): *Considerate* means kind. Its antonym is 'harsh'.
120. (A): *Admonish* means to rebuke or chide. Its antonym is 'flatter'.

Directions: Read each sentence to find out whether there is any error in it. The error, if any, may be in one part of the sentence. The number of that part is the answer. If there is no error, the answer is "5".

Explanatory Answer

- The errors in the sentences given above are errors many of us unfortunately make regularly. Let us take them up one by one and see what is wrong or right in each sentence.
1. (2) The simple past, present and future forms of "look" are "I looked," "I look", "I will look". The perfect forms are "I had looked," "I have looked," "I will have looked." The perfect continuous forms are "I had been looking," "I have been looking," "I will have been looking." Therefore in the sentence, the verb "looked" must be changed to "looking" to remove the error. The tense pattern that "look" follows, is also followed by other verbs like "work," and "talk" e.g., "I have been working till 4 PM," or "I have been talking to him till six this evening."
2. (2) This type of a sentence is called a balancing sentence. The word "early" is balanced by the word "late". The past, present and future perfect forms of "leave" are "had left", "I/they have left", "he/it has left", "will have had left." Therefore, in the given sentence, "leave" needs to be changed to "left". The sentence will then read "You must not have left very early to have reached here so late." Note that

- "have left" matches with "have reached."
3. (2) "Are" shows that the act of play is in the present tense. The simple past, present and future forms of "play" are "played," "play", "will play." The continuous forms are "were playing," "are playing," "will be playing." The correct form of this sentence will therefore be "The children are playing with their toys." If you want to retain "played", then the auxiliary "are" must be changed to "have" or "had" to suit the past form which "played" suggests.
4. (4) This grammatical error is mostly found amongst people who speak languages like Urdu which have no neuter gender. Since "sister" is feminine, some people tend to associate "her" with "sister", forgetting, as in this sentence, that the sister is the brother's sister and not the sister's sister. The "brother's sister" will be "his sister." The "sister's sister" or "mother's sister" will be "her sister." Therefore, since "Ramzan" is a male and is the subject, the sentence should be "Ramzan loves his brother but hates his sister".
5. (2) Had this sentence been a direct sentence (*i.e.* if it was enclosed by inverted commas) and had there been a comma after "Shoaib", then the sentence would have been a correct sentence, because, then it would have meant that some one was instructing Shoaib, to drop a coin in the pool, *e.g.* Ramzan said, "Shoaib, drop the coin in the pool." But here the sentence is in reported speech. The various tense forms (past, present, future) of "drop" are "he/I/they/you dropped," "I/they/you drop," "he/she drops" "I/he/they/you will drop." Since "Shoaib" is 3rd person singular, "drop" should normally be in the past form *i.e.* "dropped." In certain cases "drops" will also be correct if it is, for example, a stage direction where everything is in the simple present.
6. (2) "It", by itself, is a pronoun and therefore stands in place of a noun, *e.g.* It is a horse. "It" is therefore singular. It would therefore be wrong to write. "It are horses." "They" or "those are horses" would be the correct form since "they" or "those" suggest more than one. "Its" is the possessive case of "it" and like "it" it is singular. Therefore, "its leaves", will stand for the leaves of one tree. In the sentence "tree" is plural, therefore the possessive case (also called pronominal adjective) must also be plural. Just as the plural form of "it" is "they", the plural form of "its" is "theirs" or "their" depending on where it is placed in a sentence. Here, since "it" refers to the subject "trees" while at the same time qualifying "leaves" the sentence should read, "Trees drop their leaves in autumn."
7. (3) Here the problem is the same as in Q. No. 6. It should be "their dolls", since in the sentence "its" is referring to the subject which is "girls" and acting as an adjective of "dolls".
8. (2) "It" and "its" relate to nouns which are neuter. "Its" is not used for masculine or feminine nouns. The plural form of "its" or "it", *i.e.* "their", "theirs" or "they" are used for all the three genders as we have noticed in sentences 6 and 7. But in this sentence "He" is singular and masculine. The possessive form should also be masculine. The sentence should therefore be "He ducked his head when the ball went by." If instead of "He" there was "She", then the possessive form would be "her head".
9. (1) In the earlier three sentences we have seen the different ways "it" and "its" can be used. In sentence 8, this is also pointed out that "its" is normally not used for a masculine or feminine noun. But that is mostly when "its" is used as an adjective. There is a big difference between "it", "its" and "it's". "It" when used as a pronoun, can replace nouns of any gender, depending on the context, *e.g.* "It was the cat", "it was John", "it was Mary". Therefore in this sentence, "it" has been correctly used. The fault lies in the use of "him".

Remember this chart:

		Subject	Object
Singular	1st person	I	me
	2nd person	you	you
	3rd person	he/she/it	him/her/it
Plural	1st person	we	us
	2nd person	you	you
	3rd person	they	them

In the sentence, "It is him" forms the subject. Therefore "him" should be changed to "he" and the sentence should read, "It is he who takes the decisions." The use of "it" in such a form is to stress or emphasise on the person than on the decision.

10. (3) The word "thought" suggests past tense. Here "will" is in the present "tense". Its past tense is "would".

Therefore, the sentence should read, "I never thought that he would do this." "Would" is here used as a modal auxiliary expression.

11. (2) "Easily" is an adverb and an adverb modifies a verb or another adverb. Here "easily" is qualifying "it". The adjective form of "ease" is "easy". The sentence should read, "He found it easy to balance on the bike."
12. (1) Here "gears" is plural. Therefore, the plural form of "was" i.e. "were" should be used. Alternatively, if "was" is left unchanged, then "gears" should be changed to its singular form i.e. "gear".
13. (4) This needs a little technical knowledge. Depending on the type of road and speed, a car moves on a particular gear, like first gear, second gear and so on. It does not move on all the gears at the same time. Therefore "gears" should be changed to "gear". "The car could not climb the steep hill because it was in the wrong gear."
14. (1) "Came" in (4) shows that the event has occurred in the past. Therefore "remain" must be changed to the past tense i.e. "remained".
15. (2) The past, present and future tense of "sing" is sang, sing, will sing. "Can" is present third person singular. Therefore, sang must be changed to the present tense: "Sobia can sing all through the night".
16. (2) The past, present and future forms of "go" are

	Past	Present	Future
1st person	We/I went	We/I go	We/I will go
Perfect	We/I had gone	We/I have gone	We/I will have gone
2nd person	you went	you go	you will go
Perfect	you had gone	you have gone	you will have gone
3rd person	He/They went	He goes/ They go	He/They will go
Perfect	He/They had gone	He has gone/They have gone	He/They will have gone

17. (5) "Watch" and "see" are somewhat similar in meaning though the meanings will differ depending on the context. In this sentence the use of the word "see" is perfectly acceptable in the same way "watch" is acceptable in the previous sentence. However, note the difference in meaning between "see" and "watch" in these sentences --- "He saw that the tiger was watching him." "The blind man saw the sense in the argument."
18. (5)
19. (3) "Across" is an adverb. It must therefore modify a verb or another adverb. Since there is no verb in the sentence, the problem can be remedied by inserting "go" before "across". Alternatively "across" can be converted into a verb "cross". The phrase can therefore be corrected to read "to cross the road", or "to go across the road". Other verbs like "walk" or "run" will do equally well.
20. (5) "Across" is modifying the infinitive "to get". Here "to get across" means "to communicate" or "make clear" or "transact".
21. (4) "People" can be safely deleted since in the sentence "the poor" and "the rich" imply the class of people. This is another example of a balancing sentence where "poor" balance "rich".
22. (4) This is again a balancing sentence and "people" needs to be omitted.
23. (2) "Rich men" implies "all or most rich men". It is a fact that they worry about their black money all the time. Therefore "worried" should be changed from the past tense to the present tense. The sentence should read "Rich men worry about their black money."
24. (4) The Urdu "Aap Ki Tareef" is generally translated as "good name". In English this is not done. "Name" itself means the "proper name". "Nickname" means the more familiar form of the proper name. "Shoaib Akhtar" might be the name of a person. "Shabi" might be his "nickname", the name people may use who know him well. In English "Dick" is the nickname for "Richard", "Tom" is the nickname for "Thomas", "Cathy" is the nickname for the "Catherine". Never use the phrase "good name" since "name" is sufficient.
25. (2) "Keeping" is a noun, which is the act of one who keeps. It is all right to say, "He has been keeping a mistress/dog". Idiomatic English demands "enjoying" to be associated with health. The sentence should therefore read, "He has been enjoying good health."

Explanatory Answer

26. (2) "Every year" shows that it is a recurring event. The verb should be therefore, in the simple present tense. "the Pakistan Independence's Day falls on 14th August every year." In fact, "every year" is unnecessary, since "falls on 14th August" suggests that.
27. (4) "was looking" means that the action has already occurred. "Tomorrow" cannot be in the past. Substitute "tomorrow" with "yesterday".
28. (4) Again, it is a tense problem. Change "am" to "was".
29. (4) "Will stop" suggests future. Therefore change "entered" to "enters". If you want to retain "entered", then change "will stop" to "stop". But always remember to point out that section as defective where the minimum change will set right the sentence. Here, the section where the minimum change will set right the sentence is (4).
30. (3) "Their" is plural, "book" is singular, "does not have" also agrees with the singular nature of the book. Therefore change "their" to "its". "The book does not have its cover".
31. (2) Should be "are playing" since "are" suggests continued action and "played" is in the past tense. However, with a verb like "go", "are" can be put with its past form, e.g. "The children are gone with their dolls". While such a sentence may be acceptable in informal English, the more formal and grammatically correct sentence would be: "The children have gone with their dolls".
32. (2) "Went by" suggests the past. "Jumps" should therefore be changed to "Jumped".
33. (4) "Him" is the objective form of "he". In the second part of the sentence (which is similar in structure to the first part), "I" should be changed to its objective form which is "me". "He who takes him, also takes me."

34. (5) "That he would do this" suggests the past since "would" is the past form of "will". But "would" can also be used to refer to the future: "I wish that he would do this." But with "felt" the use of "would" in this manner is a little tricky. It is safer to write "I always felt that he would do this." This suggests that the feeling and the act of doing are in the past. However, "I always feel that he would/with do this" is acceptable to most grammarians.
35. (4) The first "were" in (2) is plural and agrees with the plural "lights". But the second "were" in (4) must agree with "electricity" which is singular. Therefore, the sentence should read "The lights were out because there was no electricity." In order to understand why "was" should be the substitute, the latter part of the sentence can be rephrased thus: "electricity was not available".
36. (3) This is a question of idiom. One "drives" a car, therefore "he drove up the hill in his car". One "rides" a motorcycle, therefore, "he rode up the hill on his motorcycle". A "motorcar" can "motor up the hill", or "drive up the hill," but a motorcycle can "ride up the hill". The sentence should therefore be, "The motorcycle could not ride/climb up the hill today."
37. (2) "Will remain".
38. (3) "Than" suggests comparison. Therefore change "warm" to warmer".
39. (4) Though "Sonia" is feminine and "pea-hen" is feminine, the idiomatic link of "vanity" is always with a "peacock" irrespective of whether the subject is a male or a female. Hence, "Sonia was as vain as a peacock."
40. (4) In idiomatic English it is always "to within an inch of his death", since he is at present alive but barely so.
41. (2) "Always" in (1) and "is" in (4) suggest the present tense. Therefore change "remembered" to present tense: "I always remember that life is like this."
42. (2) "He does not wish for any profit". The preposition "for" is essential. Similarly, "He asked for some food," and not. "He asked some food". But you can write. "He does not wish anybody good luck."
43. (4) "He has no place to live in". The preposition "in" is important in such a sentence structure. But note that it is correct to say, "He has no right to live." Here "live" has got a different meaning.
44. (1) or (2). "Umar likes to swim". "The Umar like to swim."
45. (3) "For a long time". If the sentence had ended with "last year" or "1981" or any other specific date in the past, then "since" will be the right word to use, e.g. "Tom has been keeping the dog since last year."
46. (4) This is a balancing sentence. The first portion must match with the second portion. The sentence should therefore be, "The more he worked, the less he slept".
47. (3) "It was a long day's journey to Karachi". Here "Journey means "trip". Journeying" means the act of making a trip.
48. (4) Again it is an idiomatic problem. "Man" in (3) means mankind in general. Mankind in general are inhuman to mankind in general. The sentence should be, "It's sad to see every day, man's inhumanity to man."
49. (4) "Some" and "most" are plural. "Marks" which is singular in the third person, should be changed to third person plural that is "mark". "While some surge forward, most mark time." "Mark time" here means "stay at the same place" or "do not do anything."
50. (5) These two sets of sentences should have provided you with a working knowledge of basic grammatical structures and an insight into what is called "idiomatic" English. Idiomatic English may not necessarily be grammatically correct English, but is rather the English which has come to stay because of frequent and accepted use. The next set sentences will lay greater stress on idioms though grammar will also be kept in mind.

 Q. 74. I will be (1)/ grateful (2)/ if you can do (3)/ the needful (4).
 Q. 75. None of (1)/ these three (2)/ apples (3)/ is good (4).

Explanatory Answer

51. (3) "Youngman" should be written as two separate words, "young man".
 52. (2) "I have been doing." This intention is to show that the job which has had its beginning in the past is being continued in the present time and will probably continue in future.
 53. (2) "Welcome address" is a typical example of Pakistani English. It should be "address of welcome." Similarly, never say "soda bottle" when you are really meaning a "bottle of soda". "Soda bottle" means the empty bottle which contained soda.
 54. (3) "No, I have nothing to say". Similarly, if someone says, "I hope you have no objections", do not reply, "Yes, I have no objections". You should say, "No, I have no objections" or "Yes, I have some objections."
 55. (2) "The bunch of keys". Avoid inverted contractions.
 56. (1) Again this is a bad contraction. It should be, "The members of my family are....."
 57. (2) Should be "There are no ladies / women in his family."
 58. (4) "Always returns home", or "always returns to his residence". Note the difference between "home" and "house" in this sentence. "The house that Jack built may soon become his home for the plans to live in it."
 59. (2) A large number of houses are"
 60. (1) "The monthly rent" When you buy something you pay its price. When you hire for use, you pay rent.
 61. (2) "Karim never paid any attention...." Also this sentence: Close attention is being paid to present movements in the money market.
 62. (3) "Ring him up tomorrow".
 Also, as a play starts, sometimes the curtain is "rung up", and when it ends, it is "rung down". In the olden days when a play began the curtain was drawn aside or up to the sound of a whistle or a bell. The same signal was used when the play ended. But "up" is not used in this sort of a sentence: "Please give me a ring/buzz tomorrow and I'll give you the details."
 63. (2) "He does not know how to play...." "I do not know how to play it", "I'll show you how, since I know how to play it."
 64. (1) "I enjoyed myself....." "He enjoyed the king's bounty for three years." "He was enjoying himself while the others were looking bored."
 65. (4) "He suggested this to me". Some people also say "He suggested me this". This is also wrong. In the same way, you should say "He said this to me," and not, "He said me this."
 66. (4) ".....the summer vacation". The plural form of "vacation" should not be used in such a sentence.
 67. (3) "..... the rest of his life in Lahore". Similarly "I have decided to spend the rest of my life in Lahore."
 68. (3) ".....within three hours." But note, "Students should finish writing before the time is up".
 69. (4) ".....the haves and the have-nots."

70. (1) "You can look up....." Also, "Please look up in the directory the number that you want." "Look down" suggests embarrassment. "Rehana looked down in embarrassment for she could not bear the intense gaze of the young man."
 "Look down your nose" suggests looking at someone in a superior, condescending way: "Don't look down your nose at the fat women for you may soon become like her." "Look down on/upon" also has a very similar meaning: "One should never look down upon one's servants since they too are human beings."
71. (2) "He asked me why I had called him a liar." Similarly "Azam wanted to know why I had rung him up last evening", or "He wanted to know if I had thought that he was a rogue."
72. (4) "He suggested these clothes to me". See 65.
73. (2) "the car was parked in the shade" But this is also correct: "The car was parked under the tree". Unlike the branches of the tree which can be above the car, the shade is not above the car. Rather, the car is in the shade of the building, *i.e.* the shadow created by the height of the building.
74. (4) "If you do what is needed to be done." This disgraceful use of "needful" we have inherited from the British Raj and the sooner we stop using it better.
75. (5) "Is good" is related to "None" and "none" means "not one." In other words the sentence implies that "not one apple is good, though there are three apples there."
 If you have carefully studied the seventy-five sentences and understood the comments on them, you have probably become aware of the numerous grammatical and idiomatic mistakes we make everyday. While the errors pointed out in these sentences are not exhaustive, but are merely the tip of the iceberg of errors all of us commit while using the English language, they will probably help you in overcoming some of the common mistakes. Remember, a sentence should not only make sense to you, but it should also convey the same sense to others. Good English is not what a man on a street in London might speak. In fact, many of us speak a more grammatically correct English than an average Britisher. The aim of these exercises is to promote an English which is internationally acceptable. Now let us go through the last set of sentences which may be slightly more difficult, but I hope, more enlightening.

Explanatory Answer

76. (1) "The purpose.....". Get yourself familiar with the use of the definite article "the" and the indefinite articles "a" and "an".
77. (2) "A piece of urgent business.....", or "Some urgent business...."
78. (1) "The road to". "Streets" are pathways for vehicles as well as pedestrians, located in towns and cities. "Lanes" are narrow streets which are generally in rural areas but are also found in cities. "Roads" are generally highways connecting cities, towns and villages.
79. (3) "The topic of my article is Prostitution". Sentences like these are also correct: (a) My article is on prostitution. (b) My article deals with prostitution. (c) "Prostitution" is what my article mainly deals with. (d) My article also deals with problems regarding prostitution.
80. (1) "But does nothing" suggest simple present. Therefore "complain" should be "complains".
81. (5) But please note: you give or deliver a sermon/lecture. You recite a poem. You sing a song. you hum a tune.
82. (2) "Tells/utters" Remember, normally you speak the truth and utter a lie. "Utter the truth" is not normal.
83. (2) "I have to get my hair-cut before.....", or "I have to get myself a hair-cut before...."
84. (3) "..... to wash his hands". Similarly, "He took out the iron to press his clothes". (and not for "pressing his clothes").
85. (1) "There is no place in this train".
86. (5) Since the instructions to the exercises say that punctuation errors may be ignored, this sentence may be considered correct. But if punctuation marks are given their due importance then the sentence is defective in (4) or (3); "good for nothing" should be hyphenated and written "good-for-nothing", the meaning of a good-for-nothing is quite different from the meaning of "good for nothing." Therefore, the hyphens are important in order to keep the sentence grammatically correct. If the hyphens are not inserted, then "a" will have to be removed from the sentence in order to make it grammatically correct.
87. (4) ".....postscript to this letter."
88. (2) "..... a box of matches". A match-box is the box which normally contains matches. But a match-box may well be empty.
89. (2) "..... us" is plural. Therefore "sacrificers".
90. (4) of "sardines". Plural. They are a type of small fish and many of them are sold closely packed in tins.
91. (5) "with open arms" implies a warm welcome. The sentence, being in the present tense, suggests that she is always welcome. This expression does not however, have an English origin. It smacks of eastern culture and its tradition of welcome and seems to be gaining currency in the English speaking world.
92. (3) "but it was all in vain". The sentence suggests that "all our waiting was in vain."
93. (5) This "under Mr. Akram Choudhary" might sound odd. But it is correct idiomatic English and implies that the person will work under the authority or guidance or orders of Mr. A.
94. (4) "under his nose", is the idiomatic expression.
95. (4) "..... than to say too much."
96. (4) "..... than I did at his age." This means ".....than I did when I was his age."
97. (2) "It is as easy as falling off....."
98. (3) "Neither of them is coming."
99. (4) "..... he comes or not." This means, ".....whether he comes or does not come."
100. (5) "Gentle" means polite, refined, well bred. Nowadays the word is mostly used sarcastically when someone puts up an air of sophistication.

IDIOMS & PHRASES

Idioms and phrases are recognized through experience. Sometimes ordinary words fail to embody the experience or catch the spirit of the special situation. Idioms and phrases are meant for such situations; they enrich a language. Thus, in order to have a native's command over English, it is necessary to understand idioms. The *Oxford Dictionary of Current Idiomatic English* defines an idiom by calling it as a combination of two or more words which function as a unit of meaning as opposed to non idiomatic expressions which are made up of distinct meaningful parts". Thus, often, the unit of meaning is different from what the words actually suggest. For example, the expression 'blue blood' does not mean that blood is blue, but it means to belong to a royal family. Similarly, the 'apple of discord' does not imply any real apple; it means 'a cause of quarrel' or 'Pandora's box' means a cause of several problems and does not imply any real box though it has an association with the box of Pandora. The experience comes out in an idiom in a standardized form.

Sentence Structure

Sentence improvement is a variation of spotting errors. In a spotting error test, you are required just to locate the error and tick it, whereas in the sentence improvement test, you have to locate the error and also find the correct answer from among the alternatives given.

Examples Taken From Previous Examination Paper:

Look at the italicized part of each sentence. Below each sentence are given three possible substitutions for the italicized part. If one of them (a), (b) or (c) is better than the italicized part, indicate your response against the corresponding letter (a), (b), (c). If none of the substitution improves the sentence, indicate (d) as your response.

1. They are *waiting* for her since morning.

- (A) Have been waiting
- (B) Were waiting
- (C) Wait
- (D) No improvement

The error is in the tense pattern and the correct answer is (a), 'have been waiting' because the sentence shows a continuous sense.

2. *Hardly* had he entered the police station *when* the SHO began to beat him.

- (A) Than
- (B) Before
- (C) Since
- (D) No correction

Hardly is followed by *when*. Thus here is no error. The answer therefore is (D).

In fact, these types of questions have been designed to test your knowledge of the following:

- (i) Rules of grammar and composition.
- (ii) Usage of the different parts of speech.
- (iii) Idioms and phrases.
- (iv) An overall sense of language.

Let us take a few examples from the questions of some competitive examinations to illustrate our point.

1. *If you would have seen* the movie, you would have enjoyed it.

- (A) Had you been seen
- (B) If you have had seen
- (C) If you would see
- (D) No correction required

The answer is (c), 'had you seen'. The error here lies in the tense sequence. According to the rules of grammar, when there are two actions of past probability, one dependent on the other, the sequence should be as follows: past perfect + future perfect; Had + past participle + would + have +

1 2 3 4
past participle
5

Thus the correct form of the sentence in the example will be:

Had you *seen* the movie, you *would*
1 2 3
have enjoyed it.
4 5

2. The greater the demand, *higher* the price.

- (A) High
- (B) The high
- (C) The higher
- (D) No improvement

The error here is in the use of the definite article *the*. When two *comparative degrees* are used in a sentence for proportion, *the* is used before both of them. Here, the two comparative degrees are *greater* and *higher* and thus *the* should be used before *higher* also. The answer therefore is (c).

3. He is *extraordinarily clever at mimicking* his friends.

- (A) Clever for mimicking
- (B) Clever in mimicking
- (C) Clever to mimic
- (D) No improvement

Here the error is in the use of preposition. The correct answer is (b), clever in mimicking.

4. He told us the story *in a nutshell*.

- (A) In the nutshell
- (B) Putting it in a nut
- (C) In nutshell
- (D) No improvement

He the answer is (d), no improvement. The correct phrase is *in a nutshell* and thus the answer is (d), no improvement.

Students are therefore advised to brush up their grammar and carefully go through the rules explained in the chapter on spotting errors.

ILLUSTRATION

◆ From Previous Papers.

1. The facts *attributed* to my report in your paper are wrong.

- (A) Attributing towards
- (B) Attributed against
- (C) Attribute for
- (D) Attributed at
- (E) No correction required

There, there is an error in use of the preposition. The answer is (b).

2. The disparity between the urban and rural *area has widen* in the last decade.

- (A) Areas has widened
- (B) Area have widen
- (C) Area has widened
- (D) Area have widened
- (E) No correction required

The answer is (a). 'Urban' and 'rural' are linked by 'and'. Thus, the noun has to be in plural. Hence, it will be 'areas'. Another rule of grammar operative here is that there must be an accord between the subject and the verb. 'Has' is the verb for the subject, which is singular. Therefore, the verb will remain *has*.

3. They told me that they *were already sold out* all their belongings.

- (A) Has sold already
- (B) Had already sold
- (C) Were already selling
- (D) Have already been sold
- (E) No correction required

4. He says he doesn't recollect *have seen* me before.

- (A) He has seen
- (B) Have been seen
- (C) Having seen
- (D) That has seen
- (E) No correction required

The answer is (c). The correct form is 'having seen' in this sentence.

5. *What does it matter most* is the quality of the deeds that we perform.

- (A) What it matters more
- (B) What does it matter more
- (C) What matters it most
- (D) What matters most
- (E) No correction required

The correct expression is 'what matters most'. The right answer therefore is (d).

Completing the Sentences

Strategies for the Sentence

Completion Section:

The Sentence Completion section of the Verbal Test is most obviously designed to measure your knowledge of college-level vocabulary. Although vocabulary building books are available, the best way to develop a good working vocabulary is to read. Reading a variety of authors in a variety of genres will help you develop not only a good vocabulary but will help you understand the structure of sentences, which in turn will help you comprehend not only what you are reading, but the subtleties hidden to surface readers. Obviously, the more widely read you are, the better you will score on the Verbal Test. Notwithstanding, some clues will help improve your scores when you learn to identify them and how to use them to your advantage. Clues and techniques specifically designed for the Sentence Completion portion will be presented throughout this section and in the answers and explanations sections.

This section tests your ability to understand the composition of a sentence and select the correct word or two words that best complete and complement the overall meaning of the sentence, while retaining the structure and style. Although the sentences generally will be about familiar topics, you need not necessarily know the definitions of all words to correctly answer these questions. In some ways, this section is a warm up, if you will, to the reading passage questions. The Sentence Completion section will front-load your brain with a variety of sentence structures and styles you may well see in the Reading Comprehension sections. The College Board tells us that instructions for the Sentence Completion section of the Verbal Test will be something like the following: Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five words or sets of words labelled A through E. Choose the word or set of words that, when inserted in the sentence, *best* fits the meaning of the sentence as a whole. Before looking at a sample set of questions, let's make sure that we understand the instructions. By asking that we choose the word or set of words that "best" fit the meaning of the sentence, we are being warned that there may be more than one word or set of words that actually fit the meaning of the sentence. In other words, do not select the first word or set of words that make sense when inserted into the sentence. Rather, read all answer choices, marking out the ones that do not fit, and then select the one that *best* fits the meaning of the sentence "as a whole." Although

STEPS FOR SOLVING

Sentence Completion Questions

Follow the following steps to solve the sentence completion questions:

1. First of all, read the entire sentence carefully. This will help you to understand the meaning of the given sentence.
2. Before looking at the choices, think of the missing word or words you would insert.
3. Think of word or words that make sense and look for synonyms of them.
4. Look for signal words like although, however, despite, rather than, but, etc, that connect contrasting ideas.
5. Look for signal words like and, in other words, and therefore that often connect similar ideas or lead to definitions of missing words.
6. Watch the contrast between positive, negative and neutral words.
7. Negative words can change the direction of the sentence, sometimes making the logic of the sentence difficult to follow.
8. Now look at all the possible answers before you make your final choice.
9. If a choice matches your guess, mark it and move on.
10. If you do not find your guess there, test the choices to find the one that works best.
11. Questions with two words missing should be attempted one word at a time.
12. Sometimes the first blank works but sometimes it is more efficient to work from the second blank first.
13. If you are stumped, quick read and plug each answer choice into the blank and which sounds best, mark it.
14. In the end, always read your answer into the sentence to make sure that it makes sense.
15. Use your knowledge and experience of word parts and parts of speech to seek the meanings of unfamiliar words.

this may seem rather rudimentary, the subtleties of tone, mood, and direction within word choices will test the skills of every individual taking the test. Being familiar with these instructions will help you save time on the day of testing. Remember, your focus is to score as many correct answers as possible. Using the following strategies will help you save time, thereby providing you with the opportunity to answer more questions correctly.

Context-Based Questions

The Verbal Test Sentence Completion section can be broken down into two basic subsets: questions using vocabulary in context and questions that are logic-based. Although knowing the definition of the words in the answer choices gives you a better chance of selecting the correct answer, knowing how the words are used in the context of the sentence will help with in-context questions. This subset includes both one-blank and two-blank questions.

1. Male and female loons tend to act ____, actively helping each other forage for food to feed their young.
- A. aggressively B. surreptitiously C. cooperatively
D. defensively E. erratically

The correct choice is C.

Explanation: The sentence question is actually asking how loons behave. The missing word is further defined after the comma and suggests that loons are seen "actively helping each other forage for food to feed their young." Only one word among the choices describes this behavior: *cooperatively*.

2. My grandmother, who never spent a dime and rarely talked, was considered both ____ and ____.
- A. miserly... taciturn B. frugal... effusive
C. stingy... garrulous D. thrifty... raucous
E. munificent... reticent

The correct choice is A.

Explanation: Quite simply, you are to find the two words that describe my grandmother. One of the words must mean that she did not spend money willingly, and the other must mean that she did not talk much. The correct answer is "miserly... taciturn." Miserly means like a miser or extremely stingy, and taciturn means shy or unwilling to engage in conversation. Note that Choices A through D might meet the first blank criteria of not spending money easily, but only Choices A and E meet the criteria for being silent. As answer Choice A is the only choice meeting the demands of both context-based definitions, it is the correct answer.

Logic-Based Questions

Logic-based questions require you to know the meanings of the words, how the words are used in context, and understand the logical flow of the sentence. This subset also includes both one-blank and two-blank questions.

1. After witnessing a number of territorial skirmishes, Dr. Jarmen had to change his earlier opinion that these particular breeds of chipmunk were always ____ animals.
- A. curious B. harsh C. quarreling
D. peaceful E. warring

The correct choice is D.

Explanation: Following the logical flow of the sentence will help alleviate incorrect answer choices. First, the introductory word "After" informs the reader that the information at the beginning of the sentence is going to impact what comes later in the thought or logical process. The word "change" informs the reader that there is a different thought or reaction than that previously described in the sentence. Events described in the beginning of the sentence are seen as the catalyst for the change, whatever it might be. Finally, the logic of the flow of ideas tells the reader what is changing, "... his earlier opinion that these particular breeds of chipmunk were always ____ animals." The word that best fits the blank necessarily should convey a meaning of revision after seeing the animals fighting. Answer Choice D, peaceful, is the only plausible selection.

2. Although teasers for the film were absolutely _____, the film itself was well presented, well timed, and represented a rather _____ work.
- | | |
|-----------------------------|-------------------------------|
| A. scintillating. . . blasé | B. tasteless. . . amateur |
| C. risqué. . . bawdy | D. breathtaking. . . familiar |
| E. crude. . . polished | |

The correct choice is E.

Explanation: The introductory word "Although" in the first clause informs the reader that the tone in the second clause will be dichotomous to the first. This means that we are looking for basic antonyms in our correct choice. Answer Choices A, D, and E all qualify for a difference in tone. Additionally, however, the second word must complement the tone of well presented and well timed. In this case, looking at the second word choice actually leaves us with the only correct choice, E.

SENTENCE COMPLETION REVIEW QUESTIONS

Sentence Completion Skill Set One:

Note: Unlike the actual Verbal Test, these questions are not arranged from easiest to hardest.

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five words or sets of words labelled A through E. Choose the word or set of words that, when inserted in the sentence, *best* fits the meaning of the sentence as a whole.

1. Football players, generally known for their elevated testosterone levels, would see crying as _____ unmanly rather than a humanistic trait _____ by either sex.

8. He acted with great ____, as if he were a diplomat without regard for crimination.
 A. emotion B. restraint C. concern D. innocuous E. enigmatic
9. As I was describing my encounter with the alien, he had the most ____stare, as if he didn't believe a word I was saying.
 A. amazing B. dumbfounded C. incredulous✓ D. blank E. obdurate
10. The ____of horns heard while gridlocked at the traffic jam was as discordant as an untamed orchestral performance.
 A. blaring B. harmonic C. sequencing D. cacophony E. syncopated

Answers and Explanations for Skill Set One:

1. The correct choice is B.

Explanation: Although Choice A, "sickeningly" may work in the first blank, to prevent an occurrence, or thwart, an action does not fit the second. Choice C, "inexplicably," might also fit the first blank, but crying is not typically something the testosterone-laden player would enjoy. Choices D and E, "intentionally" and "plausibly" don't fit the first blank and may be eliminated. This leaves Choice B, "inherently," or essentially or intrinsically unmanly rather than a trait "experienced" by either sex.

2. The correct choice is C.

Explanation: The word "Despite" is the clue word in this sentence. It indicates that there is a contrast between the two parts of the sentence. The pair of words should necessarily be dichotomous or nearly opposites. As Choice C is the only pair with such a relationship, it should be the obvious answer.

3. The correct choice is E.

Explanation: The phrase that is the clue here is "that is." This phrase tells you that there is an explanation coming to reason what has been previously stated. In this case, we know that the majority of the villagers are vegetarians and that what is about to follow will help explain or give reason for that fact. We are then told that the primary reason they are vegetarians is that meat is very high priced, and they are poor so they can afford to eat meat only infrequently. Choice A suggests that they chose at will whether to be abstaining from meat as "sometimes" indicates a selection process controlled by the selector rather than conditions outside their control. Choices C and D, "staunch" and "adamant" indicate a choice of determination to be vegetarian. We are told, however, that they eat meat when they can afford to buy it or for ceremonial purposes. Choice B, "clandestine" indicates a secretive vegetarianism and since we know they eat meat during holy celebrations, this choice cannot be true. This leaves choice E, "reluctant," as they eat meat during holy celebrations or "whenever" they can afford it.

4. The correct choice is D.

Explanation: The clue given in this sentence is that the lecture hall is dealing with the volume of people it can contain. Further, the second blank must indicate a degree of increase of the first blank and be synonymous with it. Choice E is an antonym and, therefore, excluded. Although Choice B seems plausible, "bodacious" means something notable. Although "monumental" would seem to represent a degree of increase from notable, this is not the "best" selection to describe the size of the hall. Choices A and C both represent a degree of design or architecture rather than size and may be disqualified. Choice D, "commodious" and "enormous," indicate suitable capacity and the ability to hold a large quantity.

5. The correct choice is A.

Explanation: Choices B and E include "foster" and "support," which cannot apply as the clue regarding a conflict between the decision and the secretary's basic beliefs are incongruent. Choice C is effectively impossible as one cannot secretly acknowledge. Choice D suggests the secretary would do something malicious, which is at odds with her character and morals indicated in the sentence. Choice A satisfies the condition of how she would go along with the decision, "grudgingly."

6. The correct choice is B.

Explanation: As catching a lot of fish is generally the purpose of going fishing, the sentence would indicate that this was not the case on the day in question. Therefore, we are looking for a word choice that indicates some explanation for not catching fish. Answer Choice B, "overrated," would indicate that while the expectation was that this location would be good fishing, something was amiss.

7. The correct choice is B.

Explanation: The clue here is in the phrase that states he should not have strayed from the subject of his speech. The best word is Choice B, "digressive."

8. The correct choice is E.

Explanation: The clue phrase here is, ". . . as if he were a diplomat without regard for crimination." This indicates that the actions needed to best fit the blank represent a disregard for the laws or rules of proper behavior. In this regard, Choice E, "disdain," best represents the actions akin to a disregard for laws or rules.

9. The correct choice is C.

Explanation: We are looking for a word that would indicate disbelief. We also know that we are looking for an adjective. Don't let a word like obdurate throw you. Although the listener might indeed be stubborn in his willingness to believe the story being told, the sentence clues still call for disbelief. Therefore, Choice C, "incredulous," or skeptical and showing disbelief is correct.

10. The correct choice is D.

Explanation: The clue phrase, ". . . was as discordant as . . ." indicates we are looking for a synonym to discordant. As Choice B, "harmonic," indicates pleasing tones musically aligned, it must be eliminated. Choices A, C, and E, "blaring," "sequencing," and "syncopated" or volume and timing have nothing to do with discordance and should likewise all be eliminated. Only answer Choice D, "cacophony," indicates discordant, displeasing sounds.

Sentence Completion Skill Set Two:

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five words or sets of words labelled A through E. Choose the word or set of words that, when inserted in the sentence, *best* fits the meaning of the sentence as a whole.

Answers and Explanations for Skill Set Two:

1. The correct choice is A.

Explanation: The sentence indicates that all persons felt basically the same way as the sister suffering the loss of her brother. We must look for a synonym in order to fit both blanks. Answer Choice E, "displaced. . . focused" reflect almost opposite states and should be immediately eliminated. Although Choice D seems plausible as "determined. . . committed" appear to be synonymous, they do not best fit the mood or tone of the sentence. Answer Choice B, "reprehensible. . . enigmatic" can be eliminated because if her demeanor was in fact "reprehensible," then it would not be understandable. Answer Choice C is another antonym leaving Choice A, "lachrymose. . . dolorous" indicating a tearful demeanor and most of us being sorrowful.

2. The correct choice is B.

Explanation: We are looking for the second blank to offer some continuation of a writing style that complements "twists and turns and surprises." Given this element, the first blank must indicate the type of mystery wherein the style would be found. As "foreshadowing" allows the reader to predict future events, Choice A could be discounted. Choice C, "characters" does not match the second blank looking for a continuation of styles and should be eliminated. Choices D and E, "reversals" and "clever redirections" look plausible, and we must look at the first blank to further determine viability. An "obvious" mystery or an "easily understood" mystery do not attend to twists, turns, and surprises and can be stricken. This leaves Choice B, "knotty. . . nuances." Knotty means complex or difficult to solve and, indeed, this matches the styles having twists, turns, and surprises. The complement to these styles is "nuances" or subtleties that are difficult to predict.

3. The correct choice is C.

Explanation: As the examples represent what is believed to be the societal reflection of evil, then we are looking for a word that suggests he represents that classical example. Answer Choice C, "epitome" correctly indicates that he is the representative example of evil, given his actions.

4. The correct choice is D.

Explanation: If, in fact, Douglass did pattern his autobiography after something, it would likely be another form of literature lending itself to this endeavor. Choices A, B, and E, "notations" "diary" and "accomplishments" do not lend themselves readily to be patterned as an autobiography. Choices C and D, "writings" and "narrative" appear plausible so we must look at the first blank to finalize our choice. As Choice C is most unlikely in that Douglass would "accidentally" pattern his autobiography after another leaving choice D, "intentionally. . . narrative."

5. The correct choice is B.

Explanation: Answer Choice A, "enforce" would only serve to keep revenues from being collected. Choice C, "stave" would only serve to alter prohibition or put it off, which does not match as this was a recovery of revenue that could happen only if the revenue was lost by prohibition already having been enacted. Choice D, "modify" would serve only to change but not necessarily recoup revenues. Choice E, "obdurate" is to confuse intentionally and that would not return the revenues. This leaves Choice B, "abrogate" or repeal prohibition, which would allow the sale and collection of revenue from that sale of spirits.

6. The correct choice is C.

Explanation: Although many believe the tax codes are a farce or joke, there seems to be nothing funny about filing taxes and figuring out the rules. Likewise, the tax code may be believed by many to be malfesance on the part of those who wrote the code, but we are looking for a word that better align with incomprehensible in the structure of the code. Although many believe the code to be disastrous, it has nothing to do with nature. This leaves Choice C, "labyrinth" which best describes the complexities that could be better understood with a simple bracket flat tax.

7. The correct choice is A.

Explanation: The partial phrase, ". . . in obvious opposition to the article," alleviates Choices D and E automatically. Choices B and C certainly seem plausible but remember that the Verbal Test reviewers want the "best" answer. As the writer of the editorial in opposition provided facts and was well documented, the writer was clearly trying to reject the original article as unfounded, ergo choice A.

8. The correct choice is E.

Explanation: Here is where the College Board is looking for you to be able to determine the tone and flow of a sentence. This cannot be accomplished by surface reading and is likely not to be within the grasp of someone who is not well read. Remember, the best preparation is to read and read a lot. Read different authors, different genres, written at different periods to best understand how the tone, pace, and flow of a sentence will assist you in determining the best answer choice. Choices A and B, "latent" and "dormant" indicate inaction while the sentence clearly states that there is an evidencing of this knowledge occurring. Choice C, "transcended" has the wrong tense as these years have passed and those with wisdom cannot be currently evidencing knowledge if the years are past. Choice D, "tenacious," is clearly the wrong tone for the sentence. We aren't talking about the leathery skin of the elderly, but rather the time before the setting sun of life wherein those who have experienced life to the fullest may share knowledge that is yet a mystery to younger generations. Choice E, "crepuscular" retains the mood of an evening, or the sun setting on a long life.

9. The correct choice is D.

Explanation: The key word clue here is "but," which announces a change in direction. We need to look for opposites to match this pair of blanks. Although Choice A meets the criteria, they appear to be opposite of what would be expected in the cause of freedom. Choice B, "peaceful" does not lend itself to decisions. Choice C does not offer enough opposition in terms. Choice E, "weak. . . discourse" individually fit within each clause but does not complement both clauses in the sentence. Choice D, "tentative. . . resolution" is the only pair offering both sufficient opposition and complement to both clauses.

10. The correct choice is A.

Explanation: Now is the time for a little common knowledge. Any time a politician and ratings are involved, you simply need to understand that an incumbent wants the best ratings possible. This means that when something good does happen, it is the responsibility of those with vested interests to make sure that the most positive spin possible gets into the media. In this regard, only Choices A and B, "bolster" and "improve" speak to desired ratings. We need to look at the second blank to complete the best selection. Between "accolades" and "talk" clearly, the term "accolades" puts a more positive spin on the accomplishments. Therefore, Choice A is correct.

Detecting The Errors

'Detecting Errors' is one of the most difficult tests of objective English. In this test, sentences are divided into four parts marked as a, b, c and d. The students are required to detect the error, if any, and tick mark the part which has an error. If there is no error in the sentence they should tick mark the part 'e' which means "No Error".

The errors which the students have to detect are errors in the use of nouns, pronouns, adjectives, articles, verbs, tenses, prepositions, adverbs, auxiliaries, conjunctions, etc. There may also be errors due to confusion of words, in the use of proverbs, idioms and phrases or even in the omission of some words.

Directions: In the following sentences, every sentence has been divided into four parts, which are marked a, b, c and d. One of these parts may contain an error. Read each sentence carefully and mark the part which contains the error. In case there is no error in the sentence, the answer is 'e'. The correct answers are given at the end of the chapter.

1. (a) The accused/(b) effected madness/(c) in the court/(d) at the time of trial/(e) No Error.

PERCENT, RATIO AND PROPORTION

Percentage

The term 'percent' literally means "per one hundred". One can conceive of percent as simply a special type of fraction or decimal that involves the number 100. The symbol for percentage is "%".

Example.

"85% of the students like mango ice cream" means that out of every 100 students, 85 like mango ice cream. In

fraction form, this can be written as: $\frac{85}{100}$

Which can be written after simplifying as: $\frac{17}{20}$

In decimal form, we write this as 0.85 or eighty-five hundredths. Remember that the last digit of the percent is in the hundredths place value.

One common error is to mistake 100% for 100. This is not correct. Infact, 100% means $\frac{100}{100}$ or one hundred

hundredths. It means $100\% = \frac{100}{100} = 1$.

Writing Percent as Fraction

The following table is useful to solve basic percentage in the form of fraction.

A PART is some part of the WHOLE.

	Number	Percentage Fraction
Part		
Whole		

$$\frac{\text{Part}}{\text{Whole}} = \frac{\text{Percent}}{100}$$

Example

What is 30% of 90?

In this problem we are given the whole amount an percent, and we are looking for the part. To solve this fill the above the percent table, then we set up a proportion, cross- multiply and solve.

	Number	Percentage Fraction
Part	x	30
Whole	90	100

$$\frac{x}{90} = \frac{30}{100} \Rightarrow x = \frac{30}{100} \times 90 \Rightarrow \boxed{x = 27}$$

Percents as Decimals: Multiplication Shortcut

One way of working with percents is by converting them into decimals. Percents can be converted into decimals by moving the decimal point 2 spaces to the left:

$$635\% = 6.35 \quad 63.5\% = 0.635 \quad 6.35\% = 0.0635 \quad 0.635\% = 0.00635$$

A decimal can be converted into a percentage by moving the decimal point two spaces to the right. For

example:

$0.4 = 40\%$

$0.19 = 19\%$

$0.175 = 17.5\%$

$2.9 = 290\%$

Percent Change vs. Percent of Original

You could have found 20% of \$30 and subtracted it, but it's best to connect percent change problems to the two main equations we've been discussing. Furthermore, in the shirt problem, the step that changed a 20% decrease to 80% of the original may have seemed minor, but it allowed you to do less work and still arrive at the answer.

A percent change can always be rephrased as a percent of the original, and a percent of the original can always be rephrased as a percent change.

Be comfortable switching between the two forms so that you can directly solve for the desired value:

$15\% \text{ increase} = 115\% \text{ of the original} \quad 140\% \text{ of the original} = 40\% \text{ increase}$

$8\% \text{ greater than} = 108\% \text{ of the original} \quad 150\% \text{ of the original} = 50\% \text{ greater than}$

$35\% \text{ decrease} = 65\% \text{ of the original} \quad 55\% \text{ of the original} = 45\% \text{ decrease}$

$35\% \text{ less than} = 65\% \text{ of the original} \quad 45\% \text{ of the original} = 55\% \text{ less than}$

Remember that "increase" is equivalent to "greater than" and "decrease" is equivalent to "less than." Use this conversion to save steps on percent problems. For example:

What number is 40% greater than 70?

40% greater than is the same as 140% of. You can rewrite the question:

What number is 140% of 70?

You can translate this question directly into an equation. In this case, it is easier to translate 140% to 1.4, instead of 140/100:

$$X = 1.4 \times 70$$

$$x = 98$$

You can consistently save time on percent problems by calculating directly for the desired number.

Successive Percents

This is explained in the following example:

If a ticket increased in price by 20%, and then increased again by 5%, by what percent did the ticket price increase in total?

We use the following formula for such problems:

If a number is changed (increase/decrease) successively by $x\%$ and $y\%$ then the net percentage is given by

$$\left(x + y + \frac{xy}{100}\right)\%$$

If x or y indicates decrease in percentage, then put -ve sign before x or y , otherwise +ve sign.

Now we solve the given problem using this formula.

$$\left(20 + 5 + \frac{20 \times 5}{100}\right)\% = \left(25 + \frac{100}{100}\right)\% = 26\%$$

Successive percents *cannot* simply be added together. This holds for successive increases, successive decreases, and for combinations of increases and decreases.

Example:

If the salary of a person is first increased by 25% and thereafter decreased by 22%, what is the net change in the salary?

You can quickly answer this question by using the above formula

$$\left(x + y + \frac{xy}{100}\right)\% = \left(25 - 22 + \frac{(25)(-22)}{100}\right)\%$$

$$= \left(3 - \frac{550}{100}\right)\% = (3 - 5.5)\% = -2.5\%$$

Since the sign is -ve, the salary of the person decreased by 2.5%.

Ratio and Proportion

The *ratio* of the number a to the number b ($b \neq 0$) is $\frac{a}{b}$.
A ratio may be expressed or represented in several ways. For example, the ratio of 2 to 3 can be written as 2 to 3, 2:3, or $\frac{2}{3}$. The order of the terms of a ratio is important. For example, the ratio of the number of months

with exactly 30 days to the number with exactly 31 days is $\frac{4}{7}$, not $\frac{7}{4}$.
In the ratio $a : b$, the two quantities (a and b) are called its terms. The first is called antecedent and the second is called consequent.

A *proportion* is a statement that two ratios are equal; For example, $\frac{2}{3} = \frac{8}{12}$ is a proportion. One way to solve a proportion involving an unknown is to cross multiply, obtaining a new equality. For example, to solve for n in the proportion $\frac{2}{3} = \frac{n}{12}$, cross multiply, obtaining $24 = 3n$; then divide both sides by 3, to get $n = 8$.

Each term of the ratio $\frac{a}{b}$ and $\frac{c}{d}$ is called the proportional. A , b , c , and d are respectively the first, second, third, and fourth proportional.
Here, a , d are known as extremes and b , c are known as means.

Proportions

Simple ratio problems can be solved with a proportion:
The ratio of girls to boys in the class is 7 to 5. If there are 25 boys in the class, how many girls are there?

Step 1: Set up a labeled proportion:

$$\frac{7 \text{ girls}}{5 \text{ boys}} = \frac{x}{25}$$

$$\frac{7}{5} = \frac{x}{25}$$

Step 2: Cross-multiply to solve:

$$7 \times 25 = 5 \times x$$

$$x = 35$$

To save time, you should cancel factors out of proportions before cross-multiplying. You can cancel factors either vertically within a fraction or horizontally across an equals sign:

Types of Ratios

Duplicate Ratio

The ratio of the squares of two numbers is called the duplicate ratio of the two numbers. For example,

$\frac{2^2}{7^2}$ or $\frac{4}{49}$ is called the duplicate ratio of $\frac{2}{7}$

Sub-Duplicate Ratio

The ratio of the square roots of two numbers is called the sub-duplicate ratio of two numbers. For example

$\frac{2}{7}$ is sub-duplicate ratio of $\frac{4}{49}$.

Compound Ratio

The ratio of the product of the antecedents to that of the consequents of two or more given ratios is called the compound ratio. For example,

If $a : b$ and $c : d$ are two ratios, then $ac : bd$ is the compound ratio of the given ratios.

Inverse Ratio

If the antecedent and consequent of a ratio interchange their places, the new ratio is called the inverse ratio of the first. For example,

If $a : b$ be a given ratio then $b : a$ or $\frac{1}{a} : \frac{1}{b}$ is its inverse ratio.

Some Basic Terms of Proportion

Basic Formula

If four quantities are in proportion, then

$$\text{Product of means} = \text{Product of extremes}$$

For example, in the proportion $a : b :: c : d$

$$ad = bc$$

Fourth Proportion

In proportion $a : b :: c : x$, x is called the fourth proportion of a , b and c .

Example:

Find the fourth proportion of the numbers 2, 5, 8.

Solution

Let x be the fourth proportion then

$$a : b :: c : x \text{ or } 2 : 5 :: 8 : x$$

$$2 \times x = 5 \times 8$$

$$x = \frac{5 \times 8}{2} = 5 \times 4 = 20$$

Third Proportional

If $a : b :: b : x$ then x is called the third proportional of a and b .

Example:

Find the third proportional of the numbers 2, 8.

Solution

Let x be the third proportional then

$$a : b :: b : x \text{ or } 2 : 8 :: 8 : x$$

$$2 \times x = 8 \times 8$$

$$x = \frac{8 \times 8}{2} = 8 \times 4 = 32$$

Mean Proportional

If $a : x :: x : b$, then x is called mean or second proportional of a and b .

Example

Find the mean proportional of the numbers 36, 48.

Solution

Let x be the mean proportional then

$$a : x :: x : b \text{ or } 36 : x :: x : 48$$

$$x \times x = 48 \times 36$$

$$x^2 = 36 \times 48$$

$$\Rightarrow x = \sqrt{36 \times 48} = \sqrt{1728}$$

Multiple Choice Questions (MCQs)

1. What number is 60% of 45?
(a) 2.7
(b) 7.5
(c) 18
(d) 27
2. The angles of a triangle have a sum of 180° . If the angles have a ratio of $1 : 2 : 6$, what is the measure of the largest angle?
(a) 20°
(b) 40°
(c) 80°
(d) 120°

3. Which ratio is NOT the same as 45 to 80?
 (a) 9 to 16 (b) 63 to 112
 (c) 99 to 176 (d) 90 to 180
4. The ratio of the angles in $\triangle ABC$ is 2 : 3 : 4. Which one of the following triangles is similar to $\triangle ABC$?
 (a) $\triangle DEF$ has angles in the ratio 4 : 3 : 2.
 (b) $\triangle PQR$ has angles in the ratio 1 : 2 : 3.
 (c) $\triangle LMN$ has angles in the ratio 1 : 1 : 1.
 (d) $\triangle STW$ has sides in the ratio 1 : 1 : 1.
 (e) $\triangle XYZ$ has sides in the ratio 4 : 3 : 2.
5. In what proportion must rice at \$0.8 per pound be mixed with rice at \$0.9 per pound so that the mixture costs \$0.825 per pound?
 (a) 1 : 3 (b) 1 : 2
 (c) 1 : 1 (d) 2 : 1
6. Joseph bought two varieties of rice, costing 5 cents per ounce and 6 cents per ounce each, and mixed them in some ratio. Then he sold the mixture at 7 cents per ounce, making a profit of 20 percent. What was the ratio of the mixture?
 (a) 1 : 10 (b) 1 : 5
 (c) 2 : 7 (d) 3 : 8
7. If $ab = cd$ and a is 25% greater than c , then by what percent is d greater than b ?
 (a) 16.66 (b) 20
 (c) 25 (d) 30
8. The percentage of integers from 1 through 100 whose squares end with the digit 1 is $x\%$, and the percentage of integers from 1 through 200 whose squares end with the digit 1 is $y\%$. Which one of the following is true?
 (a) $x = y$ (b) $x = 2y$
 (c) $x = 4y$ (d) $y = 2x$
9. The *list price* of a commodity is the price after a 20% discount on the retail price. The *festival discount price* on the commodity is the price after a 30% discount on the list price. Customers purchase commodities from stores at a festival discount price. What is the effective discount offered by the stores on the commodity on its retail price?
 (a) 20% (b) 30%
 (c) 44% (d) 50%
10. If $9/100$ of x is 9, then which one of the following is true?
 (a) 25 percent of x is 25 (b) $1/4$ of x is 0.25
 (c) x is 120% of 80 (d) x is 9 percent of 90

Explanatory Answer

Q1. (d) 27

$$60\% \text{ of } 45 = 0.6 \times 45 = 27.0 = 27$$

Q2. (d) 120°

Ratio is: 1 : 2 : 6

$$\text{sum} = 180^\circ$$

$$\Rightarrow n + 2n + 6n = 180$$

$$\Rightarrow 9n = 180$$

$$\Rightarrow n = 20$$

The angles are 20° , 40° , and 120° , so the largest is 120° .

Q3 (d) 90 to 180

$$\frac{45}{80} = \frac{63}{112} = \frac{99}{176} = \frac{108}{192} = \frac{9}{16} \neq \frac{90}{180} = \frac{1}{2}$$

Q4. (a) Two triangles are similar when their corresponding angle ratios or corresponding side ratios are the same.

Name the first triangle ABC and the second triangle DEF . Now, the angle ratio of the first triangle is $\angle A : \angle B : \angle C = 2 : 3 : 4$, and angle ratio for the second triangle is $\angle D : \angle E : \angle F = 4 : 3 : 2$, while the sum of the angles is 180 degrees.

The corresponding ordering ratio can be safely reversed and doing this for the second ratio equation yields $\angle F : \angle E : \angle D = 2 : 3 : 4$, while the sum of the angles is 180 degrees.

Since the angles in triangle ABC equal the corresponding angles in triangle FED , triangles ABC and FED are similar. Hence, the answer is (A).

Q 5. (e) Let 1 pound of the rice of the first type (\$0.8 per pound) be mixed with p pounds of the rice of the second type (\$0.9 per pound). Then the total cost of the $1 + p$ pounds of the rice is

$$(\$0.8 \text{ per pound} \times 1 \text{ pound}) + (\$0.9 \text{ per pound} \times p \text{ pounds}) \\ = 0.8 + 0.9p$$

Hence, the cost of the mixture per pound is

$$\frac{\text{Cost}}{\text{Weight}} = \frac{0.8 + 0.9p}{1 + p}$$

If this equals \$0.825 per pound (given), then we have the equation

$$\frac{0.8 + 0.9p}{1 + p} = 0.825 \quad \frac{0.8 + 0.9p}{1 + p} = 0.825$$

$$0.8 + 0.9p = 0.825(1 + p)$$

$$0.8 + 0.9p = 0.825 + 0.825p$$

$$0.9p - 0.825p = 0.825 - 0.8$$

$$900p - 825p = 825 - 800$$

$$75p = 25$$

$$p = 25/75 = 1/3$$

Hence, the proportion of the two rice types is $1 : 1/3$, which also equals $3 : 1$. Hence, the answer is (E).

Q.6. (b) Let $1 : k$ be the ratio in which Joseph mixed the two types of rice. Then a sample of $(1 + k)$ ounces of the mixture should equal 1 ounce of rice of the first type, and k ounces of rice of the second type. The rice of the first type costs 5 cents an ounce and that of the second type costs 6 cents an ounce. Hence, it cost him

$$(1 \text{ ounce} \times 5 \text{ cents per ounce}) + (k \text{ ounces} \times 6 \text{ cents per ounce}) = 5 + 6k$$

Since he sold the mixture at 7 cents per ounce, he must have sold the net $1 + k$ ounces of the mixture at $7(1 + k)$.

Since he earned 20% profit doing this, $7(1 + k)$ must be 20% more than $5 + 6k$. Hence, we have the equation

$$7(1 + k) = (1 + 20/100)(5 + 6k)$$

$$7 + 7k = (120/100)(5 + 6k)$$

$$7 + 7k = (6/5)(5 + 6k)$$

$$7 + 7k = 6/5 \times 5 + 6/5 \times 6k$$

$$7 + 7k = 6 + 36k/5$$

$$1 = k/5$$

$$k = 5$$

Hence, the required ratio is $1 : k = 1 : 5$. The answer is (B).

Q7. (c) Since a is 25% greater than c , we have $a = (1 + 0.25)c$. Substituting this in the given equation $ab = cd$ yields $[(1 + 0.25)c]b = cd$. Canceling c from both sides yields $(1 + 0.25)b = d$. This

equation indicates that a is 25% greater than b . The answer is (C).

Q8. (a)

The square of an integer ends with the digit 1 only if the integer itself either ends with the digit 1 or with the digit 9. For example, $11^2 = 121$ and $19^2 = 361$. Now, there are ten integers ending with 1 from 1 through 100. The numbers are 1, 11, 21, ..., 91. Also, there are ten integers ending with 9 from 1 through 100. They are 9, 19, 29, ..., 99. Hence, the total number of integers from 1 through 100 whose squares end with the digit 1 is 20. The number 20 is $20/100 \times 100 = 20\%$ of 100. Hence, $x = 20$.

Similarly, there are twenty integers (1, 11, 21, ..., 191) ending with 1, and twenty integers (9, 19, 29, ..., 199) ending with 9. Hence, there are $20 + 20 = 40$ integers ending with 1 or 9. Now, 40 is $40/200 \times 100 = 20\%$ of the total 200 integers from 1 through 200. So, y also equals 20. Since $x = y$, the answer is (A).

Q9. (c) 44%

Let r be the retail price. The list price is the price after a 20% discount on the retail price. Hence, it equals $r(1 - 20/100) = r(1 - 0.2) = 0.8r$.

The festival discount price is the price after a 30% discount on the list price. Hence, the festival discount price equals (list price) $(1 - 30/100) = (0.8r)(1 - 30/100) = (0.8r)(1 - 0.3) = (0.8r)(0.7) = 0.56r$.

Hence, the total discount offered is $(\text{Original Price} - \text{Price after discount})/\text{Original Price} \times 100 = (r - 0.56r)/r \times 100 = 0.44 \times 100 = 44\%$.

The answer is (C).

Q10. (a)

We are given that $9/100$ of x is 9. Now, $9/100$ of x can be expressed as 9% of x . Hence, 9% of x is 9. Hence, 25 percent of x must equal 25. The answer is (A).

Tax

A tax is money collected by a government for its support and for providing services to the populace. Governments use tax money to pay the salaries of government officials and employees. Tax monies run and staff public schools, parks, and playgrounds; build and maintain roads and highways; and provide police and fire protection, health services, unemployment compensation, and numerous other benefits. To meet these many needs, governments have a variety of tax types from which to choose. Among the most common are discussed below:

Sales Tax

The sales tax is probably the first type of tax that most people encounter. Sales taxes are determined by state and local governments. At the time of a purchase, a store collects an extra amount, called a sales tax, and later pays it to the state. In some county or city governments charge a local sales tax in addition to the state sales tax. Many states charge no sales tax on food nor medicine, and some states make other exceptions.

Excise Tax

Excise tax is usually a tax or duty levied on the sale or importation of particular goods. These taxes usually are included in the price to consumers and imposed to raise revenue or to discourage a particular behavior. Most countries impose excise tax on sales of fuel, alcohol, and tobacco to accomplish both aims.

Calculating Sales and Excise Tax

To calculate sales and excise tax, we use percentage. The following method is used to calculate the sales tax and excise tax or duty.

$$\text{Tax (Sales or Excise)} = \text{Purchase Price} \times \text{Tax Rate}$$

Example 1.

A sales tax of 16% is imposed on refrigerator. If the purchased or marked price of the refrigerator is Rs.

36000, calculate the total amount one has to pay, if he purchased it.

Solution

Purchase price or marked price of refrigerator = Rs. 36000

Tax rate = 16%

Sales tax payable = Purchase Price \times Tax Rate

$$= \text{Rs. } 36000 \times 16\%$$

$$= \text{Rs. } \left(36000 \times \frac{16}{100} \right)$$

$$= \text{Rs. } (360 \times 16) = \text{Rs. } 5760$$

The total amount that a seller will receive = Rs. (36000 + 5760) = Rs. 41760

Example 2.

A man purchases a car. He pays 150% excise duty on price of car. If price of car is Rs. 650000 then find the amount that he pays to purchase the car.

Solution.

Price of car = Rs. 650000

Excise Duty = 150%

Sales tax payable = Purchase Price \times Tax Rate

$$= \text{Rs. } 650000 \times 150\%$$

$$= \text{Rs. } \left(650000 \times \frac{150}{100} \right)$$

$$= \text{Rs. } (6500 \times 150) = \text{Rs. } 975000$$

The total amount that he has to pay = Rs. (975000 + 650000) = Rs. 1625000

Property Tax: A property tax is charged on the owner of land, flat, houses or buildings at some standard rates according to the location of the property on the annual value of the property.

Income Tax

Income Tax: Income tax is imposed on the income of a person exceeding a certain limit of income. The rules and rates are amended by the government from time to time.

Gross Income: Gross income means the total income of a person for a year or any fixed period with pay and allowances.

INCOME TAX: Income tax is a direct tax imposed by the government of Pakistan on all the income or earnings (other than agricultural income) of the taxpayer during a year. The income tax rate and method of calculating taxable income varies depending upon the status of the taxpayer, for example, company, individual or association.

EXEMPT INCOME: Exempt income is defined as the income exempted or free from tax and not include in the total income of the taxpayer up to the limit specified by the tax authorities from time to time.

TAXABLE INCOME: Rebate is the amount for which tax is exempted.

Taxable income = net income - rebate

INHERITANCE

The property, cash and other belonging of a deceased person are transferred to his/her inheritors is called inheritance. In Holy Quran the rules for dividing the inheritance are given. Here we shall learn how to apply inheritance. The following points should be observed.

- (i) The payment of loan if any against the deceased.
- (ii) The expenditures involved incurred on his/her funeral.
- (iii) To fulfill his/her will.

Subtracting all these expenditures from the inheritance, the remaining is to be divided among the heirs according to Islamic laws.

Example 5

After his death, Fazal left Rs. 2,90,000. A loan amount to Rs. 58,000 was against him Rs. 15,600 incurred

on his funeral. Among his heirs were a wife, one son and one daughter. After paying loan and funeral expenditures, remaining inheritance was divided among heirs. Wife got $\frac{1}{8}$ of the inheritance and the remaining is divided between the son and daughter in the ratio 2:1. Find the share of each person.

Solution.

$$\begin{aligned} \text{Total inheritance} &= \text{Rs. } 2,90,000 \\ \text{Total loan and funeral expenditure} &= \text{Rs. } 58,000 + \text{Rs. } 15,600 = \text{Rs. } 73,600 \\ \text{Divisible inheritance} &= \text{Rs. } 2,90,000 - \text{Rs. } 73,600 = \text{Rs. } 2,16,400 \\ \text{Share of wife} &= \frac{1}{8} \text{ of divisible inheritance} \\ &= \frac{1}{8} \times 2,16,400 = \text{Rs. } 27,050 \\ \text{Remaining amount} &= \text{Rs. } 2,16,400 - \text{Rs. } 27,050 \\ &= \text{Rs. } 1,89,350 \\ \text{Ratio; Son : Daughter} &= 2 \times 1 : 1 \times 1 \\ &= 2 : 1 \\ \text{Sum of ratios} &= 2 + 1 = 3 \\ \text{Share of Son} &= \frac{2}{3} \times 1,89,350 \\ &= 2 \times 63,116.67 = \text{Rs. } 1,26,233.33 \\ \text{Share of Daughter} &= \frac{1}{3} \times 1,89,350 \\ &= \text{Rs. } 63,116.67 \end{aligned}$$

Calculate the total amount of money a man has to pay for an article marked Rs. 65 with 16% GST.

(a) Rs. 25.20

(b) Rs. 45.28

(c) Rs. 28.42

(d) Rs. 75.40

Explanatory Answer

Q1. (b) 2.5%

Q2. (d) $\frac{1}{8}$

Q3 (c) income tax

Q4. (a) Rs. 29450.65

Total value of the property = 589013

Rate of property tax = 5%

Amount of tax on Rs. 589013 = 5% of Rs. 589013

$$= \frac{5}{100} \times 589013$$

$$= \text{Rs. } 29450.65$$

Q 5. (b) Income tax

Q.6. (a) Rs. 52500

Total amount without excise duty = Rs. 350000

Excise Duty = 150%

Sales tax payable = Purchase Price \times Tax Rate

$$= \text{Rs. } 350000 \times 150\%$$

$$= \text{Rs. } \left(350000 \times \frac{150}{100} \right)$$

$$= \text{Rs. } (3500 \times 150) = \text{Rs. } 525000$$

Q7. (d) Rs. 97500

Value of the house = Rs. 650000

Tax rate = 15%

Property tax payable = Amount of the property \times Tax Rate

$$= \text{Rs. } 650000 \times 15\%$$

$$= \text{Rs. } \left(650000 \times \frac{15}{100} \right)$$

$$= \text{Rs. } (6500 \times 15) = \text{Rs. } 97500$$

Q8. (c) Rs. 8,400

Monthly income = Rs. 45,000

Yearly income = $12 \times 45,000$ rupees

= 5,40,000 rupees

Amount of rebate = Rs. 4,00,000

Taxable income = 5,40,000 - 4,00,000

Tax rebate = Rs. 1,40,000

$$\text{Income tax at } 6\% = \frac{6}{100} \times 1,40,000$$

$$= \text{Rs. } 8,400$$

Q9. (a) Rs. 30000
 Price of computer including tax = Rs. 34800
 Let the original price = Rs. 100
 Then, price of computer including sales tax @ 16% = Rs. 116
 Original price of computer = $\frac{100}{116} \times 34800 = 25 \times 1200$
 = Rs. 30000

Q10. (d) Rs. 75.40
 Cost of the article = Rs. 65
 Rate of GST = 16%
 Amount of GST on Rs. 65 = 16% of Rs. 65

$$= \frac{16}{100} \times 65 = \text{Rs. } 10.40$$

Total amount has to pay including GST = Rs. (65 + 10.40) = Rs. 75.40

Chapter 3 NUMBERS

Numbers: In decimal number system, we use ten symbols 0, 1, 2, 3, 4, 5, 6, 7, 8, 9 called digits, to represent any number.

Note: A group of figures, denoting a number is called numeral.

Types of Numbers

Natural Numbers: Numbers which we use for counting the objects are known as natural numbers. It is denoted by 'N'.

$$N = \{1, 2, 3, 4, \dots\}$$

Whole Numbers: All Natural Numbers together with zero form the set of all whole numbers. It is denoted by 'W'.

$$W = \{0, 1, 2, 3, \dots\}$$

Integers: The set of numbers which consists of whole numbers and negative numbers is known as integers. It is denoted by Z.

$$Z = \{\dots, -3, -2, -1, 0, 1, 2, 3, \dots\}$$

Positive Integers: The set $Z^+ = \{1, 2, 3, 4, \dots\}$ is the set of all positive integers. It is clear that positive integers and natural numbers are synonyms.

Negative Integers: The set $Z^- = \{-1, -2, -3, \dots\}$ is the set of all negative integers.

Remember: "0" is neither positive nor negative.

Non-Negative Integers: The set $\{0, 1, 2, 3, \dots\}$ is a set of non-negative integers.

Non-Positive Integers: The set $\{0, -1, -2, -3, \dots\}$ is the set of non-positive integers.

Even Numbers: The numbers which are divisible by 2 are called Even Numbers.

$$E = \{2, 4, 6, \dots\}$$

Odd Numbers: The numbers which are not divisible by 2 are called Odd Numbers.

$$O = \{1, 3, 5, 7, 9, \dots\}$$

Properties of zero:

1. 0 is neither positive nor negative.
2. 0 is an even integer.
3. 0 is smaller than every positive number.
4. 0 is greater than every negative number.
5. For any integer p ; $p \times 0 = 0$.
6. For any integer p (including 0); $p + 0 = p$.

7. For any positive integer p ; $0 \div p = \frac{0}{p} = 0$.

8. For every integer p ; $p \div 0$ and $p - 0 = p$.

9. If the product of two or more numbers is 0, then at least one of them is 0.

Properties of one:

1. For any number p : $p \times 1 = p$ and $\frac{p}{1} = p$.

2. 1 is the divisor of every integer.

3. 1 is an odd integer.

4. 1 is not a prime number, because prime numbers should be greater than 1.

5. 1 is the smallest positive integer.

6. For any integer n : $1^n = 1$.

Factors and Multiples: A number which divides a given number exactly is called a factor of the given number.

Example 1: Find the factors of (i) 64 and (ii) 75.

Solution: (i) $64 = 1 \times 64$
 $= 2 \times 32$
 $= 4 \times 16$
 $= 8 \times 8$

The factors of 64 are 1, 2, 4, 8, 16, 32 and 64.

(ii) $75 = 1 \times 75$
 $= 3 \times 25$
 $= 5 \times 15$

The factors of 75 are 1, 3, 5, 15, 25 and 75.

Division Algorithm: Let a and b be two given integers such that $b \neq 0$. On dividing a by b , let q be the quotient and r the remainder, then $a = bq + r$.

Clearly, $0 < r < b$

In general, we have $\text{Dividend} = (\text{Divisor} \times \text{Quotient}) + \text{Remainder}$

Multiple of a Number:

A multiple of any natural number is a number obtained by multiplying that number by any natural number.

Example: Find the multiples of:

(i) 4 less than 30 (ii) 9 less than 60

Solution: (i) $4 \times 1 = 4$
 $4 \times 2 = 8$
 $4 \times 3 = 12$
 $4 \times 4 = 16$
 $4 \times 5 = 20$
 $4 \times 6 = 24$
 $4 \times 7 = 28$ etc.

\therefore The multiples of 4 less than 30 are 4, 8, 12, 16, 20, 24 and 28.

(ii) $9 \times 1 = 9$
 $9 \times 2 = 18$
 $9 \times 3 = 27$
 $9 \times 4 = 36$
 $9 \times 5 = 45$
 $9 \times 6 = 54$ etc.

\therefore The multiples of 9 less than 60 are 9, 18, 27, 36, 45 and 54.

Divisible of a Number:

If a number divides a second number without leaving any remainder, then we say that the second number is divisible by the first number. For example, since the number 2 divides 14 without leaving any remainder, we

say that 14 is divisible by 2.

Multiple Choice Questions (MCQs)

- Q1. How many numbers between 200 and 500 are divisible by 13?
(A) 23 (B) 17
(C) 15 (D) 32
- Q2. The first five multiples of 17 are:
(A) 0, 1, 17, 34, 51 (B) 17, 34, 51, 68, 85
(C) 38, 57, 76, 95, 114 (D) None of these
- Q3. The number which is divisible by 7 but not by 14 is:
(A) 21 (B) 12
(C) 71 (D) None of these
- Q4. The total number of even prime numbers is:
(A) 0 (B) 1
(C) 2 (D) None of these
- Q5. The least prime number is:
(A) 0 (B) 1
(C) 2 (D) 3

Explanatory Answer

Q1.(A) Number of numbers up to 200 which are divisible by 13

$$= \frac{200}{13} = 15 + \frac{5}{13}, \text{ i.e., } 15$$

Number of numbers up to 500 which are divisible by 13

$$= \frac{500}{13} = 38 + \frac{6}{13}, \text{ i.e., } 38$$

The required numbers = $38 - 15 = 23$

Hence, the correct answer is choice A.

Q2.(B) The first five multiples of 17 are

$$17 \times 1 = 17$$

$$17 \times 2 = 34$$

$$17 \times 3 = 51$$

$$17 \times 4 = 68$$

$$17 \times 5 = 85$$

First five multiples of 17 are 17, 34, 51, 68 and 85.

Q3.(A) The number which is divisible by 7 but not by 14 is 21. Hence, the correct answer is choice A.

Q4.(B) There is only one even prime number, namely 2. Hence, the correct answer is choice C.

Q5.(C) The least prime number is 2. Hence, the correct answer is choice C.

Chapter 4

MULTIPLICATION AND DIVISION

MULTIPLICATION: Multiplication is a short method of adding the same number repeatedly.

PROPERTIES OF MULTIPLICATION:

1. Multiplication is commutative for rational numbers.

Example:

$$\frac{a}{b} \times \frac{c}{d} = \frac{ac}{bd} = \frac{c}{d} \times \frac{a}{b}$$
$$\frac{2}{3} \times \frac{5}{7} = \frac{10}{21} = \frac{5}{7} \times \frac{2}{3}$$

2. Multiplication is associative for rational numbers.

Example:

$$\frac{a}{b} \times \left(\frac{c}{d} \times \frac{e}{f} \right) = \frac{ace}{bdf} = \left(\frac{a}{b} \times \frac{c}{d} \right) \times \frac{e}{f}$$
$$\frac{2}{3} \times \left(\frac{5}{7} \times \frac{11}{13} \right) = \frac{110}{273} = \left(\frac{2}{3} \times \frac{5}{7} \right) \times \frac{11}{13}$$

3. Multiplication is distributive over addition and subtraction for rational numbers.

Example:

$$\frac{a}{b} \times \left(\frac{c}{d} \pm \frac{e}{f} \right) = \frac{a}{b} \times \frac{c}{d} \pm \frac{a}{b} \times \frac{e}{f}$$
$$\frac{2}{3} \times \left(\frac{5}{7} \pm \frac{11}{13} \right) = \frac{2}{3} \times \frac{5}{7} \pm \frac{2}{3} \times \frac{11}{13}$$

4. For any rational number $\frac{x}{y}$, $\frac{x}{y} \times 1 = \frac{x}{y} = 1 \times \frac{x}{y}$, one is called multiplicative identity.

5. Two rational numbers $\frac{a}{b}$ and $\frac{b}{a}$ are the multiplicative inverses of each other.

$$\frac{a}{b} \times \frac{b}{a} = 1 = \frac{b}{a} \times \frac{a}{b}$$

Note: The sign of the product is +ive, if there are an even number of negative factors or there are no negative factors. The sign of the product is -ive, if there are an odd number of negative factors

DIVISION

The process of subtraction of the same number from a given number for a few times is called division (\div), i.e.,

$$6 \div 2 = 3$$

(2 can be subtracted 3 times from 6)

IMPORTANT POINTS

1. Division is the inverse operation of multiplication. For example $6 \div 2 = 3$ means to find the number by which 2 should be multiplied so as to obtain 6.
Because $3 \times 2 = 6$
Therefore, $6 \div 2 = 3$
2. When a number is divided by another number, the first number i.e. the number which is being divided is called the *dividend*, the second number which divides is called the *divisor* and the number obtained as a result of division is called the *quotient*. In the above example, 6 is the dividend, 2 is the divisor and 3 is the quotient.
3. The operation of division starts from the left whereas the operations of addition, subtraction and multiplication start from the right.

Divisibility:

The following table gives the rules to test the divisibility from 2 to 25.

Divisibility by	If	Example
2	Any number in the unit's place which is either even or zero.	12, 10, 26, 32, 38, 567992, 11110234
3	The sum of digits is divisible by 3.	$321 : 3 + 2 + 1 = 6$ is divisible by 3.
4	The last two digits of a number is divisible by 4.	$725324 : 24$ is divisible by 4.
5	The number ends with 5 or zero.	4112370, 5321095, 3331210, etc.
6	A number is divisible by 2 and the sum of	342, 63924, 154, 261 etc.

Divisibility by	If	Example
8	the digits of the number is multiple of 3. The last three digits of a number is divisible by 8. or The last three digits of a number are zero.	2125000, 135923120, 7792320, 1256, etc.
9	The sum of all the digits of a number is divisible by 9.	33456735 : 3 + 3 + 4 + 5 + 6 + 7 + 3 + 5 = 36 divisible by 9.
10	Any number which ends with zero.	70, 789790, 7111130, 5773313570, 112300100 etc.
11	The sum of digits at odd and even places are respectively equal or differ by a number divisible by 11.	4235682 : Sum 1 = 4 + 3 + 6 + 2 = 15 Sum 2 = 2 + 5 + 8 = 15 Sum 1 = Sum 2, the number is divisible by 11. or 283712 : Sum 1 = 2 + 3 + 1 = 6 and Sum 2 = 8 + 7 + 2 = 17, their differ 17 - 6 = 11 is divisible by 1.
12	The number which is divisible by both 4 and 3.	135792 etc.
14	The number which is divisible by both 2 and 7.	98, 504 etc.
15	The number which is divisible by 3 and 5.	360, 733352215 etc.
16	The number whose last 4 digit number is divisible by 16.	253421020, 27954204 etc.
18	Any number which is divisible by 9 and has its last digit even (or zero).	2709360, 252630 etc.
25	The number formed by the last two digits of the number is divisible by 25.	257275, 25277750 etc.

Model Examples:

Q1. Multiply 63987 by 91763 is not more than 3 lines.

Solution:

$$\begin{array}{r}
 63987 \\
 (\times) 91763 \\
 \hline
 4031181 \quad \text{Multiplication by } 63 \\
 447909 \times \times \quad \text{Multiplication by } 700 \\
 5822817 \times \times \times \quad \text{Multiplication by } 91000 \\
 \hline
 5871639081
 \end{array}$$

Q2. Find the number, one-sixth of which exceeds its one-ninth by 654.

Solution: Let the number be x

$$\square \quad \frac{x}{6} - \frac{x}{9} = 654 \quad \frac{x}{18} = 654$$

$$\Rightarrow x = 654 \times 18 = 11772 \quad \text{Ans.}$$

Q3. The speed of mail train is 1,370 meters per minute. Express it in miles per hour correct to three significant figures, given that 1 metre = 39.37 inches.

Solution: Speed of mail train = 1,370 metres per minute

$$\begin{aligned}
 &= 1370 \times 60 \text{ metres per hour} \\
 &= \frac{1370 \times 60 \times 39.37}{12 \times 3 \times 1760} \text{ miles per hour} \\
 &= 51.077 \text{ miles per hour} \quad \text{Ans.}
 \end{aligned}$$

Q4. A boy when asked to multiply a number by $\frac{7}{8}$, divided this instead, by $\frac{7}{8}$ and found the answer $1\frac{1}{14}$ too great. Find the number and the correct answer.

Solution: Let the number be ' x '

$$\square \quad \left(x \div \frac{7}{8}\right) - \left(x \times \frac{7}{8}\right) = \frac{15}{14}$$

$$\frac{8x}{7} - \frac{7x}{8} = \frac{15}{14}$$

$$\frac{64x - 49x}{56} = \frac{15}{14}$$

or
$$\frac{15x}{56} = \frac{15}{14}$$

$$\square \quad x = \frac{56 \times 15}{14 \times 15} = 4 \quad \text{Ans.}$$

Correct answer = $4 \times \frac{7}{8} = 3 \frac{1}{2}$ Ans.

Q5. The sum of the squares of two consecutive integers is 1105. Find the integers and check your answer.

Solution: Let the two consecutive positive numbers be:

$$x, x + 1$$

Then sum of the squares of these consecutive numbers = 1105

$$\square \quad x^2 + (x + 1)^2 = 1105$$

$$x^2 + x^2 + 2x + 1 = 1105$$

$$2x^2 + 2x - 1104 = 0$$

$$x^2 + x - 552 = 0$$

or
$$x^2 + 24x - 23x - 552 = 0$$

$$x(x + 24) - 23(x + 24) = 0$$

$$(x - 23)(x + 24) = 0$$

$$\Rightarrow x = 23 \quad \text{or} \quad x = -24$$

Since, the two consecutive numbers are +ve integers, therefore, we neglect the -ve number.

Thus the two consecutive numbers are 23 and 24. Ans.

Check:

$$(23)^2 + (23 + 1)^2 = 1105$$

$$529 + 576 = 1105$$

$$1105 = 1105$$

===== Chapter 5 =====

HIGHEST COMMON FACTOR & LEAST COMMON MULTIPLE

HIGHEST COMMON FACTOR & LEAST COMMON MULTIPLE

The highest common factor of two or more numbers is the greatest number which divides each of them exactly.

Methods of finding H.C.F.

(i) **By Prime Factors.**

Resolve the given number into their prime factors. The product of all prime common factors is known as H.C.F.

Model Example: Find the H.C.F. of 630, 1050 and 1260.

Solution:

$$630 = 2 \times 3 \times 3 \times 5 \times 7$$

$$1050 = 2 \times 3 \times 5 \times 5 \times 7$$

$$1260 = 2 \times 2 \times 3 \times 3 \times 5 \times 7$$

$$\square \quad \text{H.C.F. is } 2 \times 3 \times 5 \times 7 = 210. \quad \text{Ans.}$$

(ii) **By Division:**

Find the H.C.F. of 5133 and 3953

$$\begin{array}{r}
 3953 \overline{) 5133} \quad (1 \\
 \underline{3953} \\
 1180 \\
 3953 \overline{) 1180} \quad (2 \\
 \underline{3540} \\
 413 \\
 1180 \overline{) 413} \quad (1 \\
 \underline{826} \\
 354 \\
 413 \overline{) 354} \quad (1 \\
 \underline{354} \\
 0
 \end{array}$$

Various Steps:

- Step I. Dividing the greatest number by the lesser, we get the remainder 1180.
- Step II. Dividing the previous divisor 3953 by 1180, we get the remainder 413.
- Step III. Dividing the previous divisor 1180 by 413 we get the remainder 354.
- Step IV. Dividing the previous divisor 413 by 354 we get the remainder 59.
- Step V. Dividing the previous divisor 354 by 59 we get no remainder.

∴ The last divisor 59 is the H.C.F.

Note: H.C.F. is also known as Greatest Common Measure (G.C.M.)

LEAST COMMON MULTIPLE (L.C.M)

The Least Common Multiple of two or more given numbers is the least number which is exactly divisible by each of them.

Methods of Finding L.C.M.

(i) *By Factors.* Resolve the given numbers into prime factors, and find the product of the highest powers of all the factors that occur in the given number. The product will be the required L.C.M.

Model Example

Q1. Find the L.C.M. of 70, 80, 90.

Solution: $70 = 2 \times 5 \times 7$

$$80 = 2^4 \times 5$$

$$90 = 2 \times 3^2 \times 5$$

$$\text{L.C.M.} = 2^4 \times 3^2 \times 5 \times 7 = 5040 \text{ Ans.}$$

(ii) *With the help of H.C.F.* The product of two numbers is equal to the product of their L.C.M. and H.C.F.

∴ L.C.M. of two numbers

$$= \frac{\text{Product of numbers}}{\text{H.C.F.}}$$

H.C.F.

L.C.M. and H.C.F. of Fractions.

The L.C.M of two or more fractions is the least fraction or integer which is exactly divisible by each of them.

L.C.M. of two or more fractions

$$= \frac{\text{L.C.M. of numerators}}{\text{H.C.F. of denominators}}$$

H.C.F. of two or more fractions

The H.C.F of two or more fractions is the highest fraction which is exactly divisible by each of the fraction.

$$= \frac{\text{H.C.F. of numerators}}{\text{L.C.M. of denominators}}$$

Model Examples

Q1. The H.C.F. of two numbers is 34 and their L.C.M. is 4284. If one of the numbers is 204, find the other.

Solution: As product of 2 numbers
= their H.C.F. \times L.C.M.

The other number is $= \frac{34 \times 4284}{204}$

$= 714$ Ans.

Q2. What is the highest number of four digits which will leave a remainder of 1 when divided by any of numbers 6, 9, 12, 15, or 18?

Solution: L.C.M. of 6, 9, 12, 15, 18 = 180

Greatest no. of 4 digits = 9999

Greatest no. of 4 digits divisible by

$180 = 9999 - 99 = 9900$

$$\begin{array}{r} 55 \\ 180 \overline{) 9900} \\ \underline{900} \\ 900 \\ \underline{900} \\ 00 \end{array}$$

∴ Reqd. No. = $9900 + 1 = 9901$ Ans.

Q3. Three men A, B and C go walking round a circle one mile in circumference at the rates of 160, 120 and 105 yards per minute, respectively. If they all start together and walk in the same direction, when will they first be together again?

Solution: Circumference of the circle = 1 mile or 1760 yds.

A will complete the circle in

$= \frac{1760}{160} = 11$ min.

B will complete the circle in

$= \frac{1760}{120} = \frac{44}{3}$ min.

C will complete the circle in

$= \frac{1760}{105} = \frac{352}{21}$ min.

L.C.M. of 11, $\frac{44}{3}$, $\frac{352}{21}$ = 352 minutes.

i.e., they will be together again first after 352 min. or 5 hrs. 52 min. Ans.

H.C.F of 11, $\frac{44}{3}$, $\frac{352}{21}$	
Multiplying by 21	
11 × 21,	$\frac{44}{3} \times 21,$ $\frac{352}{21} \times 21$
7	231 - 308 - 352
11	33 - 44 - 352
4	3 - 4 - 32
	3 - 1 - 8
L.C.M = $\frac{7 \times 11 \times 4 \times 3 \times 8}{21}$	
$= \frac{7392}{21} = 352$	

Multiple Choice Questions (MCQs)

- Q1. A neon sign flashes every 3 seconds, another sign flashes every 5 seconds, and a third flashes every 7 seconds. If they all flash together, how many seconds will pass before they all flash simultaneously again?
- (A) 15 seconds (B) 35 seconds
(C) 105 seconds (D) 21 seconds
- Q2. The greatest number which exactly divides 1155 and 735 is:
- (A) 25 (B) 5
(C) 15 (D) 105
- Q3. The least number which when divided by 35, leaves remainder of 25; when divided by 45 leaves a remainder of 35 and when divided by 55 leaves 45 as remainder, is:
- (A) 3455 (B) 3465
(C) 3475 (D) 10
- Q4. The L.C.M of 12, 20, 24, 32 is:
- (A) 240 (B) 360
(C) 480 (D) 600
- Q5. How many whole bricks $6 \times 12 \times 24 \text{ cm}^3$ will be sufficient to construct a solid cube of minimum

size?

- (A) 4
(C) 8

- (B) 6
(D) 12

Explanatory Answer

Q1. (C) The L.C.M of 3, 5 and 7 will give the answer

3	3	5	7
5	1	5	7
7	1	1	7
	1	1	1

$$= 3 \times 5 \times 7 = 105$$

Q2. (D) The required number is the H.C.F of 1155 and 735

735	1	1155
735	1	
420		735
420	1	
315		420
315	3

		X

The greatest number required is 105.

Q3. (A) The least number which is completely divided by 35, 45 and 55, is their L.C.M. which is 3465. We want to find the least number which on dividing by 35, 45 and 55 leave remainders 25, 35 and 45 respectively i.e., 10 less than the quotient in each case. Hence such a number is $3465 - 10 = 3455$

Q4. (C)

2	12	20	24	32
2	6	10	12	16
2	3	5	6	8
2	3	5	3	4
2	3	5	3	2
3	3	5	3	1
5	1	5	1	1
	1	1	1	1

The L.C.M. of 12, 20, 24 and 32 is

$$2^5 \times 3 \times 5 = 32 \times 3 \times 5 = 480$$

Q5. (C) One edge of the minimum cube must be 24 cms, the least common multiple of 6, 12 and 24. Thus, it will have a volume of $24 \times 24 \times 24$ cubic centimeters which is equal to 8 bricks

i.e.,
$$\frac{24 \times 24 \times 24}{6 \times 12 \times 24} = 8$$

Chapter 6

SQUARE ROOT

Methods of Finding Square Root:

(i) **By Factors.** Resolve the number into its prime factors. The square root is the product of the prime

factors taken half as many times as they occur in the number.

(ii) By Division.

Model Example: Find the square root of 2480625.

Solution:

1	2480625	(1575
	1	
25	148	
	125	
307	2306	
	2149	
3145	15725	
	15725	
	x	

□ **Ans.** 1575

Q2. Find the square root of 43.45 to four decimal places.

Solution:

6	43.45	(6.5916
	36	
125	7.45	
	6.25	
1309	12000	
	11781	
13181	21900	
	13181	
131826	871900	
	790956	
	- 80944	

As remainder is more than half 6.5917. **Ans.**

Q3. Find the value of $\sqrt{\frac{2+\sqrt{3}}{2-\sqrt{3}}}$ correct to three decimal places.

Solution: $\sqrt{\frac{2+\sqrt{3}}{2-\sqrt{3}}} = \sqrt{\frac{(2+\sqrt{3})(2+\sqrt{3})}{(2-\sqrt{3})(2-\sqrt{3})}}$ (Rationalization)

$$= \sqrt{\frac{(2+\sqrt{3})^2}{(2)^2 - (\sqrt{3})^2}}$$

$$= \sqrt{\frac{(2+\sqrt{3})^2}{4-3}} = 2+\sqrt{3} = 2+1.732$$

$$= 3.732 \quad \text{Ans.}$$

UNITARY METHOD AND CHAIN RULE

IMPORTANCE:

The unitary method and chain rule have quite an importance in our daily life. It is explained by the following model examples.

Model Examples:

Q1. In a kilometer race A can beat B by 40 metres and B can beat C by 50 metres. How many metres can A beat C in a 500 metres race?

Solution:

Let A covers 1000 m.

Then B covers: $1000 - 40 = 960$ m.

and When B covers 1000 m.

then C covers $1000 - 50 = 950$ m.

□ When B covers 960 m.
C covers $\left(\frac{950}{1000} \times 960\right) \text{ m} = 912 \text{ m}$.

i.e., when A covers 1000 m. C covers = $\frac{912}{2} \text{ m}$
= 456 m.

or when A covers 500 m. race, A will beat C by
= $500 - 456 = 44 \text{ m}$.

Q2. Divide Rs. 510 between A, B and C so that A gets $\frac{2}{3}$ of what B gets and B gets $\frac{1}{4}$ of what C gets. Find the share of each.

Solution: Let C's share be Rs. x

□ B's share is = $\frac{x}{4}$

A's share is = $\frac{2}{3} \times \frac{x}{4} = \text{Rs. } \frac{x}{6}$

Total amount = Rs. 510

□ $x + \frac{x}{4} + \frac{x}{6} = 510$

$\frac{12x + 3x + 2x}{12} = 510$

□ $17x = \frac{12 \times 510}{17} = 360$

□ A's share = $\frac{360}{6} = \text{Rs. } 60$
□ B's share = $\frac{360}{4} = \text{Rs. } 90$
□ C's share = Rs. 360 } **Ans.**

Q3. Divide Rs. 600 among A, B, and C so that Rs. 40 more than $\frac{2}{5}$ of A's share, Rs. 20 more than $\frac{2}{7}$ of B's share, Rs. 10 more than $\frac{9}{17}$ of C's share may be equal.

Solution: Let $\frac{2}{5}$ of A's share + Rs. 40 = $\frac{2}{7}$ of B's share + Rs. 20 = $\frac{9}{17}$ of C's share + Rs. 10 be = x .

□ $\frac{2}{5}$ of A's share = $x - 40$

or A's share = $\frac{5}{2}(x - 40)$

Similarly B's share = $\frac{7}{2}(x - 20)$

C's share = $\frac{17}{9}(x - 10)$

As total amount = Rs. 600

□ $\frac{5x - 200}{2} + \frac{7x - 140}{2} + \frac{17x - 170}{9} = 600$

$$\frac{45x - 1800 + 63x - 1260 + 34x + 340}{18} = 600$$

or

$$142x - 3400 = 600 \times 18 = 10800$$

$$142x = 10800 + 3400 = 14200$$

$$x = \frac{14200}{142} = 100$$

□

$$\left. \begin{aligned} \text{A's share} &= \frac{5}{2}(100 - 40) = \text{Rs. } 150 \\ \text{B's share} &= \frac{7}{2}(100 - 20) = \text{Rs. } 280 \\ \text{C's share} &= \frac{17}{9}(100 - 10) = \text{Rs. } 170 \end{aligned} \right\} \text{Ans.}$$

Q4. A garrison has enough provision for 52 days. After 20 days, a reinforcement of 400 men arrives and the food would then last for 24 days only. How many men were there in the garrison originally?

Solution: Let there be x men in the garrison originally. After 20 days no. of men = $x + 400$.
If these men had not joined, the provision would have lasted for $50 - 20 = 32$ days more.

- For x men the provision can last for 32 days
For 1 men the provision in last for $32x$ days

For $(x + 400)$ men of provision can last for $\frac{32x}{x + 400}$ days

But provision lasted for 24 days

□ $\frac{32x}{x + 400} = 24$

or $32x = 24x + 9600$

$8x = 9600$

or $x = 1200$ men. Ans.

Multiple Choice Questions (MCQs)

- Q1.** What is the least positive integer which is to be added to 57592910 so that the sum may be a perfect square?
(A) 7588 (B) 7
(C) 11 (D) 15166
- Q2.** A rectangular field which is twice as long as it is broad, has an area of 14450 m^2 , what is its perimeter?
(A) 85 m (B) 510 m
(C) 165 m (D) 170 m
- Q3.** The cost of the planting sugarcane at the rate of 6 paise per square meter is Rs. 5840.64. What is the length of side of this square field?
(A) 312 m (B) 622 m
(C) 97344 m (D) 459 m
- Q4.** What is the smallest number which when subtracted from 1.00060219 gives a perfect square number?
(A) 0.00210 (B) 210
(C) 0.00000210 (D) 0.210
- Q5.** The product of 313 with itself is:
(A) 97969 (B) 17.69
(C) 5536.97 (D) 195938

Explanatory Answer

Q1. (C) 57592910 is greater than the square of 7588 (using calculator). The next squared is the square of 7589. $(7589)^2 = 57592921$.

Now $57592921 - 57592910 = 11$, which is the required integer to be added.

Q2. (B) As the length is twice as long as width and so its rectangle can be divided into 2 square regions

$$\text{The area of each square region} = \frac{14450}{2} = 7225\text{m}^2$$

$$\begin{aligned} \text{Now length of each region} &= \text{Width of the field} \times 2 \\ &= \sqrt{7225} \\ &= 85\text{m} \end{aligned}$$

$$= 85 \times 2 = 170\text{m}$$

$$\text{Perimeter} = 2(170 + 85)$$

$$= 2(255)$$

$$= 510\text{m}$$

Q3. (A) Cost = Rs. 5840.64

$$= 584064 \text{ paisas}$$

$$\text{Area} = \frac{584064}{6} = 97344$$

$$\begin{aligned} \text{Side} &= \sqrt{97344} \\ &= 312 \text{ m} \end{aligned}$$

Q4. (C)

$$\begin{array}{r} 1 \overline{) 1.00060219} \text{ (1.0003)} \\ \underline{1} \\ 2.0003 \\ \underline{20009} \\ 210 \end{array}$$

There are eight places after the decimal in the given number, so after subtracting .0000021 from the given number the remainder would be zero. So .0000021 is the required number.

Q5. (A) $313 \times 313 = 97969$

Chapter 7

FRACTIONS & DECIMALS

FRACTIONS: If any unit be divided into any number of equal parts, one or more of these parts is called a fraction of the unit.

Example: The fractions one-fourth, two-third and three-fourth are respectively written as $\frac{1}{4}$, $\frac{2}{3}$ and $\frac{3}{4}$.

NUMERATOR AND DENOMINATOR:

The upper number, which shows the number of parts taken to form the fraction, is called numerator.

The lower number, which indicates the number of equal parts in which the unit is divided, is called denominator.

Terms of The Fraction:

The numerator and the denominator of a fractions are called its terms.

Note: A fraction is also called a rational number.

Lowest Terms of a Fraction:

When the numerator and the denominators of a fraction have no common factor, the fraction is said to be in its lowest terms:

example: $\frac{6}{10} = \frac{3 \times 2}{5 \times 2}$

In the above example denominator and the numerator have a common factor, thus $\frac{6}{10}$ is not in its lowest terms. If we cancel out 2 by dividing numerator and denominator by 2 we find $\frac{3}{5}$, which has no common factor, hence $\frac{3}{5}$ is in its lowest terms.

Proper Fraction:

A proper fraction is one whose numerator is less than the denominator.

example: $\frac{2}{37}, \frac{5}{46}, \frac{23}{46}$ are proper fractions.

Note: The value of proper fractions is always less than 1

IMPROPER FRACTION:

A fraction whose numerator is equal to or greater than the denominator is called improper fraction.

example: $\frac{15}{13}, \frac{13}{5},$ and $\frac{21}{14}$ are improper fractions.

Note: The value of an improper fractions is always more than as equal to 1.

Mixed Fraction:

When an improper fraction is changed to consist of a whole number and a fraction, it is called a mixed fraction.

example: The improper fraction $\frac{15}{13}$ can be written as $2\frac{2}{13}$, which is a mixed fraction.

$$\begin{array}{r} 13 \overline{) 15} \\ \underline{13} \\ 2 \end{array}$$

Compound Fraction:

A fraction of a fraction is called a compound fraction.

example: $\frac{1}{3}$ of $\frac{3}{5}$ is a compound fraction.

Thus $\frac{1}{3}$ of $\frac{3}{5} = \frac{1}{3} \times \frac{3}{5} = \frac{1}{5}$

Complex Fractions:

A complex fraction is one in which the numerator or denominator or both are fractions.

example: $\frac{3/2}{5}, \frac{3}{2/5}, \frac{2/5}{3/7}$ and $\frac{1/3 + 1/2}{2/3 - 1/5}$ are complex fractions.

example 1: One third of one-seventh of a plot is sold Rs. 45000. What is the value of six-twenty fifth of the plot.

Solution: One third of one seventh = $\frac{1}{3} \times \frac{1}{7} = \frac{1}{21}$

Now, $\frac{1}{21}$ of a plot costs = Rs. 45000,

$\frac{6}{25}$ of the plot will cost = $\frac{45000}{1/2} \times \frac{6}{25}$

$$= \frac{45000 \times 21 \times 6}{25}$$

Example 2: A sum of money increased by its sixth part amount to Rs. 56. Find the sum.

Solution: Let x be the amount of money, thus

$$\begin{aligned} x + \frac{x}{6} = 56 &\Rightarrow \frac{6x + x}{6} = 56 \\ &\Rightarrow \frac{7x}{6} = 56 \\ &\Rightarrow 7x = 56 \times 6 \\ &\Rightarrow x = \frac{56 \times 6}{7} = 48 \end{aligned}$$

VULGAR FRACTIONS

In questions of fractions signs +, -, ×, ÷, "of" ('of' signifies multiplication) and brackets are often involved. In simplifying these questions the following order must be followed:

IMPORTANT POINTS

- (i) Remove the brackets.
- (ii) Then quantities which are connected by 'of' should be simplified.
- (iii) Then division and multiplication are carried out.
- (iv) Operation of addition and subtraction are performed at last.

Note: The above rules can be easily remembered by the word 'BODISA' of which 'B' stands for brackets, O for 'of', D for division, I for into, S for subtraction and A for addition.

Model Examples:

Example 3: $7\frac{1}{2} - \frac{1}{9} \left[3\frac{3}{4} \div \left\{ \frac{5}{6} \text{ of } \frac{2}{3} \left(\frac{1}{3} - \frac{1}{4} - \frac{1}{6} \right) \right\} \right]$

Solution:

$$= 7\frac{1}{2} - \frac{1}{9} \left[\frac{15}{4} \div \left\{ \frac{5}{6} \text{ of } \frac{2}{3} \left(\frac{1}{3} - \frac{3-2}{12} \right) \right\} \right]$$

$$= 7\frac{1}{2} - \frac{1}{9} \left[\frac{15}{4} \div \left\{ \frac{5}{6} \text{ of } \frac{2}{3} \left(\frac{1}{3} - \frac{1}{12} \right) \right\} \right]$$

$$= 7\frac{1}{2} - \frac{1}{9} \left[\frac{15}{4} \div \left\{ \frac{5}{6} \text{ of } \frac{2}{3} \left(\frac{3}{12} \right) \right\} \right]$$

$$= 7\frac{1}{2} - \frac{1}{9} \left[\frac{15}{4} \div \left\{ \frac{5}{6} \text{ of } \frac{1}{6} \right\} \right]$$

$$= 7\frac{1}{2} - \frac{1}{9} \left[\frac{15}{4} \div \frac{5}{36} \right]$$

$$= 7\frac{1}{2} - \frac{1}{9} \left[\frac{15}{4} \times \frac{36}{5} \right]$$

$$= 7\frac{1}{2} - \frac{1}{9} \times 3 \times 9 = 7\frac{1}{2} - 3 = 4\frac{1}{2} \text{ Ans.}$$

Multiple Choice Questions (MCQs)

Q1. If $\frac{5}{x}$, $\frac{8}{x}$, and $\frac{13}{x}$ are all in lowest terms. Then how many integers, x , between 30 and 40?

- (A) 5 (B) 1
(C) 2 (D) 3
(D) None of these

Q2. $\frac{6}{6} \times \frac{6}{12} \times \frac{6}{18} \times \frac{6}{24} \times \frac{6}{30}$ equals:

- (A) $\frac{1}{120}$ (B) $\frac{1}{2}$
(C) $\frac{1}{30}$ (D) 1
(D) None of these

Q3. If $\frac{4}{13}$ of a number is 39, what is $\frac{8}{13}$ of that number?

- (A) $\frac{39}{4}$ (B) 78
(C) 16 (D) $\frac{39}{8}$

Q4. $\frac{3}{4}$ of 28 is equal to $\frac{30}{7}$ of what number?

- (A) 90 (B) 45
(C) 30 (D) 56
(D) None of these

Q5. Which of the following is less than $\frac{5}{11}$?

- (A) $\frac{3}{2}$ (B) $\frac{2}{3}$
(C) $\frac{1}{2}$ (D) $\frac{2}{5}$
(D) None of these.

Explanatory Answer

Q1. (D) If x is even, then $\frac{8}{x}$ will not be in lowest term. This is because, both x and 8 are divisible by 2.

Now we take the odd number between 30 and 40, these are; 31, 33, 35, 37, 39. In these numbers, we see that 35 and 39 are divisible by 5 and 13, respectively. Thus only 31, 33 and 37 are required numbers.

Q2. (A) Simplifying $\frac{6}{6} \times \frac{6}{12} \times \frac{6}{18} \times \frac{6}{24} \times \frac{6}{30}$

$$\frac{1}{1} \times \frac{1}{2} \times \frac{1}{3} \times \frac{1}{4} \times \frac{1}{5} = \frac{1}{20}$$

Q3. (B) As $\frac{4}{13}$ of a number is 39. Therefore the $\frac{8}{13}$ of that number will be 78

Because $\frac{8}{13} = \frac{4}{13} \times 2$, and $\frac{4}{13}$ of a number is 39, therefore double of $\frac{4}{13}$ ($\frac{4}{13} \times 2 = \frac{8}{13}$) should be equal to $39 \times 2 = 78$.

Q4. (A) Let x be the required number, then by given condition

$$28 + \frac{4}{3} = x + \frac{30}{7}$$

$$28 \times \frac{3}{4} = x \times \frac{7}{30}$$

$$21 = x \times \frac{7}{30}$$

$$\frac{21 \times 30}{7} = x$$

$$\Rightarrow \boxed{x = 90}$$

Chapter 8

PERCENTAGE

Percentage: The term 'percent' is a short form of the Latin word 'per centum' meaning 'out of hundred'. It can best be defined as:

"A fraction whose denominator is 100 is called a percentage and the numerator of the fraction is called the rate percent."

A rate percent is reduced to an equivalent fraction dividing it by 100.

Change of percentage into Fraction or Decimal:

To convert a percentage to a fraction, mixed number or decimal, divide it by 100, and reduce, if possible. If necessary, the relating fraction may then be changed to a decimal.

Example:

- (i) Express $2\frac{1}{7}\%$ to a fraction
- (ii) Change $\frac{3}{4}\%$ to a decimal.

Solution:

$$\begin{aligned} \text{(i)} \quad 2\frac{1}{7}\% &= \frac{15}{7}\% \\ &= \frac{15}{7} \times \frac{1}{100} \left(\text{Replace \% by } \frac{1}{100} \right) \\ &= \frac{3}{140} \\ &= \frac{3}{140} \end{aligned}$$

$$\begin{aligned} \text{(ii)} \quad \frac{3}{4}\% &= \frac{3}{4} \times \frac{1}{100} \left(\text{Replace \% by } \frac{1}{100} \right) \\ &= \frac{3}{400} = .0075 \end{aligned}$$

Change of Fraction into Percentage:

To change a fraction or a mixed numbers to a percent.

- a. Multiply the fraction or mixed number by 100
- b. Reduce, if possible

c. Affix a % sign.

Example 2:

- (i) Change $\frac{1}{80}$ to a percent,
(ii) Change 0.05 to a percent

Solution:

$$\begin{aligned} \text{(i)} \quad \frac{1}{80} &= \frac{1}{80} \times 100 \\ &= 1.25\% \\ \text{(ii)} \quad 0.05 &= 0.05 \times 100 \\ &= \frac{5}{100} \times 100 \\ &= 5\% \end{aligned}$$

Expressing One Quantity as a Percentage of Another:

To express one quantity "p" as a percentage of another quantity "q".

a. Write p as a fraction of q, i.e., $\frac{p}{q}$

b. Multiply the fraction $\frac{p}{q}$ by 100% to convert it to a percentage.

Important Tip:

If a salary of a man is first increased by $x\%$ and then it has decreased $x\%$, the change in its initial salary is less by $x\%$ of x or $\frac{x^2}{100}$.

Note:

If two values are respectively $a\%$ and $b\%$ more than a third value, then the first is $\frac{100+a}{100+b} \times 100$'s of the second.

Example 4:

If Hamza's salary is 35% more than that of Osama, then how much percent is Osama's salary less than that of Hamza?

Solution:

Following the above rules, we have the value

$$\begin{aligned} &= \left[\frac{35}{100+35} \times 100 \right] \% \\ &= \left[\frac{35}{135} \times 100 \right] \end{aligned}$$

Important Tip:

If the first value is $r\%$ less than the second value, then the second is $\left[\frac{r}{100-r} \times 100 \right] \%$ more than the first value.

Multiple Choice Questions (MCQs)

- Q1. If the base of a rectangle is increased by 40% and its altitude is decreased by 20%, then its area is:
- (A) decreased by 20% (B) increased by 12%

Q2. If $x\%$ of y is 20, then y is increased by 16% (D)

(A) $2000x$

(C) $\frac{2000}{x}$

Q3. 12 is $\frac{1}{3}\%$ of what number?

(A) 4
(C) 36

(B) 400
(D) 3600

Q4. If p is a positive number, 400% of p is what percent of $400p$?

(A) 4
(C) 40

(B) 25
(D) 1

Q5. What is 10% of 30% of 40% ?

(A) 0.12%
(C) 12%

(B) 0.012%
(D) 1.2%

Explanatory Answer

Q1. (B) If the value firstly increased by $x\%$ and then decreased by $y\%$ then there is $\left[x - y - \frac{xy}{100} \right]\%$ increase or decrease according as the sign +ve or -ve, respectively. In this problem, $x = 40$ and $y = 20$.

Therefore

$$\left[40 - 20 - \frac{(40)(20)}{100} \right] \%$$

$$\left[20 - \frac{800}{100} \right] \%$$

$$[20 - 8] \% = 12\%$$

Because sign is +ve therefore its area is increased by 12% .

Q2. (C) $y \times \frac{x}{100} = 20$

$$\Rightarrow xy = 20 \times 100 \Rightarrow xy = 2000$$

$$\Rightarrow y = \frac{2000}{x}$$

Q3. (D) Using $\frac{\text{Part}}{\text{Whole}} = Y \text{ percent}$, here $P = 12$, $W = ?$ and $Y \text{ percent} = 300$

$$\frac{P}{W} = \frac{Y}{100} \Rightarrow \frac{P}{W} = Y \times \frac{1}{100}$$

$$\frac{12}{W} = \frac{300}{100} \Rightarrow W = \frac{12 \times 100}{300} = 4$$

Q4. (D) 400% of $p = \frac{400}{100} \times p = 4p$, which is 1% of $400p$.

Q5. (D) 30% of $40\% = \frac{30}{100} \times \frac{40}{100} = \frac{12}{100} = 0.12$

$$\text{Now } 10\% \text{ of } 30\% \text{ of } 40\% = \frac{10}{100} \times 0.12 = 0.012 = 1.2\%$$

Chapter 9

RATIO & PROPORTION

RATIO: The number of times one quantity contains another quantity of the same kind is called the ratio of the two quantities.

Note: The ratio of two quantities is equivalent to the fraction that one quantity is to the other.

Example: There can be ratio between Rs. 30 and Rs. 40, but there can be no ratio between Rs. 30 and 40 apples.

Remember: The ratio 3:5 is written as $3:5$ or $\frac{3}{5}$, 3 and 5 are called the terms of the ratio. 3 is the first and 5 is the second term.

Note: The first term of a ratio is called the antecedent and the second the consequent.

If a set of objects is divided into two groups in the ratio $a : b$, then the first group contains $\frac{a}{a+b}$ of the total objects. The second group contains $\frac{b}{a+b}$ of the total number of objects.

Important Example:

If a bag containing twelve mirrors is dropped, which of the following cannot be the ratio of the broken mirrors to unbroken mirrors?

- (i) 2:1 ii) 3:1 iii) 3:2 iv) 1:1 v) 7:5

Solution:

Since there are 12 mirrors in the bag. So 12 must be divisible by the sum of terms in the ratio exactly. We see that $2+1=3$ divides 12 exactly $3+1=4$ also divides exactly. Only the ratio $3+2=5$ doesn't divide 12 exactly. Thus the correct answer is (iii)

PROPORTION:

The equality of ratios is called proportion.

Example:

Consider the two ratios

Ist ratio
5:15

2nd ratio
7:21

Since 5 is one-third of 15, and 7 is one-third of 21, the two ratios are equal.

Note: The first and fourth terms are called extremes, and the second and third terms, are called the means. In above example 5 and 21 are extremes, while 15 and 7 are means.

Important Points:

1. If four quantities be in proportion, the product of the extremes is equal to the product of the means.
2. Three quantities of the same kind are said to be in continued proportion when the ratio of the first to the second is equal to the ratio of the second to the third.

Aid to Memory:

The mean proportional between two numbers is equal to the square root of their product.

Example: Find

- i). Fourth proportions to 5, 10, 5
- ii) Third proportion of 5 and 10.
- iii) Mean proportions between .04 and 0.09.

Solution:

(i) Let $5 : 10 :: 5 : x$

Then $5x = 10 \times 5 \Rightarrow 5x = 50 \Rightarrow x = 10$

(ii) Let $5 : 10 :: 10 : x$

Then $5x = 10 \times 10 \Rightarrow 5x = 100 \Rightarrow x = 20$

(iii) Mean proportion between .04 and .09

$$= \sqrt{.04 \times .09} = \sqrt{.0036}$$

$$= \sqrt{\frac{36}{10000}} = \frac{6}{100} = 0.06$$

Direct Proportion:

If the given two quantities are so related to each other that if one of them is multiplied (or divided) by any number, the other is also multiplied (or divided) by the same number.

Inverse Proportion:

If two quantities are so related that if one of them is multiplied by any number, the other is divided by the same number.

Example :

1. If 5 balls cost Rs. 7, what do 15 balls cost?

Solution: This example is an illustration of direct proportion. Therefore, setting a proportion.

$$\square \quad 5 : 7 :: 15 : x$$

$$\Rightarrow 5x = 15 \times 7 \Rightarrow x = \frac{15 \times 7}{5} = 21$$

2. If 5 men can build a house in 28 days, in how many days will 10 men build it?

Solution:

This example is an illustration of inverse proportion. Here, if we increase number of men.

2, 3, 4 times, the number of days will be decreased.

2, 3, 4 times, Thus the inverse ratio of the number of men is equal to the ratio of the corresponding number of days.

$$\square \quad \frac{1}{15} : \frac{1}{10} :: 28 : x \text{ days}$$

$$\Rightarrow x = \frac{1}{5} = \frac{1}{10} \times 28$$

$$\Rightarrow x = \frac{28 \times 15}{10} = 42 \text{ days.}$$

DOUBLE RULE OF THREE:

Example : If 8 men can reap 80 hectares in 24 days, how many hectares can 36 men reap in 30 days.

Solution: We resolve this problem in two parts.

1st Part: If 8 men can reap 80 hectares, how many hectares can 36 men reap.

Setting a proportion

8 men : 36 men :: 80 hectares : x hecter

$$x = \frac{36 \times 80}{8} = 360 \text{ hectares}$$

2nd Part: If 360 hectares can be reaped in 24 days, how many hectares can be reaped in 30 days?

24 days : 30 days = 360 hectares : x hecter

$$x = \frac{360 \times 30}{24} = 450$$

SINGLE STEP:

8 men : 36 men
24 days : 30 days

: : 80 hectare : x hecter

$$\text{Required No. of hectares :} = \frac{\text{Multiplication of means}}{\text{Multiplication of 1st terms}}$$

$$= \frac{80 \times 36 \times 30}{8 \times 24} = 450$$

Model Examples:

Example 1: Three liquids contain petrol and spirit mixed in the ratio 2:3, 3:4 and 4:5, respectively. A motor owner mixes 20 litres of the first, 21 litres of the second and a few litres of third. If the ratio of petrol to spirit in the mixture is 29 : 39, find the number of litres of the third liquid taken for the mixture.

Solution: 20 litres of the first liquid has $2/5 \times 20 = 8$ litres of petrol and 12 litres of spirit

21 litres of the second liquid have $3/7 \times 21 = 9$ litres of petrol and 12 litres of spirit.

Suppose x litres of the third liquid are taken, it will have $\frac{4x}{9}$ litres of petrol and $\frac{5x}{9}$ litres of spirit.

Total petrol in the mixture = $8 + 9 + \frac{4x}{9}$ litres

and total spirit = $12 + 12 + \frac{5x}{9}$ litres

Ratio of these = $\frac{17 + \frac{4x}{9}}{\frac{24 + 5x}{9}} = \frac{29}{39}$

This example is an illustration of inverse proportion. If we increase the number of men, the number of days will be decreased.

$\left(\frac{156}{9} - \frac{145}{9}\right)x = 696 - 663$

$\frac{11}{9}x = 33$

$x = \frac{9}{11} \times 33 = 27$ litres.

Example 2: In a regiment the number of officers to men was 3:31 before the battle. In the battle, 6 officers and 22 men were killed and the ratio become 1:13. Find the number of officers and men in the regiments.

Solution: In the beginning before the battle

Let no. of officers = x

" " men = y

then $x : y :: 3 : 31 \Rightarrow \frac{x}{y} = \frac{3}{31}$ (i)

After the battle

No. of officers = $x - 6$

men = $y - 22$

Then $\frac{x-6}{y-22} = \frac{1}{13}$ (ii)

From (i) we get $x = \frac{3}{31}y$

Substituting this value in (ii), we get

$\frac{\frac{3}{31}y - 6}{y - 22} = \frac{1}{13}$ (iii)

Solving for y in (iii), we get $y = 217$

$$x = \frac{3}{31} \times 217 = 21$$

∴ No. of officers = 21
No. of men = 217 } Ans.

Multiple Choice Questions (MCQs)

- Q1. In a city 90% of the population own a car, 15% own a motorcycle, and everybody owns one or the other or both. What is the percentage of motorcycle owners to who own cars?
(A) 15% (B) 35% (C) 75% (D) $33\frac{1}{3}\%$
- Q2. Concrete consists of cement, sand and screenings in the ratio of 1 : 5 : 4, what is the percentage of the sand mixed?
(A) 10% (B) 40% (C) 50% (D) 60%
- Q3. Three business partners shares have profit of Rs. 24000 in the ratio 5 : 4 : 3. What is the amount of the least share?
(A) 6000 (B) 8000 (C) 10,000 (D) 12000
- Q4. A machine produces 1280 parts in 16 hours. How many parts would it make in a working week of 44 hours?
(A) 2530 (B) 3520 (C) 2122 (D) 3960
- Q5. If the ratio of x and y is $\frac{11}{3}$, what is the value of $2x$ to y ?
(A) $\frac{11}{6}$ (B) $\frac{22}{6}$ (C) $\frac{22}{3}$ (D) $\frac{22}{9}$

Explanatory Answers

Q1. (D) Let x stand for the percentage who own both a car and a motorcycle. Then
(The %age who own a motorcycle) + (The %age who own a car) - (The %age who own one or the other or both) = 100% own one or other or both.
∴ $15\% + 90\% - A = 100\%$
 $105\% - A = 100\% \Rightarrow A = 5\%$

Example 2: A goods train in five successive minutes covers 312 metres and 325 metres and for next five minutes it covers 333 metres and 345 metres. Find the whole distance covered and the average speed of train in 10 minutes.
Solution: Distance covered in first five minutes = $312 + 325 = 637$ metres
Distance covered in next five minutes = $333 + 345 = 678$ metres
Total distance covered = $637 + 678 = 1315$ metres
Average speed = $\frac{1315}{10} = 131.5$ km/hr

Q2. (C) Ratio = 1 : 5 : 4
Sum of ratio = 1 + 5 + 4 = 10
Sand = $\frac{5}{10} \times 100 = 50\%$

Q3. (A) Ratio = 5 : 4 : 3
Sum of ratio = 5 + 4 + 3 = 12

$$\begin{aligned} \text{least share} &= \frac{3}{12} \times 24000 \\ &= \text{Rs. } 6000 \end{aligned}$$

Q4. (B) Let "x" be the number of parts in 44 hours

Then $16 : 1280 :: 44 : x$

$$\Rightarrow \frac{16}{1280} = \frac{44}{x} \Rightarrow x = \frac{44 \times 1280}{16}$$

$$x = \boxed{3520}$$

Q5. (C) The ratio of x to y can be written as $\frac{x}{y}$. The ratio of x to y is $\frac{11}{3}$, which can be written as

$$\frac{x}{y} = \frac{11}{3}$$

$$\text{If } \frac{x}{y} = \frac{11}{3}, \text{ then } 2\left(\frac{x}{y}\right) = 2\left(\frac{11}{3}\right)$$

$$\frac{2x}{y} = \boxed{\frac{22}{3}}$$

AVERAGE

In Mathematics, average is a representative of a number of given quantities. Average is of several kinds.

METHOD OF FINDING AVERAGE: To find average of any number of quantities of the same kind is to add all the items together and then divide the sum by the number of items.

$$\square \text{ Average} = \frac{\text{Sum of all the items}}{\text{No. of items}}$$

Model Examples

Example 1: The average daily temperature from 9th January to 16th January (both inclusive) was 38.6° and that from the 10th to 17th January (inclusive) was 39.2°. What was the temperature on 17th January?

Solution: Total temp. from 9th Jan. to 16th Jan.

$$= 38.6 \times 8^{\circ}\text{C}$$

$$= 308.8^{\circ}\text{C}$$

Since the temp. on 9th = 34.6°C

∴ Total temp. from 10th Jan. to 16 Jan.

$$= 308.8 - 34.6$$

$$= 274.2^{\circ}\text{C}$$

Total temp. from 10 to 17th Jan.

$$= 39.2 \times 8^{\circ}\text{C}$$

$$= 313.6^{\circ}\text{C}$$

∴ Temp on 17th Jan. = 313.6 - 274.2

$$= 39.4^{\circ}\text{C}$$

Example 2: A goods train in five successive minutes from its start runs 68 metres, 127 metres, 208 metres, 312 metres and 535 metres and for next five minutes in maintains average speed of 33 km/hr. Find the whole distance covered and the average speed of train in km/hour.

Solution: Distance covered in first five minutes.

$$= \frac{68 + 127 + 208 + 312 + 535}{1000} \text{ kms.}$$

$$= \frac{5}{4} \text{ kms.}$$

Now average speed for next five minutes
= 33 km/hr.

$$\therefore \text{Distance covered in next five minutes} = \frac{33 \times 5}{60} = \frac{11}{4} \text{ km}$$

$$\begin{aligned} \text{Total distance covered in 10 minutes} &= \frac{5}{4} + \frac{11}{4} = \frac{16}{4} \\ &= 4 \text{ kms. Ans.} \end{aligned}$$

$$\begin{aligned} \text{Average speed} &= \frac{4}{10} \text{ km/min.} \\ &= \frac{4}{10} \times 60 \\ &= 24 \text{ km/hr. Ans.} \end{aligned}$$

Example 3: The average salary per head of all the workers of an institution is Rs. 60. The average salary per head of 12 officers is Rs. 400. The average salary per head of the rest is Rs. 56. Find the total no. of workers in the institute.

Solution: Let the total No. of workers = x

$$\therefore \text{Total salary drawn} = 60x \quad \dots\dots\dots(i)$$

$$\text{Salary of 12 officers} = 12 \times 400 = 4800 \text{ Rs.}$$

$$\text{// // // // the rest} = (x - 12) \times 56$$

$$\begin{aligned} \text{Hence total salary of the workers} \\ &= (x - 12)56 + 4800 \quad \dots\dots\dots(ii) \end{aligned}$$

Equating (i) and (ii)

$$\begin{aligned} 60x &= 4800 + 56x - 672 & \Rightarrow & 4x = 4128 \\ & & \Rightarrow & x = 1032 \text{ Ans.} \end{aligned}$$

Multiple Choice Questions (MCQs)

- Q1. The average of even integers from 2 to 100 inclusive is:
(A) 49 (B) 52
(C) 51 (D) 50
- Q2. What is the average of first hundred natural numbers?
(A) 50 (B) 50.5
(C) 49.5 (D) 100
- Q3. What is the average of x, y and z ? If $x + y = 5, y + z = 8$ and $x + z = 11$.
(A) $\frac{11}{3}$ (B) $\frac{1}{2}$
(C) $\frac{13}{5}$ (D) 4
- Q4. The average of five numbers is 54. If three of the numbers are 26, 28 and 30, what is the average of the other two?
(A) 91 (B) 93
(C) 54 (D) 186

Explanatory Answer

- Q1. (C) As sum of the first n even numbers = $n(n + 1)$
Now, the sum of even numbers from 2 to 100 is

$$2 + 4 + 6 + 8 + \dots + 100 \text{ (or 50 even number)}$$

$$= 50(50 + 1) = 2550$$

$$\text{Average} = \frac{\text{Sum of numbers}}{\text{Number of terms}}$$

$$= \frac{2550}{50} = 51$$

Q2. (B) The first 100 natural numbers are $\{1, 2, 3, \dots, 100\}$

Now, sum of all the first n numbers = $\frac{n(n+1)}{2}$

$$\text{Sum of first 100 natural numbers} = \frac{100(100+1)}{2}$$

$$= 5050$$

Now, average = $\frac{\text{Sum of numbers}}{\text{Number of terms}}$

$$= \frac{5050}{100} = 50.5$$

Shortcut: The average of first " n " natural number is $\frac{n+1}{2}$

Thus, average = $\frac{100+1}{2} = \frac{101}{2} = 50.5$

Q3. (D) Adding the given three equations:

$$(x+y) + (y+z) + (z+x) = 5 + 8 + 11$$

$$2x + 2y + 2z = 24$$

$$2(x+y+z) = 24$$

Dividing both sides by 2

$$\text{Now average of } x, y, \text{ and } z \text{ is } \frac{x+y+z}{3} = \frac{12}{3} = 4$$

Q4. (B) Let the missing numbers be a and b , then by given condition,

$$\frac{a + b + 26 + 28 + 30}{5} = 54$$

$$a + b + 84 = 270 \text{ (Multiplying both sides by 5)}$$

$$a + b = 186$$

Hence average of a and b is

$$\frac{a+b}{2} = \frac{186}{2} = 93$$

Q1. The average of five numbers is 24. If three of the numbers are 26, 28 and 30, what is the average of the other two?

- (A) 21
- (B) 23
- (C) 24
- (D) 28

Q1. (C) As sum of the first n even numbers = $n(n+1)$

BUDGET EXPLAINER

Q. How is the deficit larger than the gap between revenues and expenditures?

A large amount of the revenues collected by the federal government are transferred to the provinces under an arrangement known as the National Finance Commission Award. This year that amount is Rs. 2874 billion. Since this is not technically an expense — only a transfer — it is not booked as an expenditure under public finance conventions. So it does not show up on the expenditure side of the budget. After making this transfer, the federal government expects that the provinces will run a surplus of Rs. 242 billion because they lack the capacity to utilise all the money that will be transferred to them. So the budget deficit will be calculated thus:

Q. Why does the deficit matter so much?

Ans. If the government spends more than it has, there are only three options to plug the gap. One is to literally print more money, but that fuels inflation because you have "more money chasing fewer goods." The second option is to borrow from the future, but this adds to the national debt and brings higher debt service costs the following year. The third option is to bill the citizens by raising taxes or raising funds through other means, such as power tariffs, which increases the burden on those who are already paying their taxes. Each of these options has its unpleasant consequences, and the larger the deficit, the greater the impact of these actions.

How fiscal deficit is calculated

Here's how the fiscal deficit is calculated: The government expects to collect gross revenues of Rs. 6,573 billion, which comprises both tax and non-tax revenues. From this, Rs. 2,874 bn are to be transferred to the provinces under the National Finance Commission Award. So net federal revenue are Rs. 3,699 bn.

At the same time, the centre expects the provinces to run a surplus of Rs. 242 bn, so this amount gets added to net federal receipts, which comes to Rs. 3,94 bn.

Subtracting the total expenditure of Rs. 7,136 bn. From this amount then yields the fiscal deficit of Rs. 3,195 bn. or 7pc of the GDP.

Small discrepancies of about Rs.1 bn. might creep into the numbers due to rounding errors in budget documents.

Q. What is the difference between "current" and "development" expenditures?

Ans. Current expenditures are required to meet running costs. Development expenditures are made in assets which will be used over the years. Think of paying your electricity bill as a current expense, while buying a refrigerator as a development expense. The government uses development expenditures to push economic growth, while current expenditures to pay its bills.

EVERY DAY SCIENCE (MCQs)

Right Answers are given in **BOLD**.

- (1) The planet of the solar system which has maximum number of Moon is:
(a) Jupiter (b) Venus
(c) Saturn (d) Uranus
(e) None of these
- (2) Sun is a:
(a) Planet (b) Comet
(c) Satellite (d) Aurora
(e) None of these
- (3) The age of the solar system is:
(a) 4.5 billion years
(b) 5.5 billion years
(c) 6.5 billion years
(d) 7.5 billion years
(e) None of these
- (4) A unit length equal to the average distance between the Earth and Sun is called:
(a) Light year
(b) **Astronomical Unit**
(c) Parsec (d) Parallax
(e) None of these
- (5) An eclipse of the Sun occurs when:
(a) **The Moon is between the Sun and the Earth**
(b) The Sun is between the Earth and the Moon
(c) The Earth is between the Sun and the Moon
(d) The Earth casts its shadow on the Moon
(e) None of these
- (6) The ozone layer protects the Earth from rays sent down by the Sun:
(a) **Ultraviolet rays**
(b) Infrared rays
(c) Gamma rays
(d) Radioactive rays
(e) None of these
- (7) The ozone layer is present about 30 miles (50 Km) in atmosphere above the Earth. The stratum (layer) of atmosphere in which ozone layer lies is called as:
(a) Exosphere
(b) Mesosphere
(c) **Stratosphere**
(d) Ionosphere
(e) Troposphere
- (8) Which rocks are formed by the alternation of pre-existing rocks by great heat or pressure?
(a) Igneous rocks
(b) Sedimentary rocks
(c) **Metamorphic rocks**
(d) Acid rocks
(e) Basic rocks
- (9) The most abundant natural Iron Oxides are:
(a) Magnetite and Pyrite
(b) Magnetite and Bauxite
(c) Hematite and Pyrite
(d) **Hematite and Magnetite**
(e) Hematite and Bauxite
- (10) The two most abundant elements in sea water are:
(a) Sodium and Potassium
(b) Sodium and Calcium
(c) **Sodium and Chlorine**
(d) Chlorine and Iodine
(e) Magnesium and Sulphur

- (11) An electric current can produce:
- (a) Chemical effect (b) Magnetic effect
(c) Heating effect (d) All of three
(e) None of these
- (12) The unit of home electricity energy consumption is:
- (a) Watt hour (b) Kilowatt hour
(c) Joule hour (d) None of these
- (13) The magnet always points in the same direction, if allowed to move freely i.e. towards North and South poles, because of:
- (a) Gravitational field
(b) A lot of metal deposits on North and South Poles
(c) Due to attraction of North Pole and repulsion of Western Pole
(d) Earth is huge magnet
(e) None of these.
- (14) When sound is reflected from floor, ceiling or a wall, it mixes with the original sound and changes its complexion, it is called as:
- (a) Sound (b) Echo
(c) Reverberation (d) Noise
(e) None of these
- (15) The speed of sound in dry air at 20°C is about:
- (a) 130 meters per second
(b) 230 meters per second
(c) 330 meters per second
(d) 430 meters per second
(e) None of these
- (16) The speed of light in vacuum:
- (a) 300 Million meters per second
(b) 300 Million meters per hour
(c) 300 Million kilometres per second
(d) 300 Million kilometres per hour
(e) None of these
- (17) The time, light takes from the Sun to reach Earth is:
- (a) 8 minutes (b) 25 minutes
(c) 45 minutes (d) 48 minutes
(e) None of these
- (18) Light from the Sun travels a distance before it reaches the Earth:
- (a) 50 million Km
(b) 100 million Km
(c) 150 million Km
(d) 200 million Km
(e) None of these
- (19) The most suitable thermometer for measuring the boiling point of water is:
- (a) Mercury thermometer
(b) Alcohol thermometer
(c) Bimetallic thermometer
(d) Liquid crystal thermometer
(e) None of these
- (20) The density of water is greatest at:
- (a) -30°C (b) 0°C
(c) 4°C (d) 100°C
(e) None of these
- (21) Which one of the following statements is true?
- (a) Gases do not conduct heat
(b) The best conductors are non-metals
(c) Conduction currents occurs only in liquids
(d) A vacuum cannot conduct heat
(e) None of the statements is true.
- (22) Ice can be changed to water by:
- (a) Adding more water molecules
(b) Changing the motion of the water molecules
(c) Rearranging the atoms in water molecules

(d) Destroying the atoms in water molecules

(e) None of these

(23) The building block of elements are called:

(a) Atoms

(b) Molecules

(c) Compounds

(d) Isotopes

(e) None of these

(24) Boiling of an egg is a change which is:

(a) Physical

(b) Chemical

(c) Physiological

(d) Morphological

(e) None of these

(25) The temperature of liquid Nitrogen is:

(a) -32°C

(b) -80°C

(c) -100°C

(d) -196°C

(e) None of these

(26) Which one of the following is an alkali?

(a) Water

(b) Vinegar

(c) Lemon juice

(d) Slaked lime

(e) None of these

(27) If an alkali is slowly mixed to an acidic solution, the pH of the acidic solution will:

(a) Increase

(b) Decrease

(c) Increase to 7 and then decrease

(d) Decrease to 7 and then increase

(e) Will remain same.

(28) The usual raw material for ceramics, generally found beneath the top soil is?

(a) Sand

(b) Silt

(c) Clay

(d) Plaster of Paris

(e) Melamine

(29) Polyamides are synthetic polymers commonly known as:

(a) Synthetic rubber

(b) Nylon

(c) Cellulose

(d) Protein

(e) None of these

(30) Telephone was invented in 1876 in America by:

(a) Marconi

(b) Galileo

(c) John Beard

(d) Edison

(e) Graham Bell

(31) Information can be sent over long distance in the form of:

(a) Electrical signals through wires

(b) Light signals through optical fibre

(c) Radio waves through air

(d) Any combination of these three

(e) None of these

(32) Information can be stored in:

(a) Audio and video cassettes

(b) Floppy and compact discs

(c) Hard disks

(d) Laser and Optical disks

(e) All of these four

(33) Computer can:

(a) Add and subtract information only

(b) Add, subtract and sort information only

(c) Add, subtract, sort and classify information

(d) Add and subtract but cannot sort information

(e) Add, subtract and sort but cannot classify information.

(34) IBM stands for:

(a) International Business Machines

(b) International Big Machines

(c) International Business Machines

(d) Interrelated Big Machines

(e) None of these

- (35) Chemicals used to kill weeds are called as:
- (a) Insecticides (b) Fungicides
(c) Herbicides (d) Fumigants
(e) None of these.
- (36) The cytoplasm consists of several types of structures, which are called:
- (a) Protoplasm (b) Nucleus
(c) Cytochromes (d) Organelles
(e) None of these
- (37) The structure of DNA was elaborated by Watson and Crick in:
- (a) 1909 (b) 1923
(c) 1945 (d) 1953
(e) None of these
- (38) In a DNA molecule, the rule for base pairing is:
- (a) Adenine always bound with thymine and cytosine with guanine
(b) Adenine always bound with cytosine and thymine with guanine
(c) Adenine always bound with guanine and cytosine with thymine
(d) Adenine always bound with uracil and cytosine with guanine
(e) None of these
- (39) Man belongs to the family:
- (a) Felidae (b) Hominidae
(c) Mammalia (d) Primataceae
(e) None of these
- (40) Deficiency of vitamin C in the human body causes a deficiency disease called:
- (a) Beriberi
(b) Night blindness
(c) Rickets
(d) Scurvy
(e) None of these
- (41) To measure the specific gravity of milk, the instrument used is:
- (a) Hygrometer (b) Barometer
(c) Lactometer (d) Hydrometer
(e) None of these
- (42) One of the fundamental characteristics of living organisms is called as:
- (a) Photosynthesis (b) Digestion
(c) Excretion (d) Metabolism
(e) None of these
- (43) Plants growing on other plants are called as:
- (a) Saprophytes (b) Parasites
(c) Epiphytes (d) Pathogens
(e) None of these
- (44) As per eating habit, squirrels are:
- (a) Frugivorous (Fruit eater)
(b) Herbivorous (Plant eater)
(c) Carnivorous (Animal eater)
(d) Omnivorous (Plants + animal eater)
(e) Insectivores (Insect eater)
- (45) Water loss from leaves through stomata is called as:
- (a) Evaporation (b) Transpiration
(c) Evapo-Transpiration (d) Respiration
(e) None of these
- (46) The study of how plants and animals interact with one another with the non-living environment is called as:
- (a) Ecosystem (b) Sociology
(c) Ecology (d) Habitat
(e) None of these
- (47) The number of bones in human body is:
- (a) 200 (b) 202
(c) 204 (d) 206
(e) None of these
- (48) Nervous system in human body consists of:

- (a) Brain and spinal cord
- (b) Brain and nerves
- (c) Spinal cord and nerves
- (d) Brain, spinal cord and nerves
- (e) None of these

(49) In human eye, the light sensitive layer made of specialized nerve cells, the rods and cones is called as:

- (a) The pupil
- (b) The cornea
- (c) The sclera
- (d) The iris
- (e) The retina

(50) Erythrocytes are also called as:

- (a) Red blood cells
- (b) White blood cells
- (c) Platelets
- (d) Plasma
- (e) None of these

(51) A scientific method will seek to explain natural events and make useful prediction in

- (a) A haphazard manner
- (b) A manner design to fit the theorist's or experimenter's bias
- (c) A consistently reproducible manner
- (d) None of these

(52) "Truth is the sought for its own sake and those who are engaged upon the quest for anything for its own sake are not interested in other things. Finding the truth is difficult and the road to it is rough." This was stated by which key figure in the development of scientific method in the 11th century?

- (a) Aristotle
- (b) Ibn al Haytham
- (c) Plato
- (d) None of these

(53) Abu Abdullah Muhammad Bin Musa al-Khwarizmi is famous for writing the "Kitab al Jaber Wal Muqabla" in which he

- (a) Presented the first systematic solution of linear and quadratic equations
- (b) Delineated methods of oppression and competition
- (c) Wrote the laws of optics
- (d) None of these

(54) Galileo Galille was persecuted by the catholic church for suspicion of holding the view that:

- (a) Objects of different masses fell at the same velocity
- (b) The Sun revolves around the Moon
- (c) The Earth was probably not the centre of the universe
- (d) None of these

(55) The proliferation of education and dissemination of knowledge in the last two centuries has led to a faith in science that:

- (a) Causes human beings to turn on other human beings
- (b) Is the main cause of poverty and war
- (c) Leads to oppression of education
- (d) None of these

(56) Science attempts to:

- (a) Explain how the universe works by discovering the laws regulating everything around us
- (b) Use discovered laws to engineer new devices
- (c) Both a & b
- (d) None of these

(57) Ibn Zuhr, the author of Al Taisir, is known as:

- (a) The father of experimental surgery
- (b) The founder of calculus
- (c) A biographer of provincial governors
- (d) None of these

- (58) Ibn Khaldun's Muqqadimah is regarded by many as:
- The first work dealing with a philosophy of history
 - A minor footnote in his writings
 - A well-documented tale of his trial
 - None of these
- (59) A physical, mathematical or logical representation of a natural phenomenon is called
- Phenomenal
 - A scientific model
 - A theoretical postulate
 - None of these
- (60) ISSAC Newton and Gottfried Leibniz working independently in the 17th century laid the foundation of classical physics and are known as fathers of
- Astrology
 - Relativistic theory
 - Integral & differential calculus
 - None of these
- (61) A light year is
- A year devoid of heavy rainfall
 - The time taken by light to be generated & propagated from the centre of the Sun to our Earth
 - The distance covered by light in one of our solar years
 - None of these
- (62) Our Sun is classified as
- A blue giant
 - A yellow dwarf
 - Supernova
 - None of these
- (63) The Sun produces most of its energy by:
- Nuclear fusion which involves converting "H" to "He"
 - Nuclear fission involving the burning of uranium & plutonium
 - Nuclear fission involving the combining of uranium and palladium
 - None of these
- (64) Which of the following is the correct ordering of the inner planets according to their proximity to the Sun?
- Jupiter, Saturn, Uranus, Neptune
 - Phobos, Deimos, Europa, Tias
 - Mercury, Venus, Earth, Mars
 - None of these
- (65) How long does our Earth take to turn about its axis
- One hour
 - 23 Hours
 - 24 Hours
 - None of these
- (66) Tides are generated by
- The movements of ships in the oceans
 - The gravitational effect of Moon and Sun on our Earth
 - The movements of the Earth around the Sun
 - None of these
- (67) Seasons are generated by
- The movement of Sun around co-axes of the milky way
 - The movement of the Earth around the Sun
 - Relativistic quantum
 - None of these
- (68) Although the mass of a man on Moon remains same as on the Earth, he will
- Be much happier there
 - Weigh one sixth as much
 - Weigh twice as much
 - None of these

- (69) If we are at sea level our atmosphere presses down on us with a pressure of:
- (a) 1 Fps (b) 14.3 Fps
(b) 35.8 Fps (d) None of these
- (70) The efficiency of a machine is
- (a) Always greater than 100%
(b) Always less than 100 %
(c) Always 100% (d) None of these
- (71) A material with high elasticity
- (a) Does not return to its original shape upon being stretched and then released
(b) Returns as close as possible to its original shape upon being stretched and then released
(c) Can be stretched to infinite distances
(d) None of these
- (72) Matter and energy
- (a) Can be converted from one to the other
(b) When taken together, converted in all processes in a closed system
(c) Both a & b
(d) None of these
- (73) Electric current
- (a) Flows from a higher potential to lower potential
(b) Is caused by flow of electrons
(c) Both a & b
(d) None of these
- (74) Electricity and magnetism are
- (a) Two facets of the same force
(b) Always opposed to each other
(c) Both a & b (d) None of these
- (75) Ball bearings help wheels and other rotating objects
- (a) Move without consuming any energy
(b) Rotate more easily and with less friction
(c) Both a & b
(d) None of these
- (76) Photography works by
- (a) Capturing the souls of the objects being photographed
(b) Capturing light reflected from the object being photographed
(c) Both a & b
(d) None of these
- (77) Arthur C. Clarke, the famous science fiction author, while working as a radio operator in the British army in World War-II
- (a) Proposed building a space elevator from carbon mono-filaments
(b) Postulated the existence of extra-terrestrial artefacts on the Moon
(c) Proposed that a network of satellites in stationary orbit at very high altitudes around the Earth be used to bounce communication signals all over the world
(d) None of these
- (78) The Sino Pakistani JF-17 thunder aircraft:
- (a) Is a commercial transport aircraft
(b) Is neither built nor assembled in Pakistan
(c) Has no stealth features in its engine inlets or elsewhere
(d) None of these
- (79) Communication satellites are in
- (a) Geostationary orbit
(b) Geosynchronous orbit
(c) Semi-synchronous orbit

- (d) None of these
- (80) RAM of a computer refers to:
- Read Access Memory
 - Right Access Memory
 - Random Access Memory
 - None of these
- (81) Which of the following is responsible for transporting oxygen in the blood?
- White blood cells-----wbc
 - Neutrophils
 - Red blood cells-----rbc
 - None of these
- (82) Which of the following is true for hormones?
- All proteins are hormones
 - All hormones are proteins
 - All hormones are amino acids
 - None of these
- (83) Prokaryotes have which of the following structures?
- Nucleus (b) Mitochondria
 - Chloroplast (d) None of these
- (84) Diversity in which of the following groups is not due to artificial selection?
- Wheat (b) Dogs
 - Cotton (d) None of these
- (85) Arachnophobia refers to a fear of
- Spiders (b) Snakes
 - Bats (d) None of these
- (86) Which of the following is a part of DNA?
- DGTP
 - Dadp
 - Dtup
 - None of these
- (87) In humans the "y" chromosome is passed to the next generation from
- Father to son (b) Mother to son
 - Father to daughter
 - None of these
- (88) Which of the following is a mammal?
- Blue tuna (b) Sword fish
 - Whale (d) None of these
- (89) Female ova are:
- Haploid (b) Diploid
 - Triplod (d) None of these
- (90) Which of the following is not a part of DNA?
- Thymine (b) Adenine
 - Tibose (d) None of these
- (91) Which of the following is labelled as "good cholesterol" for humans?
- High-density lipoprotein----- -hdl
 - Low density lipoprotein----- -ldl
 - Very low density lipoprotein ----- vldl
 - None of these
- (92) Which of the following is an infectious disease?
- Deafness (b) Blindness
 - Baldness (d) None of these
- (93) Which of the following is a non-essential amino acid?
- Alanine
 - Methenamine
 - Tyrosine
 - None of these
- (94) Starting from higher choose the correct sequence of molecules in order of energy yeilding
- Sugar, fats, protein

- (b) Protein, sugar, fats
(c) Fats, sugar, protein
(d) None of these
- (95) Which of the following is not a part of protein?
(a) Glutamic acid (b) Sulphuric acid
(c) Aspartic acid (d) None of these
- (96) The highest source of omega-3 fatty acid is
(a) Fish oil (b) Corn oil
(c) Sunflower oil (d) None of these
- (97) Which of the following gas is essential for human?
(a) Carbon dioxide (b) Nitrogen
(c) Oxygen (d) None of these
- (98) Proteins are made up of
(a) Polynucleotide (b) Polypeptide
(c) Polyacetylene (d) None of these
- (99) Schizophrenia is a mental disease with the following symptoms
(a) Disorganized speech
(b) Hallucinations
(c) Delusions
(d) All of the above
- (100) Which of the following are founded in the nucleus?
(a) Lysosomes
(b) Chromosomes
(c) Ribosomes (d) None of these
- (101) Who proposed the concept "All motion is relative"?
(a) Albert Einstein (b) John Kepler
(c) Galileo Galilie (d) None of these
- (102) The field of specialization of famous Muslim scientist Abu Usman al-Jahiz was:
(a) Botany (b) Zoology
(c) Astronomy (d) None of these
- (103) Albatros is:
(a) A sea bird (b) A beetle
(c) A fruit (d) None of these
- (104) The Sunlight can reach a depth of meters in the ocean:
(a) 100 (b) 80
(c) 120 (d) None of these
- (105) The biggest planet in our solar system is:
(a) Venus (b) Pluto
(c) Jupiter (d) None of these
- (106) The biggest species of the cat family is:
(a) Tiger (b) Lion
(c) Leopard (d) None of these
- (107) Which group of animals has heterogametic females?
(a) Domestic fowl (b) Earthworm
(c) Rabbit (d) None of these
- (108) The dominant phase of life cycle in these organism is haploid:
(a) Mosses (b) Bacteria
(c) Protoza (d) None of these
- (109) The atmosphere of Moon consists of:
(a) 90% Hydrogen, 10% Nitrogen
(b) 80% Nitrogen, 20% Hydrogen
(c) 60% Nitrogen, 40% inert gases
(d) None of these
- (110) The chemical name of quartz is:
(a) Silicon Dioxide (SiO_2)
(b) Stannous Oxide
(c) Aluminium Oxide
(d) None of these
- (111) Which month of calendar year can lack a new Moon?
(a) December (b) February
(c) May (d) None of these
- (112) Deuterium differs from Hydrogen in having:

- (a) Different atomic number but same atomic weight
 (b) Different atomic number and different atomic weight
 (c) Same atomic number and different atomic weight
 (d) None of these
- (113) One of the following is a water soluble vitamin:
 (a) Vitamin A (b) Vitamin D
 (c) Vitamin K
 (d) None of these (Vitamin C & B)
- (114) Coulomb is the scientific unit to measure:
 (a) Velocity (b) Temperature
 (c) Mass (d) None of these
- (115) Equator passes through one of these countries:
 (a) Saudi Arabia (b) Italy
 (c) Japan
 (d) None of these
- (116) Anti-Diuretic hormone is secreted by one of the following glands:
 (a) Pituitary (b) Pancreas
 (c) Thyroid (d) None of these
- (117) Basha Dam is to be constructed on:
 (a) River Sutlaj (b) River Jhelum
 (c) River Chenab
 (d) None of these (River Indus)
- (118) UV light falls in the category of:
 (a) Ionizing Radiations
 (b) Non Ionizing Radiation
 (c) Visible light (d) None of these
- (119) The Earth'sis divided into 15 major plates of various sizes:
 (a) Mesosphere (b) Stratosphere
 (c) Lithosphere (d) None of these
- (120) One of these scientists formulated basic laws of Geometry:
 (a) Pythagoras (b) Archimedes
 (c) Aristotle (d) None of these
- (121) Phosphorus is an essential component of one of the following biological molecules:
 (a) Amino acids (b) Nucleic acids
 (c) Carbohydrates (d) None of these
- (122) He was the first scientist to prove that plants move around the Sun:
 (a) Archimedes (b) Galileo Galilee
 (c) John Kepler (d) None of these
- (123) Atom is made up of different kinds of subatomic particles:
 (a) Three (b) Two
 (c) Four (d) None of these
- (124) Uranium is best used as nuclear fuel in one of the following forms:
 (a) U 235 (b) U 237
 (c) U 238 (d) None of these
- (125) The alpha particles are compact clusters of:
 (a) Electron and Proton
 (b) Two Protons and two Neutrons
 (c) Three protons and three Neutrons
 (d) None of these
- (126) The Beta particles are fast moving
 (a) Protons (b) Electrons
 (c) Neutrons (d) None of these
- (127) One of the following countries produces maximum energy from atomic reactors:
 (a) France (b) USA
 (c) UK (d) None of these
- (128) The unit to measure the quantity of Ozone in atmosphere is
 (a) Dobson (b) Dalton
 (c) Coulomb (d) None of these

- (129) The severity of 2005 Earthquake in Pakistan on Richter scale was
 (a) 6.9 (b) 7.6
 (c) 7.1 (d) None of these
- (130) Geiger-Muller counter is used to detect:
 (a) Protons (b) Neutrons
 (c) Photons (d) None of these
- (131) Vacuum tubes have been replaced by:
 (a) Conductors (b) Diodes
 (c) Transistors (d) None of these
- (132) Dacron is
 (a) Polyethylene (b) Epoxy
 (c) Polyamide (d) None of these
- (133) It is a secondary plant nutrient:
 (a) Nitrogen (b) Phosphorus
 (c) Sulphur (d) None of these
- (134) An area of microbiology that is concerned with the occurrence of disease in human population is
 (a) Immunology (b) Parasitology
 (c) Epidemiology (d) None of these
- (135) The number of electrons of a neutral atom is automatically known if one knows the:
 (a) Atomic number (b) Atomic weight
 (c) Number of orbitals (d) None of these
- (136) Which of the following is not an enzyme?
 (a) Chymotrypsin (b) Secretin
 (c) Pepsin (d) None of these
- (137) It is impossible for a type of O+ baby to have a type of..... mother:
 (a) AB- (b) O-
 (c) O+ (d) None of these
- (138) Serum is blood plasma minus its:
 (a) Calcium ions (b) Clotting proteins
 (c) Globulins (d) None of these
- (139) The autonomic nervous system innervates all of these except:
 (a) Cardiac muscles (b) Skeletal muscles
 (c) Smooth muscles (d) None of these
- (140) The damage to the..... nerve could result in the defect of the eye movement:
 (a) Optic (b) Trigeminal
 (c) Abducens
 (d) None of these (Cranial nerve)
- (141) Which of these is not a region of the spinal cord?
 (a) Thoracic (b) Pelvic
 (c) Lumbar (d) None of these
- (142) The shape of the external ear is due to:
 (a) Elastic cartilage (b) Fibrocartilage
 (c) Articular cartilage (d) None of these
- (143) The external surface of the stomach is covered by
 (a) Mucosa (b) Serosa
 (c) Parietal peritoneum
 (d) None of these
- (144) Which of the following is not a human organ system?
 (a) Integumentary (b) Muscular
 (c) Epithelial (d) None of these
- (145) Which of the following does not vary predictably with the depth of the aquatic environment?
 (a) Salinity (b) Temperature
 (c) Penetration by Sunlight
 (d) None of these

- (146) The quantity of available nutrientsfrom the lower levels of the energy pyramids to the higher ones.
 (a) Increases (b) Decreases
 (c) Remains stable (d) None of these
- (147) Which of the following is not a major sub division of the biosphere?
 (a) Hydrosphere (b) Stratosphere
 (c) Lithosphere (d) None of these
- (148) Vaccination is synonymous with immunity.
 (a) Natural active (b) Artificial passive
 (c) Artificial active (d) None of these
- (149) When a patient's immune system becomes reactive to a drug, this is an example of:
 (a) Super infection (b) Drug resistance
 (c) Allergy (d) None of these
- (150) What is the smallest unit of heredity?
 (a) Chromosomes (b) Gene
 (c) Nucleotides (d) None of these
- (151) The echo of Big Bang can be heard in the form of:
 (a) Cosmic rays
 (b) Gamma rays
 (c) Microwave radio signals
 (d) Infrared radiations
- (152) Omar Khyyam was a:
 (a) Poet (b) Mathematician
 (c) Astronomer (d) All of these
- (153) Who was the early dentist and also inventor of many surgical instruments:
 (a) Avicenna (b) Al-Zahrawi
 (c) Ibn-ul-haithem (d) Al-Jahiz
- (154) who was the first Muslim mathematician who used " Zero " :
 (a) Ibn-E-Baitar (b) Ibn-e-Rushd
 (c) Ibn-Al-Haitham (d) Al Khwarizmi
- (155) Why some nebulae shine?
 (a) Because they emit light
 (b) Due to burning process
 (c) Because they contain bright stars
 (d) Because they reflect light
- (156) A shooting star is
 (a) Sun (b) A comet
 (c) A meteor (d) An asteroid
- (157) A 'clinical death' takes place when:
 (a) There is no pulse
 (b) There is no heart beat
 (c) Pupils are fixed and dilated and there is no reaction to light
 (d) All of above
- (158) What is Hubble Classification :
 (a) Classification of stars
 (b) Classification of planets
 (c) Classification of galaxies
 (d) Classification of earth's zones
- (159) Sun rises in the east and sets in the west due to the:
 (a) Shape of earth
 (b) Rotation of earth around the sun
 (c) Rotation of earth on its axis
 (d) Movement of the sun
- (160) What are cyclones?
 (a) Sudden heavy floods
 (b) No rain for a long period
 (c) Heavy showers
 (d) Violent wind and rain
- (161) From ecological point of view human beings are taken as:
 (a) Decomposer (b) Consumers
 (c) Producers (d) All of these
- (162) The major cause of land pollution is:
 (a) Pesticides (b) Chemical fertilizers

(c) Insecticides (d) All of these

(163) The sharp-bitter taste of unripe fruits is due to high concentration of:

- (a) Phenolic compounds
- (b) Volatile compounds
- (c) Organic acids (d) Starch

(164) The use of antibiotic is a very effective way of killing disease causing bacteria. Sometime people don't finish all of their pills. This can result in:

- (a) Some bacteria left unkilld
- (b) Production of more bacteria
- (c) Bacteria becoming sensitive to antibiotics
- (d) Bacteria becoming resistant to antibiotics

(165) Flesh eaters are called:

- (a) Omnivores (b) Carnivores
- (c) Herbivores (d) Scavengers

(166) Chromosomes are made up of:

- (a) DNA only (b) DNA & RNA
- (c) Proteins only
- (d) DNA, RNA & Proteins

(167) Plants can be made disease resistant by:

- (a) Heat Treatment
- (b) Hormone treatment
- (c) Colchicine treatment
- (d) Breeding with their wild relatives

(168) Important ingredient used in Vicks vapor rub is obtained from the plant:

- (a) Cinnamomum Camphora
- (b) Cinamomum zelamicum
- (c) Curaima longa
- (d) All of these

(169) Which of the following is both endocrine and exocrine gland:

- (a) Thyroid (b) Pancreas
- (c) Parathyroid (d) All of these

(170) The process by which small amount of impurities are added into a semiconductor is called:

- (a) Addition (b) Conduction
- (c) Doping (d) Insulating

(171) Which of the following is a semiconductor?

- (a) Mercury (b) Magnesium
- (c) Silver (d) None of these

(172) Silver fish belongs to:

- (a) Fish (b) Insect
- (c) Reptile (d) Amphibian

(173) Satiety is the condition in which patient lacks desire to:

- (a) Drink (b) Eat
- (c) Sleep (d) Talk

(174) Function of iron in our body is:

- (a) Provide strength
- (b) Oxygen transport
- (c) Help in hydrolysis
- (d) Breakdown fats

(175) The non-communicable disease is called:

- (a) Endemic (b) Acute
- (c) Chronic (d) Innate

(176) Vitamins A,D,E and K are called:

- (a) Water soluble vitamins
- (b) Primary vitamins
- (c) Basic vitamins
- (d) Fat soluble vitamins

(177) Which is not a function of HCL in stomach:

- (a) Softening fibrous food elements
- (b) Promoting formation of pepsin
- (c) Killing bacteria ingested with food and drink
- (d) Breakdown proteins into peptones

- (178) The sum of the kinetic energy and potential energy of an oscillating body is
- Maximum in the beginning
 - Constant at all points
 - Maximum at midway of the path
 - Minimum in the beginning
- (179) Which term in psychology is generally used to refer to emotional disorders such as, anxiety, depression and phobia:
- Psyches
 - Hypnosis
 - Neurosis
 - Mental illness
- (180) All alkali metals react with water to form:
- Oxides
 - Peroxides
 - Hydroxides
 - Hyper oxides
- (181) Permanent hardness of water is due to the presence of
- Calcium bicarbonate
 - Magnesium bicarbonate
 - Calcium sulphate
 - Sodium bicarbonate
- (182) LASER is an acronym for:
- Light Amplification by Standard Emission of Light
 - Light Absorption Stimulated Entrance of Radiation
 - Light Amplification by Stimulated Emission of Radiation
 - Light Absorption by Standard Emission of Radiation
- (183) If carbon dioxide is passed through lime water for a long time, the cloudy white colour (initially formed) disappears because of the formation of:
- Calcium bicarbonate
 - Calcium hydroxide
 - Calcium carbonate
 - Calcium sulphate
- (184) Articles made of copper and bronze slowly tarnish in air and turn green, the green colour is due to the formation of:
- Copper oxide
 - Copper sulphide
 - Copper oxalate
 - All of these
- (185) Bleaching powder loses its power on keeping for a long time because
- It changes into calcium hypochlorite
 - It changes into calcium chloride and calcium hydroxide
 - It absorbs moisture
 - It changes into calcium chloride and calcium chlorate
- (186) When the quantity of charge on each of the two bodies is doubled, the force between them becomes
- One fourth
 - One half
 - Twice
 - Four times
- (187) Light year is related to:
- Time
 - Distance
 - Energy
 - Speed
- (188) The word ceramic means:
- Hard material
 - Soft material
 - Dry material
 - Burnt material
- (189) The operation of solar cell is based on
- Laser technology
 - Photoconduction
 - Thermal emission
 - Tyndall effect
- (190) The minimum number of bits required to store hexadecimal number AF is
- 2
 - 4
 - 8
 - 16
- (191) Which of the following minerals is most resistant to chemical weathering
- Olivine
 - Quartz
 - Hornblende
 - Potassium feldspar
- (192) An igneous rock contains a radioactive isotope that has a half-life of 10 million years. Careful analysis shows that only one quarter of the original concentration of the parent isotope is left. How old is this igneous rock?
- 10 Million years
 - 20 Million years
 - 30 Million years
 - 40 Million years

- (193) The discipline which deals with the understanding and treatment of mental health is called:
- (a) Applied psychology
(b) Clinical psychology
(c) Psychoanalysis (d) Psychiatry
- (194) Overcooking of food should be avoided because overcooking:
- (a) Makes the food difficult to digest
(b) Makes the food toxic
(c) Increase the nutritive value of food
(d) Reduces the nutritive value of food
- (195) Optical fibre operates on the principle of:
- (a) Tyndal effect
(b) Photoelectric effect
(c) Laser technology
(d) Total internal reflection
- (196) The sensation of the skin is perceived by:
- (a) Epidermis (b) The dermis
(c) Endodermis
(d) None of these
- (197) The loudness of sound depends on its
- (a) Wavelength (b) Frequency
(c) Amplitude (d) All of these
- (198) A person standing in front of a mirror finds his image smaller than him and erect. this implies that the mirror is:
- (a) Plane (b) Concave
(c) Convex (d) Not of good quality
- (199) The densities of three liquids are D , $2D$, $3D$. What will be the density of the resulting mixture if equal volumes of the three liquids are mixed?
- (a) $1.5D$ (b) $2D$
(c) $3D$ (d) $6D$
- (200) Which of the following is a conventional designation of pre-released software?
- (a) Raw (b) Alpha
(c) Omega (d) Beta Note:
- (201) An area of flat, low-lying land adjacent to an ocean
- (a) Bay (b) Coastal Bay
(c) Coastal Island (d) Coastal Plane
- (202) Galileo discovered that falling bodies have same:
- (a) Speed (b) Velocity
(c) Acceleration (d) Level
- (203) The change in frequency of a wave for an observer moving relative to its source is called:
- (a) Blue Shift (b) Resonance
(c) Effect
(d) Doppler's Shift
- (204) The source of energy for brain is:
- (a) Glial cells
(b) Pyramidal cells
(c) Ketones
(d) Synapses
- (205) The ready source of energy for athletes is:
- (a) Carbohydrates (b) Fats
(c) Vitamins (d) Proteins
- (206) Arthritis is:
- (a) A condition that effects joints,
(b) More common among adults,
(c) A disease that can impair a person's ability to perform everyday tasks,
(d) All of these
- (207) Dengue is caused by:
- (a) Family of viruses that are transmitted by mosquitoes,
(b) Infection,
(c) High blood pressure,
(d) None of these
- (208) The solid and liquid can be separated by the process of:
- (a) Distillation (b) Filtration
(c) Paper Chromatography
(d) Fractional distillation
- (209) The composition of sun is
- (a) 80 % Hydrogen and 20% Helium
(b) 95 % Hydrogen and 5% Helium
(c) 90 % Hydrogen and 10% Helium
(d) 50 % Hydrogen and 50% Helium
- (210) Accessory gland of digestive system close to duodenum is:

- (a) Pancreas
 (b) Salivary Gland
 (c) Gall Bladder Gland
 (d) Parotid Gland
- (211) Fat soluble vitamins are:
 (a) A and D
 (b) E
 (c) K (d) All of these
- (212) Protein content of edible part of egg is:
 (a) 12% (b) 20%
 (c) 23% (d) 30%
- (213) What is disease?
 (a) A disorder of structure or function in a body
 (b) A virus infection
 (c) Entomology
 (d) All of these
- (214) How Asthma is provoked:
 (a) Combination of genetic and environmental factors
 (b) Allergy
 (c) Genetics
 (d) All of these
- (215) Which material conduct heat and electricity:
 (a) Solid (b) Liquid

- (c) Metal (d) Gas
- (216) The fuel used in rockets is:
 (a) Liquid Methane Ethane (b) Liquid Ethane
 (c) Ethanol Oxygen (d) Liquid Oxygen
- (217) Chemical name of Table salt is:
 (a) Potassium Chloride
 (b) Sodium Chloride
 (c) Calcium Chloride
 (d) Magnesium Chloride
- (218) Milk is pasteurized because:
 (a) To give it a taste (b) To kill bacteria
 (c) To get fats (d) To make yoghurt
- (219) Gall bladder is part of which system:
 (a) Respiratory (b) Digestive
 (c) Reproductive (d) Circulatory
- (220) Genes in higher organism are located in:
 (a) DNA (b) RNA
 (c) mRNA
 (d) Chromosome

BASIC COMPUTER STUDIES

Right answers are given in **BOLD**.

COMPUTER HARDWARE

1. OS is short for ?
A. Optical Sensor
B. Order of significance
C. **Operating system**
D. Open software
2. In which printer device ribbon is used ?
A. Laser Printer
B. **Dot Matrix printer**
C. Plotter
D. Ink-jet printer
3. Address book contains?
A. Email address
B. Phone numbers
C. People Names
D. **All of the above**
4. "DOCOMO" is the abbreviation of
A. Do Communication Or More
B. Do Connect over Mobile
C. **Do Communications Over the Mobile network**
D. Dongle Communication Over Mobile
5. Joystick is used to
A. Move cursor on the screen
B. Computer games
C. **Both a and b**
D. None of these
6. A DNS translates a domain name into
A. Binary
B. Hex
C. **IP**
D. URL
7. When was the first e-mail sent ?
A. 1963
B. 1969
C. 1971
D. 1974
8. Which of the following type of memory is volatile?
A. ROM
B. Cache
C. **RAM**
D. Hard Drive
9. All of the below are iPhone 4 features except ?
A. 4G
B. Multitasking
C. Front facing camera
D. HD recording
10. What is the second name of Main Memory?
A. Auxillary memory
B. **Primery memory**
C. Seondry memory
D. All of above
11. A presentation means ?
A. Display of products
B. **Explaining the utility of products**
C. A surprize
D. Display of kills
12. The term CRM stand for ?
A. **Customer Relationship Management**
B. Customer's Relative Market
C. Customer Relation Module
D. Computer Root Market
13. What is the main advantage of using Switch in networks?
A. **To reduce the network traffic**

- B. To connect a computer directly to the internet
 C. To prevent the spread of all viruses
 D. To manage password security at the work station
14. What should be done to convert the configuration of an image from BMP to JPEG?
 A. Rename the image
 B. Expand the file
 C. Use the save as command
 D. Change the image extension
15. A company often updates a user reference guide. Various employees are puzzled about which of the printed text is the most recent. What quality should be included in the reference guide to get rid of this puzzlement?
 A. Copyright Information
 B. Data printed
 C. Version number
 D. Authors name
16. The term used for processing of comparison speed is
 A. FFTS
 B. CPS
 C. MPG
 D. MIPS
17. The data from a spreadsheet requires to be introduced into a database pack up. Which file format would be the most suitable to save the spreadsheet file ?
 A. CSV
 B. RTF
 C. HTML
 D. PDF
18. CD audio player uses what, for reproducing sound?
 A. Titanium Needle
 B. Quartz Cristal
 C. Laser Beam
 D. Ribbon tip
19. Which of the following would point out that the battery of motherboard has disastrous?
 A. Hardware settings get corrupted
 B. Operating system get lost
 C. Files on the hard disk are lost
 D. Hardware settings, including the present date reverts to default values
20. Which of the subsequent is important component of communication cycle ?
 A. A message
 B. An interpreter
 C. An internet connection
 D. An email account
21. In 1980's which country created the most used networking software?
 A. Novell
 B. Cisco
 C. IBM
 D. Microsoft
22. @ was selected for its use in email address in what year?
 A. 1972
 B. 1976
 C. 1980
 D. 1884
23. Which one of the following is an American computer company?
 A. IBM
 B. Compaq Corp
 C. Microsoft
 D. Dell
24. Who used punch cards to control patterns in a waving engine?
 A. Ohm
 B. Hollerith
 C. Babbage
 D. Jacquard
25. What does SSL abbreviation stands for?
 A. System socket layer
 B. Secure system login
 C. Secure socket layer

- D. Secure system login
26. The term MAC stands for?
 A. Memory address corruption
 B. A computer made by Apple
 C. Medlocre Apple Computer
 D. Media Access Control
27. What is the meaning of PPTP?
 A. Point to Point Transmission Protocol
 B. Point to Point Traffic Protocol
 C. Point to Point Transfer Protocol
 D. Point to Point Tunneling Protocol
28. The IBM PC-XT was the first to include a hard drive. What is the capacity of the IBMPC-XT?
 A. 550 KB
 B. 10 KB
 C. 200 KB
 D. 1.42 KB
29. Which person was the first who offered a definition of the term computer virus?
 A. Smith
 B. Cohen
 C. Ohm
 D. John
30. DTP is the abbreviation of?
 A. Desktop Publishing
 B. Data Type Programming
 C. Digital Transmission Protocol
 D. All Of the above
- COMPUTER NETWORKING**
31. The dialogue control / token management are accountability of
 A. Session layer
 B. Network layer
 C. Transport layer
 D. Physical layer
32. In OSI network model, the routing is performed by
 A. Network layer
 B. Data link layer
 C. Transport layer
 D. Physical layer
33. Which of the following device executes modulation and demodulation?
 A. Fiber optics
 B. Switch
 C. Coaxial cable
 D. Modem
34. The process of converting analog signals into digital signals is known as
 A. Modulation
 B. Demodulation
 C. Multiplexing
 D. Digitizing
35. X.25 standard consists of how many layers of OSI model?
 A. Two
 B. Three
 C. Seven
 D. Six
36. Which of the below is a layer one of the OSI model?
 A. Physical layer
 B. Data link layer
 C. Communication layer
 D. Network layer
37. The x.25 standard specifies a
 A. Technique for dial access
 B. Technique for start-stop data
 C. DTE/DCE interface
 D. All of the above
38. Which of the below option, communication modes support two-way traffic?
 A. Simplex
 B. Full duplex
 C. Half duplex
 D. All of the above
39. Which of the following can be used by a company to convince its growing communications requirements?
 A. RAM
 B. Multiplexer
 C. Controller
 D. All of the above

40. In X.25 standard the number of separate protocol layers at the serial interface gateway is?
 A. 4 B. 25
 C. 6 D. 3
41. The transmission of data within a time sharing system may be most excellent suited to
 A. Simplex lines
 B. Half-duplex lines
 C. Full duplex lines
 D. None of the above
42. Which of the following is incorrect statement?
 A. The difference between synchronous and asynchronous transmission is the clocking concept.
 B. Half duplex line is a communication line in which data can move in both directions, however not at the same time.
 C. Teleprocessing combines telecommunications and DSP techniques
 D. Batch processing is the an ideal processing mode for telecommunication operation.
43. Which of the following channel is a broadband communication channel?
 A. Coaxial cable
 B. Twisted pair cable
 C. Microwave circuits
 D. All of above
44. All of the following are transmission mediums without?
 A. Telephone lines
 B. DSL cables
 C. Mouse
 D. Microwave systems
45. Which of the following does not permit various devices to contribute to one communication line?
 A. Doubleplexer B. Multiplexer
 C. Concentrator D. Adder
46. Which of the following is a not RS-232-C signal?
 A. VDR B. RTS
 C. CTS D. DSR
47. Which of the following is not correct statement?
 A. Multiplexers are planned to allow data from several I/O devices and broadcast a unified stream of data on one communication line
 B. Network layer is second layer of OSI model
 C. RTS/CTS is the way the DTE indicates that it is ready to transmit data and the way the DCW indicates that it is ready to allow data
 D. RTS/CTS is the way the workstation point out ringing
48. Which of the following is an advantage of using fiber optics medium in data transmission?
 A. Resistance to theft
 B. Fast transmission
 C. Low noise
 D. All of above
49. Which of the following is necessary to communicate between two computers?
 A. Communications software
 B. Protocol
 C. Communication hardware
 D. All of above
50. The coding method of TI carrier is called
 A. Bipolar B. NRZ-L
 C. Manchester D. NRZ-l
51. Which means is used to transmit data over a serial communication link?
 A. Simplex B. Half-duplex
 C. Full-duplex D. a and b

52. Smallest amount of wires needed to send data over a serial communication link ?
 A. 1 B. 2
 C. 4 D. 6
53. Which of the following types of channels moves data little by little?
 A. Wide band channel
 B. Voice band channel
 C. **Narrow band channel**
 D. None of the above
54. Data communications involving telegraph lines apply?
 A. Simplex lines
 B. Wideband channel
 C. **Narrowband channel**
 D. Full duplex lines
55. A machine that joins transmissions from several I/O devices into one line is a
 A. Concentrator B. Adder
 C. **Multiplexer** D. Full-duplex line
56. How much power (approximately) a light emitting diode(LED) can join into an optical fiber?
 A. **100 microwatts**
 B. 440 microwatts
 C. 100 picowatts
 D. 10 miliwatts
57. The synchronous modems are more expensive than the asynchronous modems for the reason that
 A. They create large volume of data
 B. **They contain clock recovery circuits**
 C. They transmit the data with bit by bit
 D. They operate with a larger bandwidth
58. Which of the following is correct statement?
 A. IP works on data link layer
 B. Receiver section of a synchronous modem have the scrambler
 C. **Transmission section of a synchronous modem contains the scrambler**
 D. Control section of a synchronous modem contains the scrambler
59. The digital-to-analog converter transmits signal, which one of the following in a synchronous modem
 A. **Equalizer** B. Modulator
 C. Demodulator D. Register
60. Which of the following communications lines is best appropriate to interactive processing applications?
 A. Wide band channel
 B. Simplex lines
 C. **Full duplex lines**
 D. Mixed band channels
61. A remote batch-processing operation in which data is solely input to a central computer would need
 A. Fiber line
 B. **Simplex lines**
 C. Mixed bad channel
 D. None of above
62. A communication band is always equal to
 A. A byte B. A bit
 C. 1000 bits D. **None of above**
63. The loss in signal power as light travels down the fiber is called
 A. **Attenuation** B. Progragation
 C. Gain D. Interruption
64. Avalanche photodiode receivers can detect bits of transmitted data by receiving
 A. 100 photons B. **200 photons**
 C. 2000 photons D. 3000 photons
65. Communication method that transmit data in both directions but not at the same time are operating in
 A. A simplex mode
 B. **A half duplex mode**
 C. A full duplex mode
 D. Synchronous mode
66. Which one of the following is the example of switched communications service
 A. Paralel 1000 B. Serial1050
 C. **DDD** D. All of the above

67. In satellite communication, multiple repeaters are known as
 A. Multiplexer B. Transponders
 C. Modulator D. Subtractor
68. The number of zeros odd parity coded symbol is
 A. Odd or even B. Multiple of 3
 C. a and b both D. Unknown
69. Communications monitors obtainable on the software marked consist of
 A. TOTAL B. BPL
 C. ENVIRON/1 D. Visual session
70. Which one of the following is an example of an analog communication method?
 A. Antenna beam B. Microwave
 C. Digital line D. All of the above
71. Baudot code contains how many bits per symbol
 A. 7 B. 3
 C. 5 D. 10
72. What is the main diversity between SDLC and DDCMP?
 A. **DDCMP does not need particular hardware to final the start of a message**
 B. SDLC does not use CRC for error correction
 C. SDLC has a MAC address
 D. DDCMP has an optional header
73. An example of digital communication is
 A. DDA B. DDS
 C. DLD D. DDT
74. Terminals are required for which of the following?
 A. Real-time, batch processing
 B. Real time, distributed message processing
 C. Real time, distributed processing
 D. **Real-time, time sharing & message switching**
75. The receiver equalizer technique decreases delay distortion by means of
 A. Transformer
 B. **Tapped delay lines**
 C. Low pass filter
 D. Efficient engine
76. What is the name of the receive equalizer in a synchronous modem?
 A. Compromise equalizer
 B. Impairment equalizer
 C. Medium equalizer
 D. **Adaptive equalizer**
77. In data communication model a channel can be
 A. Radio lines
 B. Telephone(DSL) lines
 C. Postal mail services
 D. **All of the above can be**
78. A data terminal is used as
 A. Effector
 B. Wireless or wired sensor
 C. **both a and b**
 D. None of above
79. Which of the following transmission systems have highest data rate?
 A. **Computer bus**
 B. Twisted pair lines
 C. Wireless
 D. Coaxial lines
80. A protocol is a set of set of laws leading a time series of actions that must take place
 A. Between routers
 B. Between an interface
 C. Between users
 D. **Between peers**

SOFTWARE ENGINEERING

81. What is the definition of term Software?
 A. A set of computer application
 B. **A mathematical modal**

- C. Set of computer programs probably associated document disturbed with the operation of data processing is called a software
D. All of above
82. Which of the following is not the feature of software?
A. Software does not wear out
B. Software is intelligent
C. Software is artificial
D. Software is always exact
83. All of the following are related to a product matrix except?
A. Productivity
B. Size
C. Reliability
D. Functionality
84. All of the following are process metric except?
A. Productivity
B. Quality
C. Functionality
D. Efficiency
85. Efforts is calculated in terms of ?
A. Persons
B. Person - Months
C. Rupees
D. Months
86. Infrastructure software is enclosed in which of following?
A. Generic Products
B. Customized Products
C. Both a and b
D. All of the above
87. Software development management is needy upon?
A. users
B. Products
C. Process
D. All of above
88. Which factor is most crucial in the development of software?
A. People
B. Process
C. management
D. Process
89. Milestones are used for what purpose?
A. Know the position of the development
B. Know the cost of the project
C. Know the user expectations
D. None of the above
90. The word module in the design phase of a software is known as?
A. Procedures
B. Functions
C. Sub programs
D. All of the above
91. The model Spiral was developed by?
A. Bev. Littlewood
B. R. Pressman
C. Berry Bohem
D. Bisilli
92. For students small projects which model is used?
A. Spiral Model
B. Quick/ Fix model
C. Waterfall Model
D. Prototype Model
93. Which of the following is not a software life cycle(SLC) model?
A. Spiral Model
B. Capability maturity Model
C. Waterfall Model
D. Quick and fix Model
94. Project risk aspect is measured in ?
A. Waterfall Model
B. Prototyping Model
C. Spiral Model
D. Quick and fix model
95. SDLC is the abbreviation of?
A. Software design life cycle
B. System development life cycle
C. System design life cycle

- D. None of above
96. Build and Fix model consists of?
 A. 1 Phases
 B. 2 Phases
 C. 3 Phases
 D. 4 Phases
97. SRS is short for?
 A. Software requirement system
 B. Software requirement specification
 C. System requirement specification
 D. All of Above
98. The model Waterfall is not appropriate for?
 A. Accommodating change
 B. Small Projects
 C. Complex and large Projects
 D. All of Above
99. What does RAD means?
 A. Relative Application Development
 B. Ready Application Development
 C. Rapid Application Development
 D. Repeated Application Development
100. RAD Model was projected by?
 A. Motorola
 B. IBM
 C. Microsoft
 D. Cisco Technologies
101. The purpose of Software engineering is to develop?
 A. Reliable Software
 B. Consistent and cost effective Software
 C. Cost Effective Software
 D. All Of Above
102. An excellent specification must be
 A. Functional
 B. Unmistakable
 C. Clearly Specific
 D. All of Above
103. Which of the following design phase tool?
 A. Information Hiding
 B. Abstraction
 C. Refinement
 D. All of Above
104. Information hiding (to hide from user), explains?
 A. That are irrelevant to him
 B. That may be maliciously handled by him
 C. That are not relevant to him
 D. That are confidential
105. Which of the following statement is not correct?
 A. An object is possible to belong to two classes
 B. Objects inherit the properties of class
 C. Classes are defined based on the attributes
 D. Classes are for all time different
106. Design phase consists of?
 A. Data, architectural, interface and procedural design
 B. Data, architectural and procedural design only
 C. Architectural and interface design only
 D. Data and architectural design only
107. To write a program in FORTRAN language and rewrite the 1% code in assembly, if the project requires 13 working days, the team must consists of ?
 A. 8 programmers
 B. 13 programmers
 C. 1000 programmers
 D. 100/13 programmers
108. If 99% of a program is written in FORTRAN language and the left over 1% in assembly language, the percentage raise in the programming time in contrast to writing the whole program in FORTRAN language and rewriting the 1% in assembly language is ?
 A. 100
 B. 5
 C. 1

109. If whole program is written in FORTRAN programming language, the percentage raise in the program execution time, as compared to writing the whole program in FORTRAN language and rewriting the 1% in assembly language is ?
- 0.99
 - 84
 - 0.8
 - 90
110. If 99% portion of a program is written in FORTRAN programming language and the remaining 1% portion of the program in assembly language the percentage raise in the execution time, compared to writing the 1% portion of program in assembly language is
- 0
 - 0.12
 - 10
 - 0.99
111. A software testing technique ie White box testing is also known?
- Basic path testing
 - Glass box testing**
 - Graph Testing
 - Dataflow
112. Black box testing is also known as?
- Glass box testing
 - Behavioral Testing**
 - Loop Testing
 - Graph Based Testing
113. Which of the below option is a type software testing?
- Stress Testing
 - Recovery Testing
 - Security Testing
 - All of the above**
114. The purpose of software testing is?
- Debugging
 - To gain modularity
 - To expose errors**
 - To investigate system
115. Which of the following is a black box testing method?
- Basic path testing
 - Boundary value analysis**
 - Code path analysis
 - All of above
116. Structured programming codes consist of?
- Alteration
 - Sequencing
 - Iteration
 - All the above**
117. Which of the following is the a significant characteristic of coding?
- Readability**
 - Productivity
 - Efficiency
 - Brevity
118. Data structure suitable for which of the following application?
- Architectural design
 - Sequential design
 - Data design**
 - Interface design
119. To design a software in object oriented design, objects must have?
- Attributes only
 - Operations and names and names only
 - Attributes, name and operations**
 - All of above
120. Who was the first who proposed the function oriented metrics?
- Albrecht**
 - John
 - Jouls
 - Basill
121. Suppose that we have a source code with 10 operators which include 6 different operators, and 6 operand including 2 different operands, The program volume will be?
- 48**

- B. 1120
C. 20
D. 100
122. In the system terminologies, the term organization means?
A. Manner in which each component functions with additional components
B. Refers to the holism of system
C. **Implies structure and order**
D. Some parts of the computer depends on one another
123. What is the meaning of the term integration in system concept ?
A. The manner in which each component functions with other components of the system
B. Implies structure only
C. Means that parts of computer system depends on one another
D. **Refers to the holism of systems**
124. Project pointer helps a software project manager to
A. Evaluate the position of an current project
B. Follow potential risks
C. Expose problem areas
D. **All of above**
125. When object oriented programming has been proficient, the Class tests for it includes?
A. Fault indicating testing
B. Random testing
C. Partition testing
D. **All of above**
126. Which of the following developed a set of software quality factors that has been given the short form FURPS?
A. Rambaugh
B. **Hewlett - Packard**
C. Booch
D. Jacobson
127. What do we follow in system design?
A. **Parallel hardware and software design**
B. Hardware design after software
C. Software design after hardware
D. None of above
128. The file having all procedures, rules and regulations that usually direct an organization is
A. Personal bank
B. Administration manual
C. **Organizing manual**
D. Procedure data
129. A turnkey package consists of ?
A. Training
B. Software
C. Hardware
D. **All of above**
130. Term related to Detailed design is
A. ASPEC
B. Code SPEC
C. PSPEC
D. **MINI SPEC**
131. The data flow diagram in functional decomposition is
A. is ignored
B. **is divided according to the logical closeness of the actigram**
C. is partitioned according to the closeness of the datagram items
D. Both A and C
132. In phase I of the system development life cycle which of the following is done?
A. Reviewing policies only
B. Using questionnaires and surveys
C. carrying Interviews
D. **All of above**
133. What is another name of graphic representation of an information system?
A. **Data flow diagram**
B. Flow chart
C. Pictogram

D. All of above

134. During data entry the system to avoid errors in transcription analyst should?
A. Provide batch totals
B. Provide for a check digit
C. Provide for a hash totals
D. All of above
135. RAD is not suitable when?
A. Fast finding already done
B. Technical risks are high
C. Testing is needed
D. All of above
136. A quantitative determine of the degree to which a system or process posses a given characteristic?
A. Measure
B. Gain
C. Metric
D. All of these
137. Which of the following model remains functioning in anticipation of the software is withdrawn?
A. Spiral
B. Waterfall
C. Incremental
D. All of these
138. Which of the following risk includes in risk analysis of spiral model?
A. Technical
B. Management
C. Both a and b
D. Data is insufficient
139. RAD is a linear sequential software development process model. True or false?
A. True
B. False
140. In the system terms, the term integration refers to the holism of system. true or false?
A. True
B. False
140. What is the meaning of Binary code "0"?
A. situation of absence
B. situation of presence
C. situation of Negative
D. None of the above
141. The compulsory part of HTML is
A. <end> B. <body>
C. <tag> D.
142. CAI is the abbreviation of
A. Compiler Aided Instruction
B. Computer Added Information
C. Computer Aided Information
D. Computer Aided Instruction
143. Greatest font size in HTML language can be
A. 3 B. 9
C. 4 D. 7
144. Which type of device MICR reader is
A. Input B. Output
C. hard D. monitor
145. What is Internet?
A. Network of Networks
B. Network of small number of users
C. Networks of Data and communication
D. Second name of LAN
146. Which of the following is a standalone tag?
A. <tag> B. <body>
C. <head> D.
147. FTP is short for
A. Folder Transfer process
B. File Tag Process
C. File Transfer Protocol
D. File Text Protocol
148. The base of Hexadecimal number system is
A. 10 B. 04
C. 16 D. 08
149. What does HTML means
A. Hypertext Memory language

BASIC OF IT SET

- B. Hypertext Markup language
- C. Hypertext Move language
- D. Hypertext Mark computer language

- A. Insert menu Bar
- B. Menu Bar
- C. Status Bar
- D. Task bar

COMPUTER FUNDAMENTALS

150. Which of the following is the default setting for a horizontal rule
- A. half shaded
 - B. shaded
 - C. both
 - D. all of above
151. Which of the following tag is used to embed image in a webpage?
- A. ``
 - B. ``
 - C. `<imp s="pic.gif">`
 - D. all of the above
152. The given statement define which of the following A global collection of high-powered computer that are connected collectively with cables, telephone lines, and satellites links etc.
- A. MAN
 - B. LAN
 - C. LAN Network
 - D. Internet
153. Which of the following device is used to pointing the screen coordinates by sensing the light.
- A. Light Pen
 - B. Joy stick
 - C. Keyboard
 - D. Mouse
154. Which of the following option displays the information about the current file such as page settings etc
- A. Insert menu Bar
 - B. Menu Bar
 - C. Status Bar
 - D. Task bar
155. Which of the below option defines that a fresh record to the file
- A. Appending
 - B. Updating
 - C. Copping
 - D. Pasting
156. Which of the following is the short (using keyboard) to move the cursor of the mouse to end of a page
- A. Ctrl+End
 - B. Tab+End
 - C. Alt+End
 - D. Shift+End
157. SMTP is the abbreviation of
- A. Same Mail Transfer Protocol
 - B. Simplest Mail Transport Process
 - C. Simple Mail Transfer Protocol
 - D. Sample Mail Transport Process
158. What does JPEG short for
- A. Joint Photo Experts Group
 - B. Joint Photo Experts Game
 - C. Joint Photographic Experts Group
 - D. Join Photo Experts Group
159. To start a new line without starting a new paragraph(using keyboard) is
- A. Ctrl+A
 - B. Shift+Enter
 - C. Alt+delete
 - D. space bar
160. MS word is used for
- A. Printing
 - B. Documentation
 - C. Presentation
 - D. Scanning

COMPUTER SECURITY

161. What of the following is used in denial of service attacks
- A. Worm
 - B. Zombie
 - C. Virus
 - D. Virus
162. Which of the following is the correct order for the phases of virus execution process
- i) Propagation phase
 - ii) Dormant phase
 - iii) Execution phase
 - iv) Triggering phase
- A. ii, iii, and iv
 - B. i, ii and iv
 - C. ii, i, iv, iii
 - D. None of the above
163. Which of the following attaches itself to executable files and replicates
- A. Small virus
 - B. Parasitic Virus
 - C. Parasitic worm
 - D. Large Virus

164. Which of the following is a form of virus unambiguously planned to hide itself from exposing by antivirus software.
 A. **Stealth virus** B. Poly phase Virus
 C. Small worm D. Large Virus
165. What of the given copies itself during replication but have definitely different bit patterns.
 A. Small Virus
 B. Steallth Virus
 C. **Polymorphic Virus**
 D. Large Virus
166. A _____, a portion of the Polymorphic virus creates a random encryption key to hide the remainder of the virus.
 A. mutual virus
 B. **mutation engine**
 C. multiple phase engine
 D. polymorphic engine
167. The following statement is true or false
 i) A macro virus is autonomous.
 ii) Macro viruses infects only documents
 A. i-only B. ii-only
 C. **Both** D. None
168. In Microsoft word the type of auto executing macros is/are
 A. Auto execute
 B. Auto macro
 C. Command macro
 D. **All of the above**
169. In which of the given the virus places an copy of itself into other programs or on disk.
 A. Generation phase
 B. **Propagation phase**
 C. Reproducing phase
 D. Changing phase
170. A _____ uses a computer to launch attacks after secretly takes over another Internet-attached computer
 A. **Zombie** B. Worm
 C. Virus D. Trojan
171. A computer system assets can be modified only by authorized parities. This is the definition of?
 A. Confidentiality B. **Integrity**
 C. Security D. Authentication
172. _____ means that the information in a computer system only be available for reading by allowed parities.
 A. **Confidentiality**
 B. Integrity of data
 C. Availability
 D. Security
173. What are the type of threats on the computer system or network
 i) Interruption
 ii) Interception
 iii) Modification
 iv) Creation
 v) Fabrication
 A. ii, iii and iv
 B. ii, iii and v only
 C. **i, ii, iii and v only**
 D. All of the above
174. An independent malicious program that need not any host program to launch?
 A. Trap virus
 B. Trojan horse
 C. **Worm**
 D. Small virus
175. What of the following is a code that is triggered by being run from a certain user ID of by different series of events.
 A. **Trap doors**
 B. Trojan horse
 C. Worm
 D. Virus
176. When certain conditions are met _____ Code embedded in some genuine program that is set to "explode".
 A. Trap virus
 B. Trojan horse
 C. Worm
 D. **Logic bomb**

177. A malicious program that does not replicate automatically?
 A. Trojan Horse
 B. Virus
 C. Worm
 D. Trap virus
178. Which of the following program can be used to accomplish functions indirectly that an illegal user could not achieve openly,
 A. Zombie
 B. Virus
 C. Trojan Horses
 D. Logic Bomb virus
179. The following statements are true or false
 i) A worm mails creates copy of itself to other system.
 ii) A worm executes a copy of itself on other system.
 A. True, False B. False, True
 C. True, True D. False, False
180. Which of the following is a program that can infect other programs by modifying them
 A. Worm
 B. Virus
 C. Zombie
 D. Trojan horses
183. A level is where the model becomes compatible executable code is ____
 A. Generation level
 B. Application level
 C. Implementation level
 D. None of the above
184. What is another name of Stack
 A. Last in first in
 B. First in last out
 C. Last in first out
 D. First in first out
185. Which of the given statement is right about the characteristics of abstract data types?
 i) It exports a type,
 ii) It exports a set of operations
 A. True, False B. False, True
 C. True, True D. None of the above
186. What of the below is not the component of data structure
 A. Operations
 B. Storage Structures
 C. All of the above
 D. None of above
187. All of the following are the parts of ADT description except?
 A. Data
 B. Operations
 C. Both A and B
 D. None of the above

DATA STRUCTURE

181. The levels of implementation of data structure are
 A. Abstract level
 B. Application level
 C. Implementation level
 D. All of the above
182. _____ is a binary search tree whose left subtree and right subtree differ in stature by mainly 1 unit
 A. AVL tree
 B. Red-black tree
 C. Lemma black tree
 D. All of the above
188. _____ is Inserting an item into the stack when stack is not full
 A. Push B. Pop
 C. Open D. Delete
189. A pile in which items are added at one end and removed from the other is
 A. Stack B. Queue
 C. Push D. All of the above
190. A useful situation when data have to stored and then retrieved in turn around order is
 A. Stack B. Queue
 C. Push D. None of the above

COMPUTER STUDIES

Basics of Computer Studies

1. All the field names in each record must be:
A. Meaningful.
B. Unique.
C. Right.
D. Both (a) and (b)
Correct Answer: Both (a) and (b)
Explanation: While keeping records, all the field names are supposed to be unique and meaningful.
2. A unit of data consisting of one or more characteristics is known as:
A. Record.
B. Field.
C. File.
D. None of these.
Correct Answer: Field.
Explanation: A field contains data of one or more characteristics.
3. Field names are only used as a _____ within the programs using them:
A. Names reference.
B. Cell.
C. Reference.
D. Value.
Correct Answer: Names reference.
Explanation: The purpose of field names are only for using as a name reference in programs.
4. A candidate key is also known as:
A. Secondary key.
B. Primary key.
C. Alternate key.
D. None of these.
Correct Answer: Alternate key.
Explanation: It is a fact.
5. When was the idea of using relational database instead of file structures proposed?
A. 1940.
B. 1950.
C. 1960.
D. 1970.
Correct Answer: 1960.
Explanation: In 1960 the idea of using relational database instead of file structures was proposed by the researchers.
6. Records in file management structures are known as _____ in database structures:
A. Rows.
B. Tuples.
C. Both (a) and (b).
D. None of these.
Correct Answer: Both (a) and (b).
Explanation: Tuples or rows are the records that are present in file management structures.
7. An entity consists of one or more _____.
A. Tables.
B. Rows.
C. Columns.
D. Attributes.
Correct Answer: Attributes.
Explanation: An entity is composed of one or more attributes and each attribute must have only one value.
8. Rows are also known as:
A. Entity.
B. Occurrence.
C. Records.
D. Attributes.
Correct Answer: Records.
Explanation: A row in a database is also known as a record.
9. Columns are also known as:
A. Attributes.
B. Records.
C. Occurrence.
D. Entity.
Correct Answer: Attributes.
Explanation: A column in a database is also known as an attribute.

10. Point out the property of a relation:
- Contains large data.
 - Contains rows and columns.
 - No duplicate rows exist
 - All of these.
- Correct Answer:** No duplicate rows exist
Explanation: It is the property of a relation that no two rows can be identical.
11. Among the following, which is a non-unique field?
- Primary key.
 - Secondary key
 - Candidate key.
 - Alternate key.
- Correct Answer:** Secondary key
Explanation: A secondary key is a non-unique field that is used as a secondary key.
12. Composite and sort are the properties of which keys.
- Primary keys.
 - Secondary keys.
 - Candidate keys.
 - None of these.
- Correct Answer:** Candidate keys.
Explanation: A candidate key must possess the above discussed properties.
13. Views are created using:
- Indexes.
 - Keys.
 - SQL.
 - FMS.
- Correct Answer:** SQL.
Explanation: Views are created using SQL which is a powerful database language.
14. A person who uses the computer for his specific needs is known as:
- A programmer.
 - A user.
 - An end-user.
 - Both (b) and (c).
- Correct Answer:** Both (b) and (c).
Explanation: A person who is using a computer for his specific needs is known as a user or an end-user.
15. Who is responsible for the entire data of an organization?
- Data administrator.
 - Data handler.
 - Database administrator.
 - All of these.
- Correct Answer:** Data administrator.
Explanation: A data administrator (DA) is a person responsible for the entire data of an organization.
16. Where is the operating system of a computer system installed?
- RAM
 - ROM
 - Hard disk
 - ALU
- Correct Answer:** Hard disk
Explanation: In computers, Operating System is installed and stored on the hard disk. But as the data access from the hard disk is very slow, just after the computer is started OS is copied into RAM from the hard disk.
17. What is the complete form for CLI?
- Computer linked interface
 - Command line interface
 - Caller identified interface
 - None
- Correct Answer:** Command line interface
Explanation: Fact.
18. All of these are GUI operating systems except?
- Windows
 - Solaris
 - Linux
 - DOS
- Correct Answer:** DOS
19. An operating system provides a/an _____ to interact with user.
- Software.
 - Interface.
 - Command.
 - Document
- Correct Answer:** Interface.
Explanation: An operating system provides a connection to interact with user. Without an operating system a computer is useless.
20. Which of these acts as a moderator between the computer resources and the user?

- A. Application software
- B. Operating system
- C. Hardware devices
- D. None of the above

Correct Answer: Operating system

Explanation: Operating systems like MS Windows ensure fair usage by managing the system resources with the user, application software and hardware devices.

- A. GUI operating system.
- B. Computer virus.
- C. Hardware.
- D. Command line operating system.

Correct Answer: Command line operating system.

Explanation: Unix is an operating system which follows a command line interfacing. It interacts with a computer program when a user commands the program through a series of text commands.

21. Operating system has ____ types.

- A. Four.
- B. Three.
- C. Two.
- D. One

Correct Answer: Two.

Explanation: It is a fact.

26. How many kilobytes are there in 240 megabytes?

- A. 240000
- B. 24000
- C. 245760
- D. 2457600

Correct Answer: 245760

Explanation: Total KBs in 1 MB are 2^{10} . Therefore, the correct ans is 240×2^{10} , i.e. 245760.

22. Which of these is not a scanning device?

- A. Bar-code reader
- B. Smart cards
- C. Audio input device
- D. None of these

Correct Answer: None of these

Explanation: All of these are examples of scanning devices.

27. Which of these has 240 bytes?

- A. GB
- B. TB
- C. PB
- D. MB

Correct Answer: TB

Explanation: 1 Tera byte has 2^{40} bytes.

23. Which of these display adapters supports highest resolution?

- A. VGA
- B. SVGA
- C. XGA
- D. Electro luminescent display

Correct Answer: XGA

Explanation: XGA (Extended graphics adapter) supports the highest resolution i.e. 1024 x 768 pixels. Electroluminescent display is not a graphics adapter.

28. Which of these statements best describes application software?

- A. It fetches user data and processes it to give output.
- B. It sends the user data to the RAM for further processing.
- C. It interacts with the user and sends instructions to the CPU to perform a specific task.
- D. It manages different resources of the computer to give user-desired output.

Correct Answer: It interacts with the user and sends instructions to the CPU to perform a specific task.

Explanation: The application software is basically a set of programs that are designed to carry out specific tasks as instructed by the user. The application software then sends data to the CPU to manipulate and implement the instructions to finally give the output.
